Horizon™ Land

THE CGI ADVANTAGE

CGI provides a wide range of services and solutions designed to generate bottom-line results for the oil and gas industry. We serve more than 450 petroleum companies and trust management organizations worldwide. Our enterprise software solutions, information management consulting and business process outsourcing services help you improve and integrate the processes vital to the management of your information assets — land, production and financial accounting.

Our expertise is based on an unsurpassed concentration of technical and financial resources dedicated to designing petroleum management solutions based on best industry practices; scalable solutions that take growth and future needs into account; and more than 25 years of oil and gas experience.

Our expertise ensures success—from implementing software, to delivering solutions in an ASP environment, to performing non-core back office accounting functions.

Land. It's the heart of an oil and gas company's business, but managing it is not always easy. That's where CGI Horizon™ Land comes in. You need a lease records system that provides the land professional with a powerful, highly scalable, easy-to-use system that will increase productivity and decrease land management costs. CGI Horizon™ Land provides quick answers to the most complex issues of land management. Whether you are performing a comprehensive analysis of a prospect, or just need quick access to basic lease information, CGI Horizon™ Land can help you gather complete information. Just as important, you can organize your files the way you want to, right on your desktop.

Benefits

- Improve workflow and reduce duplication of effort
- Ensure data is only changed by selected users through built-in security devices
- Improve productivity by empowering land personnel with ready access to the data and processes needed to administer leases
- Ensure consistency of corporate information across departments through integration with CGI Horizon™ accounting and production applications
- Provide source of lease and leasehold ownership information needed by departments within a company
- Aid management in budget planning with key reports

Features

- Simplifies data entry through use of standardized screens called templates
- Numbers leases, contracts and mineral deeds automatically, if desired
- Integrates with CGI Map to create acreage position maps with land data
- Scans and stores documents associated with leases, minerals and contracts
- Stores tracts for both surface and subsurface ownership variations
- Creates custom reports through the powerful inquiry and reporting system
- Allows the user to make changes on a number of records at one time
- Maintains information regarding a prospective lease purchase prior to the leases becoming part of the company's acreage inventory, which can then be transferred over to an active lease when the deal is finalized
- Processes rental, minimum royalty, shut-in and other types of land payments

Deployment Options

Client	Microsoft Windows 2000 and XP
Server	IBM System i
Database	Client or Citrix Server
Connectivity	Web Browser over TCP/IP
