Horizon™ Overview

THE CGI ADVANTAGE

CGI provides a wide range of services and solutions designed to generate bottom-line results for the oil and gas industry. We serve more than 450 petroleum companies and trust management organizations worldwide. Our enterprise software solutions, information management consulting and business process outsourcing services help you improve and integrate the processes vital to the management of your information assets — land, production and financial accounting.

Our expertise is based on an unsurpassed concentration of technical and financial resources dedicated to designing petroleum management solutions based on best industry practices; scalable solutions that take growth and future needs into account; and more than 25 years of oil and gas experience.

Our expertise ensures success —from implementing software, to delivering solutions in an ASP environment, to performing non-core back office accounting functions.

CGI Horizon™, an enterprise solution, helps you capture and administer financial, operational and lease data smoothly, quickly, and accurately —across the whole organization. It addresses joint venture accounting and budgetary requirements of petroleum and trust organizations with a comprehensive suite of Internet solutions, ensuring regulatory compliance and providing controls consistent with your organization's practices and policies. Information is delivered as seamlessly integrated, richly formatted and highly interactive Web pages, allowing users to interactively analyze information.

Get information where it's needed, when it's needed — and make better business decisions, even in complex multi-company, multi-site environments.
