CGI's commitment to oil and gas

EXPLORATION AND PRODUCTION

TRUST ASSET MANAGEMENT

ENTERPRISE AND FINANCIAL SYSTEMS

Your partner of choice

Oil and gas companies face an array of challenges—rising costs associated with finding and producing natural resources, fluctuating commodity prices, regulatory obligations and environmental hurdles. These challenges, coupled with the need to expand back-office and IT infrastructures to manage them, can easily distract companies away from their main goal—profitably producing oil and gas.

Merger and acquisition activity, the norm of the industry, also leads to increased complexity. In addition, oil and gas companies are under pressure to deliver services quickly and integrate operations and environments efficiently to eliminate redundancy, reduce costs and accelerate ROI.

How successfully an oil and gas company overcomes these challenges and distractions, and the partners it chooses to rely on for help, has a direct impact on the company's bottom line.

People, solutions, results

For more than 20 years, CGI has helped oil and gas companies focus more on their core business and less on their infrastructures, reducing G&A costs and optimizing asset utilization. CGI's integrated financial, production, land and asset management solutions can effectively address the needs of any petroleum company or natural resource trust department, regardless of size—from the junior producer to the integrated major. CGI provides customized services, addressing specific challenges in the upstream industry. We currently deliver IT solutions, systems integration services and IT and business process outsourcing services to more than 650 oil and gas clients worldwide.

CGI's oil and gas solutions are integrated with enterprise software solutions, information management consulting services and business process outsourcing services.

Our oil and gas expertise is based on:

- An unsurpassed concentration of business, technical and financial staff dedicated to designing petroleum management solutions based on best industry practices.
- A critical mass of approximately 250 professionals dedicated to the upstream oil and gas industry.
- Scalable solutions that take growth and future needs into account.

Our expertise ensures the success of all your projects—from implementing software designed by our experts, to delivering solutions in an Application Service Provider environment, to performing non-core, back-office accounting functions.

CGI services and solutions

CGI's comprehensive and integrated product suite effectively addresses the myriad needs of upstream oil and gas companies and trust asset management organizations:

- Asset Management, which includes Landman and Joint Interest Facilities Information (JIFI) for the Canadian market and CGI Horizon, CGI MAP and CGI PetroComp for the U.S. market, covers land interests, wells and facilities and provides your staff with the information needed to make informed business decisions.

People, solutions, results

- Interest Well is a flexible, dynamic and tailored solution designed for managing and accessing proprietary well data.
- Enterprise and Financial Systems, which includes CGI enVision and CGI Wolfpac for the Canadian market, and CGI Horizon and CGI PetroComp for the U.S. market, tracks and reports financial results to help private and publicly traded oil and gas companies accurately comply with government reporting requirements.
- Production Revenue Accounting Systems includes our Triangle and Royalty Management System for the Canadian market and CGI Horizon and CGI Petrocomp for the U.S. market.
- Production Management, which includes CGI's PVR (Production Volume Reporting), GFR (Gas Facility Reporting) and CNS (Contract Nomination System) solutions, tracks daily operations for organizations of all sizes.
- Horizon Business Process Services for accounting and financial functions are long-term and include specialized back-office services, such as state/provincial and federal regulatory and severance tax reporting as well as partnership accounting, enabling you to better focus on your core business, reduce G&A costs and optimize asset utilization.
- ASP Solutions help you support growth, enhance productivity and increase efficiencies. With this highly effective software delivery system, you can minimize the up-front costs often associated with enterprise applications and maintain your software systems on an affordable and predictable monthly fee basis.

As your trusted partner, CGI provides an end-to-end range of software solutions complemented by ASP, IT consulting and outsourcing services, for petroleum and trust asset management industries throughout Canada, the U.S. and the world. Our expertise and product offerings deliver measurable bottom-line results by managing your back-office, information and operational needs.

Corporate profile

At CGI, we're in the business of satisfying clients. For 30 years, we've operated upon the principles of sharing in our clients' challenges and delivering quality services to solve them.

A leading IT and business process services provider, CGI has approximately 25,000 professionals operating in 100+ worldwide offices, giving us close proximity to our clients. Through these offices, we offer local partnerships and a balanced blend of global delivery options to ensure that clients receive the combination of value and expertise they require.

CGI defines success by exceeding expectations and helping clients achieve results.
