

Built-for-Government Enterprise Resource Planning

_experience the commitment™

“This solution will provide us timely and more effective access to information, improving how we deliver services to our citizens and helping maximize taxpayer dollars. In CGI we have a long-time partner that understands the business of government, and [have access to the ERP solution that] can be implemented quickly and easily in our environment.”

J. Tyler McCauley,
Auditor-Controller,
Los Angeles County, California

2008 DIGITAL GOVERNMENT AWARD

Wake County, North Carolina honored CGI with a “Best Fit Integrator” award from the Center of Digital Government under the categories of ‘Elegant Design’ and ‘Tailored Teams’ in the areas of finance and administration. AMS Advantage was also recognized in 2007 by Los Angeles County, California.

EFFICIENCY, ACCOUNTABILITY, ACCESS TO INFORMATION

Enterprise resource planning (ERP) is about more than just technology. For state and local government governments, it is about transformation; reducing data entry, automating processes and approvals, improving access to information, and keeping pace with change. Through this transformation, organizations increase efficiency, accountability and access to information.

Yet organizations struggle to realize the full potential of their ERP systems; challenged by features that don’t meet their needs, functionality that doesn’t support their business, and workflows that don’t match their processes. All issues that lead to a highly customized ERP system and unpredictable total cost of ownership.

What governments need is a solution developed with them in mind—one that conforms to GASB, GAAP, CAFR, CMIA and FASB out-of-the-box—along with built-for-government functionality that increases automation and access to information while reducing customization for lower total cost of ownership.

CGI is committed to built-for-government ERP software, a powerful combination of modern technology and comprehensive, integrated business applications. With AMS Advantage ERP, organizations address organizational need through configuration, not customization. Architected upon open standards, n-tiered and service-oriented architecture (SOA), our proven, web-based technology is helping clients keep pace with change.

A comprehensive suite of best-in-class ERP solutions

With integrated functionality, workflow and configurable processes, governments are increasing efficiency and accountability and improving access to information all while reducing total cost of ownership. Our ERP suite includes faster editing, data entry, reduced scrolling, easy error handling and personalization without coding thanks to Rich Internet Applications.

- **Financial Management** for organization-wide accountability through consistent accounting rules across all financial transactions, to track and control internal and external funding sources and fiscal and multi-year budgets, grants management.
- **Performance Budgeting** automates the budgeting process for better planning to improve financial and operational performance as well as critical decision-making for improving day-to-day efficiency and long term forecasting. .
- **Human Resources Management** streamlines the HR and payroll process from hire to retire, including online recruiting, timekeeping and direct access for employees for managing benefits and leave.
- **Procurement** automates purchasing via catalog-based ordering and paperless approval processes, linking it directly to the government accounting system for automated matching and automated payment process.
- **Business Intelligence** unlocks the data fast for more effective decisions and increased measurement of key performance indicators through sophisticated reporting, ad hoc query and visual, interactive dashboards.

Built-for-government solution for effective results

By balancing built-for-government functionality with web-based technology, CGI's AMS Advantage ERP suite enables government transformation. Drawing upon best practices and our government experience, clients improve efficiency, management and management reporting and reduce total cost of ownership.
