## PetroComp Land

### THE CGI ADVANTAGE

CGI provides a wide range of services and solutions designed to generate bottom-line results for the oil and gas industry.

We serve more than 450 petroleum companies and trust management organizations worldwide. Our enterprise software solutions, information management consulting and business process outsourcing services help you improve and integrate the processes vital to the management of your information assets — land, production and financial accounting.

Our expertise is based on an unsurpassed concentration of technical and financial resources dedicated to designing petroleum management solutions based on best industry practices; scalable solutions that take growth and future needs into account; and more than 25 years of oil and gas experience.

Our expertise ensures success —from implementing software, to delivering solutions in an ASP environment, to performing non-core, back office accounting functions.

CGI PetroComp Land is a sophisticated, yet easy-to-use system for managing your oil and gas leases and other fee properties. Designed to accommodate the small to mid-sized organization, the system tracks all lease-related information, including rental payments, shut-in status and obligations. You can maintain extensive information for prospects, leases, tracts, contracts and properties.

CGI PetroComp is fully integrated with the Microsoft Business Solutions Solomon IV financial system to provide a total enterprise solution that can be scaled to meet customers' business and technology requirements.

### Benefits

- Gain enterprise efficiencies through CGI PetroComp with accounting, land, production and economics integration
- Access a library of tools that will increase productivity, decrease land management costs, and provide quick answers to complex land management issues

### Features

- Allows for freeform remarks, multiple tracts per lease with multiple depths, obligations by tract, multiple counties, map references, partners and payees information as well as payment and billing history by lease/tract
- Provides complete automatic payment capabilities
- Includes rental notification, reports, rental calendars and budgets, inquiry letters, checks, check registers and 1099s
- Allows tracking of all lease-related documents and associated obligations through a comprehensive contract module
- Includes copy and paste functions to move information to or from a word processing document, Excel spreadsheets or an Access database
- Includes lease data sheet, acreage inventory, lease list and summary, reference map, producing acreage summary, expiring leases, obligation schedule, payment projection, relinquished leases and contract summary reports
- Integrates with CGI Map giving users the ability to display and/or print maps showing acreage positions utilizing land data

## Features

- Provides a quick route to locating an unknown lease through quick query feature
- Links lease/tracts, contracts, producing properties and prospects
- Allows you to develop your own lease data sheet and Exhibit "A" through custom reporting capabilities

## Deployment Options

Client	Microsoft Windows 2000 and XP
Server	Microsoft Windows 2000
Database	Microsoft SQL Server 2000
Connectivity	In-house and via Internet via Terminal Server
