PetroComp PEEK

THE CGI ADVANTAGE

CGI provides a wide range of services and solutions designed to generate bottom-line results for the oil and gas industry. We serve more than 450 petroleum companies and trust management organizations worldwide. Our enterprise software solutions, information management consulting and business process outsourcing services help you improve and integrate the processes vital to the management of your information assets — land, production and financial accounting.

Our expertise is based on an unsurpassed concentration of technical and financial resources dedicated to designing petroleum management solutions based on best industry practices; scalable solutions that take growth and future needs into account; and more than 25 years of oil and gas experience.

Our expertise ensures success —from implementing software, to delivering solutions in an ASP environment, to performing non-core, back office accounting functions.

CGI PEEK is a petroleum economic evaluation package that provides information needed to make tough decisions for acquisitions and divestitures, exploration prospect analysis, finance and leverage comparisons, reserve estimates, budget forecasts and risk expected value analysis. CGI PEEK is integrated with the CGI PetroComp oil and gas system to provide a total enterprise solution that can be scaled to meet your business and technology requirements.

Benefits

- Gain enterprise efficiencies through CGI PetroComp with accounting, land, production and economics integration
- Achieve seamless integration between technical reserves, economic reserves, decline analysis and gas material balance through tight integration with the CGI Preview reserves management and decline analysis systems.

Features

- Provides for production scheduling, ownership interests, economic parameters and capital expenditures
- Simplifies data entry with default values
- Fits reserves to an estimated economic production life through flexible production scheduling module
- Models multi-well development programs
- Allows easy selection of appropriate decline for your project using on-screen graphical decline analysis system
- Models expense-related volumes for water production, lease use fuel and injected fluids with multi-phase or manual scheduling
- Accommodates various working and revenue interest situations
- Allows scheduling of operating costs, prices, overhead and other expense items using a variety of forecasting methods
- Tracks investments on a gross or net basis

Features

- Features complete tax calculations, with rigorous treatment of production taxes, ad valorem taxes and state and corporate income taxes
- Tracks monies borrowed using Finance & Leverage feature
- Analyzes the expected value of a project
- Provides standard and customizable reports
- Retrieves data from Dwight's as well as many other production data providers
