Horizon™ TEAM

THE CGI ADVANTAGE

CGI provides a wide range of services and solutions designed to generate bottom-line results for the oil and gas industry. We serve more than 450 petroleum companies and trust management organizations worldwide. Our enterprise software solutions, information management consulting and business process outsourcing services help you improve and integrate the processes vital to the management of your information assets — land, production and financial accounting.

Our expertise is based on an unsurpassed concentration of technical and financial resources dedicated to designing petroleum management solutions based on best industry practices; scalable solutions that take growth and future needs into account; and more than 25 years of oil and gas experience.

Our expertise ensures success—from implementing software, to delivering solutions in an ASP environment, to performing non-core back office accounting functions.

There are a number of regulatory requirements that come into play with the inception of a property or a lease. Not only are there multiple, critical checklists along the way, but the process also involves a number of departments, significantly increasing the chance for errors, missed deadlines and lost business.

Meet CGI Horizon™ TEAM—a web-based division order tracking system that brings all your team members closer together, giving you greater efficiency, higher accountability and improved customer relations. CGI Horizon™ TEAM is a comprehensive business solution for energy and trust management companies that provides accurate, time-critical information needed for revenue distribution, partner billing and reserves forecasting. CGI Horizon™ TEAM facilitates setup, approval and maintenance of effective, dated ownership and includes a full complement of forms for your convenience. CGI Horizon™ TEAM can be implemented as an integrated module of CGI Horizon™ or with other ERP systems.

Benefits

- Bring your “Team” together and gain higher accountability and improved customer relations
- Improve property administration workflow and departmental efficiencies through integration with your existing ERP system
- Meet critical obligations and target dates by keeping all departments on the same page

Features

- Monitors every phase of the process – from the initial date of asset development to the completion of the asset
- Performs changes of title ownership
- Maintains producing property division order and joint interest ownership
- Manages division order interests for producing properties and operating interests (gross working interests) for producing and non-producing properties
- Prepares division order and transfer order forms ready for signature
- Supports multiple division orders and tracts per property

Features, continued

- Prints NADOA and customized company division order forms and exports producing property and division order data to spreadsheet applications
- Performs date-sensitive tract allocations
- Sends timely reminders via e-mail notification
- Calculates net revenue interest by date and fraction to decimal interest
- Supports all types of suspense conditions
- Links property records, division orders, leases and contracts

Deployment Options

Client	Microsoft Windows 2000 and XP
Server	IBM System i
Database	DB2
Connectivity	Web Browser over TCP/IP
Application Service Provider	Accessible over any Internet connection to CGI ASP Center
Business Process Outsourcing	Solution used in CGI BPO Center

CORPORATE PROFILE

At CGI, we're in the business of satisfying clients. For more than 30 years, we've operated upon the principles of sharing in our clients' challenges and delivering quality services to address them. As a leading IT and business process services provider, CGI has approximately 26,000 professionals operating in 100+ offices worldwide, giving us the competitive advantage of close proximity to our clients.

Through these offices, CGI offers local partnerships and a balanced blend of global delivery options—including onshore, nearshore and offshore expertise—to ensure clients receive the combination of value and expertise they require.

CGI defines success by exceeding expectations and helping clients achieve superior performance.
