

EHS Management Solutions

THE CGI WAY

CGI has developed an innovative, flexible and personal approach to providing services. We structure each relationship to meet our client's unique business goals and build in flexibility to meet current and future needs.

CGI provides end-to-end IT services that include hosting, application management, systems integration and business consulting. CGI employs a compelling global delivery model that facilitates the delivery of cost-effective IT solutions. Clients choose from a palette of offerings to create the onsite, offsite, nearshore and offshore combination that give them the savings, efficiencies and control that they want.

To each client relationship we bring quality and a delivery track record, flexible and accountable partnerships, and industry depth and expertise.

DELIVERING QUALITY EH&S IT PRODUCTS AND SERVICES

At CGI, we understand it's how we deliver our services that make us a partner of choice. Our business approach offers clients the expertise and accountability they desire at the value they need.

Governments and businesses around the world are faced with extraordinary challenges when it comes to ensuring the safety of their workers; issuing, harmonizing or complying with environmental regulations; and controlling the manufacturing and handling of hazardous material. CGI's portfolio of software solutions is well positioned to address these challenges head-on.

CGI has a 30-plus year history of providing enterprise services and solutions to help organizations identify, monitor, regulate and respond to threats to human health and safety and to the environment.

We have key offerings in the following areas:

- Health & Safety Management
- Enterprise Regulatory Management
- Chemical Inventory Management
- Hazard Communication
- Product Stewardship
- Environmental Monitoring and Assessment
- EHS Software Development and Commercialization
- eGovernment Portals
- EHS Consulting

CGI has helped leading organizations such as 3M, ExxonMobil, and the New Jersey Department of Environmental Protection implement effective EHS information management strategies and solutions that improve their compliance posture and their bottom line. These solutions help government and industry identify, monitor, regulate and respond to threats or risks to human health, worker safety, and the environment.

More than ever before, the management of environmental, health and safety issues is becoming a fundamental aspect of the industrial, manufacturing and regulatory sectors. In recent years, the regulatory environment has increased in complexity and global initiatives such as the Globally Harmonized System of Classification and Labeling of Chemicals are redefining the regulatory landscape. Meeting regulatory requirements in a global and highly competitive marketplace has never been more challenging.

Software solutions for industry

CGI's portfolio of EH&S Solutions provides enterprise EH&S IT solutions that help clients around the world identify, monitor, regulate and respond to threats or risks to human health, worker safety and the environment.

- **ProSteward®** consists of six related applications that allow companies to create and distribute hazard communication materials to comply with regulatory and business requirements.
- **ProSteward Online** is a hazard communication and chemical inventory management and reporting system.
- **Exposure Assessment System (EAS)** is a web-based health risk management system that helps organizations manage employee health risk exposures.
- **IQx™** is a dynamic reporting tool that seamlessly integrates with commercial EHS software solutions and corporate databases to provide key metrics and trend analysis

Software solutions for government

For more than two decades, CGI has partnered with federal, state and local environmental protection agencies across the United-States to develop leading-edge enterprise solutions that streamline and standardize the business of regulating the environment.

- **TEMPO®** is the industry-leading back office enterprise permitting, compliance and enforcement system for regulatory agencies.
- **Regulatory Services Portal (RSP)** is CGI's front office portal solution that supports complex environmental transactions between government and industry.
- **COMPASS** is an enterprise-wide solution for organizations involved in any aspect of environmental monitoring.
- **Data Exchange** is a framework for XML-based data exchange to support industry-to-government, citizen-to-government and government-to-government data exchange.

Managed Services Solutions

To reduce day-to-day management complexity and optimize their operations, CGI provides clients with complete end-to-end managed services solutions.

- **Technology hosting** provides 24/7/365 global operations support from our state-of-the-art data centers and application management centers
- **Application management** services incorporate both system maintenance as well as system upgrades, through affordable long-term maintenance plans.
- **Systems integration and development** provide complete system design, development and integration services to build tailored EHS applications that integrate with your existing legacy systems.
- **EHS consulting** is delivered by CGI's certified professionals in environmental, industrial hygiene and safety to help clients perform training and audits and to assist in regulatory reporting.
