The CGI advantage

CGI provides a comprehensive range of services and solutions designed to generate measurable bottom-line results for the oil and gas industry. We currently serve more than 700 petroleum companies and trust management organizations world wide. Our enterprise software solutions, information management consulting services and business process outsourcing services help you to improve and integrate the processes vital to the management of your assets—land, production, marketing and financial accounting information.

Our oil and gas expertise is based on:

- An unsurpassed concentration of human, technical and financial resources dedicated to designing petroleum management solutions based on best industry practices;
- A critical mass of more than 250 experts to effectively meet the specific needs of upstream petroleum organizations;
- Scalable solutions that take growth and future needs into account; and
- More than 20 years of oil and gas experience.

Our expertise ensures the success of all your projects—from implementing software designed by our experts, to delivering solutions in an ASP environment, to performing non-core, back office accounting functions.

Your business is complicated. Are you efficiently valuing your oil run tickets?

CGI Horizon First Purchaser provides an efficient method for tracking and valuing your oil run tickets. This workflow system will automatically record sales volumes into the CGI Horizon Revenue Distribution application, eliminating redundant data entry from your staff's responsibilities. Based on the latest IBM technology, CGI Horizon is a fully Web-enabled ERP solution that meets the needs of Fortune 500 companies, yet remains affordable for the small to mid-sized company. Consisting of more than 20 individual business applications, the modules can be deployed as an integrated system across your enterprise or as stand-alone applications in departmental areas.

Benefits

- Simplify data entry through use of standardized template screens
- Reduce crude purchasing administrative staff with a sophisticated workflow system that minimizes data entry requirements
- Ensure compliance with government reporting requirements
- Gain an enterprise system that can grow as your company grows

Features

- Tracks and values oil run tickets
- Maintains general property information, affiliated tanks, pricing tables and date effective operators, revenue divisions of interest and revenue property taxes from one location
- Stores date effective pricing tables sensitive to geographic area and product type
- Allows for various pricing methods, including average, highest of group, equal daily quantity, latest pricing, normal pricing and window pricing
- Maintains and processes volume-sensitive premiums and gravity adjustments
- Produces various control reports, including purchaser statements for crude sales, crude oil sales reports, property pricing lists and listings of netted ticket transactions
- Produces state and federal regulatory reports

**Your business is complicated.
Are you efficiently valuing your oil run tickets?**
