PetroComp™ Production

THE CGI ADVANTAGE

CGI provides a comprehensive range of services and solutions designed to generate bottom-line results for the oil and gas industry.

We serve more than 450 petroleum companies and trust management organizations worldwide. Our enterprise software solutions, information management consulting services and business process outsourcing services help you to improve and integrate the processes vital to the management of your information assets — land, production and financial accounting.

Our expertise is based on an unsurpassed concentration of human, technical and financial resources dedicated to designing petroleum management solutions based on best industry practices; scalable solutions that take growth and future needs into account; and more than 25 years of oil and gas experience.

Our expertise ensures the success of all your projects—from implementing software designed by our experts, to delivering solutions in an ASP environment, to performing non-core, back office accounting functions.

Your production accounting and control is your cash register. If unattended, you could lose cash receipt revenues and improperly pay owners. Utilize the CGI PetroComp Production Management application to automate your processes and free critical resources for value-added assignments. Our system will improve the accuracy of your data and expedite your month-end closings.

CGI PetroComp is a comprehensive, Microsoft-Windows-based production application designed specifically for small to mid-sized oil and gas companies in need of better management, government reporting, gas plant settlement, or first purchaser processing and reporting. The suite is fully integrated with the Microsoft Dynamics® SL financial system to provide a total enterprise solution that can be scaled to meet their business and technology requirements.

Benefits

- Gain enterprise efficiencies through CGI PetroComp with accounting, land, production and economics integration
- Ensure compliance with government reporting requirements (local, state and federal)

Features

- Automates all aspects of managing daily and monthly production, reconciling purchaser tickets and purchaser statements, producing drilling reports, generating management reports and fulfilling regulatory reporting requirements
- Captures raw data right off the run ticket, gauge sheet, meter and/or statement
- Corrects and adjusts to allocate price and report the volumes and values for oil and gas production
- Includes Texas, Louisiana, New Mexico, Nebraska and other states, OGOR and MMS regulatory reports
- Facilitates gas plant processing by accepting gas meter volumes, gas analysis data and plant delivery definitions to allocate natural gas
- Allocates production volumes and sales revenue from the measurement point to the producing wells

Deployment Options

Client	Microsoft Windows XP and Vista
Server	Microsoft Windows Server 2003 / 2008
Database	Microsoft SQL Server 2005 / 2008
Connectivity	In-house and via Internet via Terminal Server
