

REACH Consulting Services

THE CGI WAY

CGI is a full service IT and managed services provider with focused industry expertise and innovative service models that help clients achieve their business goals. We have extensive experience in delivering regulatory compliance services and IT solutions to global enterprises that leverage our systems integration expertise, health and safety domain expertise and broad industry experience.

For environmental managers in industry and government, CGI provides an integrated portfolio of EHS, quality/audit and compliance solutions that help clients better serve their markets, improve and sustain competitive advantage, and reduce overall compliance risk.

CGI uses a flexible, tailored approach to providing EHS services and IT solutions. We structure each relationship to meet our client's unique business goals and build in flexibility to meet current and future needs. To each client relationship we bring quality and a delivery track record, flexible and accountable partnerships, and industry depth and expertise.

DELIVERING QUALITY EHS & REACH CONSULTING SERVICES

Businesses around the world are faced with extraordinary challenges when it comes to ensuring the safety of their workers, issuing, harmonizing or complying with environmental regulations, and controlling the manufacturing and handling of hazardous material. More than ever before, the management of environmental issues is becoming a fundamental aspect of the industrial, manufacturing and regulatory sectors. In recent years, the regulatory environment has increased in complexity and global initiatives, such as the Globally Harmonized System of Classification and Labeling of Chemicals and REACH.

CGI's portfolio of consulting and software solutions is particularly well positioned to address these challenges. CGI has created a unique suite of services and software solutions to specifically address client needs relating to REACH.

REACH Legislation

REACH is a European Community Regulation on chemicals and their safe use and is considered the most ambitious chemicals legislation that's been enacted anywhere in the world. It deals with the **Registration, Evaluation, Authorisation and Restriction of Chemical substances**. The new law entered into force on 1 June 2007 and requires the registration over a period of 11 years of some 30,000 chemical substances that are in use today.

For more REACH information visit http://echa.europa.eu/home_en.asp.

CGI REACH Consulting Services

CGI's REACH consulting services are designed to guide clients in the preparation, planning and execution of activities necessary to successfully comply with REACH and minimize risks and possible disruptions to client operations and profitability. Our REACH consulting services also complement our IT-related REACH services.

Our REACH consulting services focus on the following areas and are tailored to meet individual client needs.

- **REACH Readiness Assessments & Planning**

CGI can help you assess your current abilities and efforts to meet REACH obligations and the inherent risks posed by REACH. This assessment includes a review of your existing product portfolio, chemical portfolio and future roadmap, as well as upstream/supplier risks and downstream/client requirements. The key deliverable is an action plan and timeline to guide your company's activities into REACH compliance.

CGI REACH Consulting Services - Continued

• Business Process Engineering

CGI can assist in the analysis and re-engineering of internal business processes that need to be created or are affected by REACH. The intent is to make sure all REACH required activities and information are executed and delivered appropriately and efficiently.

• REACH Regulatory & Compliance Support

CGI can support the specific activities that will be performed by your company to comply with REACH. This includes the capture and delivery of information across the supply chain to and from suppliers and purchasers, as well as to the regulatory community.

• EHS Subject Matter Experts

CGI can provide subject matter experts to augment your resources in support of EHS activities that provide specialized base data needed to create compliance documentation and fulfill other EHS responsibilities.

• Other Related Support Services

CGI can deliver other complementary financial, procurement and IT services to further support REACH compliance processes. These services may be needed to provide specialized base data or to support broader operations that lie outside the normal EHS responsibilities.

REACH Software Solutions & IT Support

CGI delivers complete end-to-end IT services including systems integration and development, application management and technology hosting. For EHS related support, CGI has a comprehensive portfolio of environmental IT solutions and provides clients with integrated enterprise solutions for regulatory and compliance management and environmental data exchange. To help clients specifically meet their REACH regulatory and documentation requirements, CGI has expanded the product suite to include the CGI REACH Toolset. CGI's REACH Toolset can be deployed as an integrated platform with CGI's ProSteward® Authoring Solution or integrated with other third-party solutions.

CGI also provides REACH specific IT services that include IUCLID implementation and integration with other current and future systems and toolsets. CGI has experienced IT professionals to assist with all aspects of the toolset integration.
