Horizon™ Production

THE CGI ADVANTAGE

CGI provides a wide range of services and solutions designed to generate bottom-line results for the oil and gas industry. We serve more than 450 petroleum companies and trust management organizations worldwide. Our enterprise software solutions, information management consulting and business process outsourcing services help you improve and integrate the processes vital to the management of your information assets — land, production and financial accounting.

Our expertise is based on an unsurpassed concentration of technical and financial resources dedicated to designing petroleum management solutions based on best industry practices; scalable solutions that take growth and future needs into account; and more than 25 years of oil and gas experience.

Our expertise ensures success —from implementing software, to delivering solutions in an ASP environment, to performing non-core back office accounting functions.

CGI Horizon™ Production tracks production and sales volumes from the source. This application will allow you to record production volumes in the way that best suits your business. Run tickets, purchase statements, well tests, and other production information can be entered on a daily or monthly basis. One of its most important uses is producing OGOR 4054 forms and a variety of state regulatory reports.

Production volume allocations at multiple levels can be performed by the system, freeing your staff to concentrate on other tasks. Allocations are based on check meters, well test theoretical volumes, or both. The system helps you make quick business decisions based on current daily drilling information and completion activity maintained in the daily drilling module.

Benefits

- Ensure consistency of corporate information across departments through integration with CGI Horizon™ accounting and land applications
- Ensure compliance with government reporting requirements
- Gain an enterprise system that can grow as your company grows

Features

- Handles simple and complex daily and monthly production allocations
- Allocates deliveries, sales or shrinkage back to original completions through a date sensitive network structure
- Provides reserves information to the CGI Horizon™ Depletion application
- Sends production volumes to the CGI Horizon™ Contractual Allocations and Pricing application for volume allocations, automatic valuation, and direct input into the CGI Horizon™ Revenue Distribution application
- Sends production volumes to the CGI Horizon™ Gas Balancing, Management Reporting and Lease Profit Control applications
- Exchanges data electronically with a variety of PC-based field data entry systems, marketing systems, and economic reserves systems, reducing data entry time
- Tracks volumes on a daily or monthly basis
- Allocates volumes associated with tank cleanings, lease use gas or injected volumes

Features, continued

- Stores information for tank strappings, meters, completions, networks and pumps
- Records oil, gas and water dispositions, run tickets and injections
- Validates and proofs data entry prior to posting to the database
- Includes OGOR 4054 and state regulatory reports for Alabama, Arkansas, California, Colorado, Louisiana, Mississippi, Montana, Nebraska, New Mexico, North Dakota, Texas, Utah and Wyoming
- Maintains daily drilling information
- Prices and taxes oil run tickets
