

Enterprise Intelligence360™

PROOF POSITIVE

CGI has helped more than 50 state and local governments transform their data into enterprise intelligence, including:

- Commonwealth of Kentucky
- State of Iowa
- State of Alaska
- State of Alabama
- New York City, New York
- Los Angeles County, California
- Maricopa County, Arizona
- Wake County, North Carolina
- Baltimore County, Maryland

GOVERNMENT BUSINESS INTELLIGENCE BENEFITS

By partnering with CGI for Enterprise Intelligence360, tax and revenue departments can improve efficiency, increase collections, reduce fraud, and improve the overall customer experience.

Additionally, with Enterprise Intelligence360, Medicaid agencies can improve the exchange of critical information between departments, more effectively process and analyze claims, improve reporting, and reduce fraud; leading to better quality and more efficient services.

TRANSFORM DATA INTO ENTERPRISE INTELLIGENCE

State and local governments are looking to the vast pools of data stored online to drive effective tracking, analysis, reporting and decision making. The fact that this data resides in hundreds of disparate systems across the enterprise has governments asking, “How can I leverage this information to achieve my goals?”

Do these challenges sound familiar?

- No complete view of information
- Multiple data repositories and inaccessible information
- Data quality
- Data security

CGI's AMS Advantage® Program is committed to overcoming these challenges with Enterprise Intelligence360. Designed to support the unique needs of government, Enterprise Intelligence360 delivers a powerful combination of industry-leading Business Intelligence (BI) tools and best practice services to integrate disparate enterprise applications into a single, unified information system for a complete departmental and enterprise BI solution.

The result is end-to-end information access that reduces the search for data and improves visibility into daily operations. With reporting and analysis tools drawing from all databases, legacy systems, and new applications across the enterprise, governments increase productivity, measure performance, reduce operating costs, and identify potential revenue.

A better way to access and manage enterprise information

CGI delivers a best-in-class solution for building data warehouses, reporting and analysis, visual, interactive dashboards, and transparency portals. Additionally, Enterprise Intelligence360 provides best practice design, development, delivery, support and hosting services. The solution allows governments to transform data in ERP, databases, data warehouses and other legacy systems into a single source of trusted information, in order to:

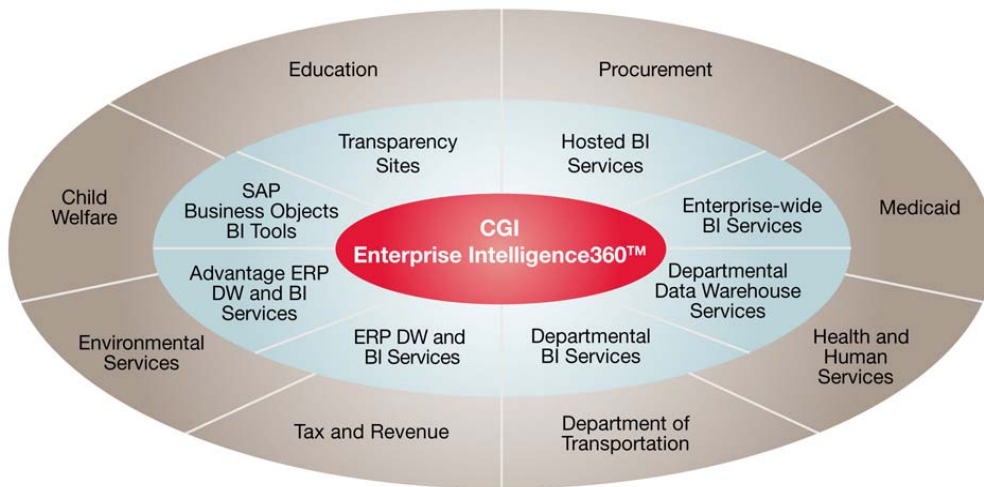

- Link agency performance to budget
- Increase accuracy and timeliness of financial reporting
- Increase transparency and accountability
- Reduce operating costs and increase revenue
- Optimize procurement lifecycle reporting

Industry-leading tools combined with proven results

CGI delivers a comprehensive solution to transform enterprise data into enterprise intelligence with Enterprise Intelligence360. CGI delivers industry-leading government BI solutions and technologies, including:

- Enterprise Intelligence360 Reporting Package, including Dashboard and Crystal Reports
- Citizen and supplier portals
- CAFR reporting
- Government data warehouses and data marts
- Mobile BI applications

For example, our government BI solution leverages an ERP data warehouse with key reporting entities, database, universes, and analytics for a single view of information from heterogeneous ERP systems. Visual and interactive dashboards increase visibility into budget and performance management and provide the foundation for transparency portals.

CGI uses our best practices, experience, and proven state and local government delivery methodology for project planning and management, BI and data warehouse application design, development, deployment planning, implementation and support. This includes implementing SAP BusinessObjects applications and a BI framework to address unique client reporting and performance management needs. In addition, when shrinking budgets and staffing challenges are an issue, CGI provides cost-effective and flexible alternatives with hosted BI services.

Contact us today to learn how CGI and Enterprise Intelligence360 can turn your data into enterprise intelligence so you can get back to the business of government.

CORPORATE PROFILE

CGI is a leading IT and business process services company with 31,000 professionals operating in 125+ offices worldwide.

We deliver built-for-government IT solutions that maximize revenue while minimizing costs. As a full-service systems integrator and managed services provider, CGI has the industry know-how, tools and technologies to address business challenges across the public sector spectrum.

CGI provides federal, state and local governments with creative IT solutions that drive efficiency, effectiveness and cost containment—all while achieving your short-term needs and maintaining your long-term vision.
