

Medicaid Incentive360®

WHY CGI?

With 35 years of IT and business consulting experience, 20 of which have been focused on the health industry, CGI has the IT and health expertise to help states transform their operations and fulfill their core mission.

Using *Medicaid Incentive360*, states can:

- Meet the EHR incentive program implementation dates
- Minimize disruption to current operations and reduce the need for more staff
- Establish predictable payment schedules and defined service level agreements
- Eliminate development efforts associated with a limited-time program
- Reduce dependency on MMIS vendor/fiscal agents
- Track incentive payments separate from MMIS payments
- Streamline complex processes and stay current with evolving CMS policies
- Offer an easy-to-use provider portal with a flexible architecture

ALL YOU NEED TO IMPLEMENT ON TIME AND ON TRACK

The Medicaid Electronic Health Record (EHR) Incentive Payment Program, mandated by the American Recovery and Reinvestment Act of 2009, requires states to apply for, manage and distribute EHR incentive payments to eligible professionals and hospitals. The goal is to facilitate EHR adoption to improve quality of care and reduce health costs.

The Centers for Medicaid and Medicare Services (CMS) selected CGI to help develop the provider registration and attestation components of the program. For states, CGI's Medicaid Incentive360 is an end-to-end suite of program implementation and administration services that allows states to transition to and administer their incentive programs without undue risk, burden, delay and cost.

Using Medicaid Incentive360, Texas was one of the first in the nation to disburse EHR incentive payments and has paid out more than twice the amount of any other state; and, Texas and Ohio combined have disbursed more than \$330 million in incentive payments through January 2012.

Also for Texas and Ohio, CGI has launched Stage One Meaningful Use functionality to be used by providers to submit specific evidence of meeting a minimum number of meaningful use objectives, as well as quality measures. This will be required to qualify for incentive payments in the second and subsequent years of the program.

CGI's Medicaid Incentive360 suite of services includes:

- **Program management:** While strategic decision making authority over the new program resides with each state, CGI provides business and technical program management services, including project management, service level monitoring and reporting, and stakeholder engagement.
- **Business services:** CGI handles business administration for the new program, including communications and outreach; policy and procedure management; call centers; dispute resolution; reporting/auditing; fraud, abuse and duplication monitoring; and payment processing.
- **Technical services:** Our technical services include infrastructure management, portal registration capabilities, attestation and inquiry, interface administration, and the promotion of data exchange initiatives.
