### Introducing CGI

CGI is an end-to-end IT services provider with approximately 31,000 professionals operating in 100-plus offices worldwide. With a 30-year history of client satisfaction and IT expertise, CGI has the scale, scope and experience needed to meet the IT services needs of the marketplace. At the same time, CGI offers the intimacy of a client-focused operation that continuously delivers successful outcomes.

CGI's Canadian-based IT security lab—one of only three in the country—offers the advantages of Canadian evaluations through a faster certification process, time zone proximity to US markets, and cost savings. Discover why CGI is becoming the vendor of choice to help with industry leaders' evaluations and certifications.

### What makes us a partner of choice

- **Client satisfaction:** CGI's ISO-9001:2004-certified Client Partnership Management Framework continuously engages clients in the successful delivery of their projects.
- **Efficiency and excellence:** Canadian evaluations are recognized internationally for being highly effective. CGI's approach leverages close relationships with clients and certification bodies to deliver successful, on-time evaluations.
- **Global scale with responsive service:** CGI's global IT services and expertise in both systems integration and outsourcing provide a deep talent pool and expertise from which to draw upon. At the same time, CGI's lab is known for its client commitment and technical depth, building repeat business from clients who share a leadership position in the industry. We believe responsiveness is key to a positive experience.

### Advantages of Canadian Common Criteria evaluations

The Canadian Common Criteria scheme in which our lab operates offers several advantages for our clients.

- **No certification body charges:** Canada's certification body does not charge. In other jurisdictions a surcharge is imposed on labs and those charges are passed on to the client.
- **Quicker and more efficient certification:** The Canadian scheme features phased reporting throughout the course of evaluations. This ensures that the certification body is fully aware of findings and verdicts by the time a final evaluation report is submitted. Due to this supervision and monitoring by the certification body throughout the process, quick certification decisions are the norm and rework and retesting are rare.
- **Flexibility and stability:** Canada was one of the original six charter members of Common Criteria and, since 1995, has been a full partner in the FIPS-140 Cryptographic Module Validation Program with the US National Institute of Standards & Technology (NIST). Canadian certification bodies are known for the maturity and stability of their schemes, as well as their flexible approach to industry requirements.

### Our services

Let CGI be your partner of choice for the testing and accreditation of your systems and software. Services include:

- Common Criteria evaluations up to and including EAL4+
- FIPS 140 cryptographic module validations
- Interac payment device (PED, EPP) certifications
- PCI PTS consulting
- Vulnerability assessment
- Penetration testing
- Forensics, including evidence grade lock-ups
- Prototype testing and analysis, such as hardened service designs
- Assurance continuity

### Our commitment to you

CGI is committed to our clients. As a major industry player with global reach, we bring technical depth to resolve any issues. Our lab is built upon repeat business from satisfied clients who are also leaders in our industry.

Let us put our high-quality, efficient evaluation services to work for you.

### COMPANY PROFILE

At CGI, we're in the business of satisfying clients by helping them win and grow. For more than 30 years, we've operated upon the principles of sharing in clients' challenges and delivering quality services to address them.

As a leading IT and business process services provider, CGI has a strong base of 31,000 professionals operating in more than 100 offices worldwide, giving us the competitive advantage of close proximity to our clients. Through these offices, we offer local partnerships and a balanced blend of global delivery options to ensure clients receive the optimal combination of value and expertise required for their success.

We define success by helping our clients achieve superior performance and gain competitive advantage.
