Insurance Information Services

The CGI Advantage

CGI is Canada's largest supplier of electronic information to the property and casualty insurance industry and the fifth largest independent information technology services provider in North America.

With a client base of more than 100 insurers and 4,000 brokers, virtually every insurer in the P&C industry relies on us to deliver the information it needs to generate more premium dollars, minimize risks and reduce administrative expenses.

Our clients take advantage of:

- Access to more than 40 million P&C claims and policy records spanning more than 15 years for both personal and commercial lines. Our database is the largest in Canada.
- Access to all of the information necessary for underwriting and claims handling. State-of-the-art technologies for accessing information, including the Internet and Global API (Application Program Interface).
- Extensive distribution relationships with provincial ministries, police services and leading suppliers of third-party electronic information.
- Access to automated tools to help standardize and streamline processes.
- Access to a full range of services, including management and IT consulting, systems integration, and management of IT and business functions. Our knowledgeable and dedicated team works with you to develop and implement IT-oriented solutions to meet your business and technology challenges.

The right information at the right time

Automobile Claims History

Using only a driver's license or policy number, our AutoPlus product provides detailed automobile claims and policy information. This system also offers seamless access to MVRs and VINLink Plus, a vehicle identification number decoding system.

Motor Vehicle Records

Motor Vehicle Reports supply current driving records and histories. We maintain distribution relationships with Ministries in Ontario, Quebec, Alberta and the Atlantic provinces and process about five million MVRs annually. This makes us the leading supplier of MVRs to the Canadian property and casualty insurance industry. MVRs are available immediately or on an overnight basis, depending on your province.

The right information at the right time

MVR Predictor

MVR Predictor is a statistically sound scoring tool that capitalizes on the predictive nature of claims history and credit bureau information. This tool gives insurers the opportunity to lower MVR expenditures by reducing the number of MVRs purchased. For ease of use, MVR Predictor is integrated into CGI's MVR ordering system.

On-line Police Reports

CGI's Police Reporting On-line System (PROS) allows on-line retrieval of accident and occurrence reports from various Ontario police services.

VIN Reports

Our VIN Claims Gold service minimizes the risk of fraud by providing complete coverage and claims information for a vehicle based on the vehicle identification number.

Driver Performance Records

Driver Performance Records are a cost-saving alternative to traditional Motor Vehicle Records. Available in Ontario, these reports provide a one-year snapshot of a driver's record and the cost is nominal if the record is clean.

License Plate Reports

CGI's Plate Search allows retrieval of registered owner and vehicle information with only a license plate number. Our claims customers traditionally use this cost effective tool to assist in adjudicating third-party claims.

Personal Property Claims History

Our Habitational Insurance Tracking System (HITS) provides on-line access to historical personal property claims information for all regions of Canada. With the recent addition of HITS Valuations, which provides instant access to replacement cost and construction information, and the forthcoming launch of HITSPlus, a risk scoring tool, insurers have access to all of the principal data required to underwrite a habitational risk.

Commercial Property Claims History

CGI's Commercial Tracking System (CTS) provides on-line access to commercial claims information for all regions of Canada.

Personal and Commercial Credit Reports

We offer quick access to detailed personal credit information from Trans Union and commercial credit information from Dunn & Bradstreet.

CGI at a glance

CGI clients around the world gain the advantage of knowledgeable, dedicated partners working to develop and implement IT oriented solutions for business and technology challenges.
