CGI Edge™ Analytics

**YOUR EDGE FOR
ANALYTICS AND REAL-TIME
ACCESS TO DATA**

Bring the Power of Data to your Business Decisions

CGI Edge Analytics combines conceptual, logical, and physical models that represent the business needs of all property and casualty insurance companies.

Features of the CGI Edge Analytics Model:

- An open architecture allows access to data from a variety of applications
- The design is scalable and flexible to adapt to the changing needs of your organization
- The model is insurance-focused, providing key premium and loss business information

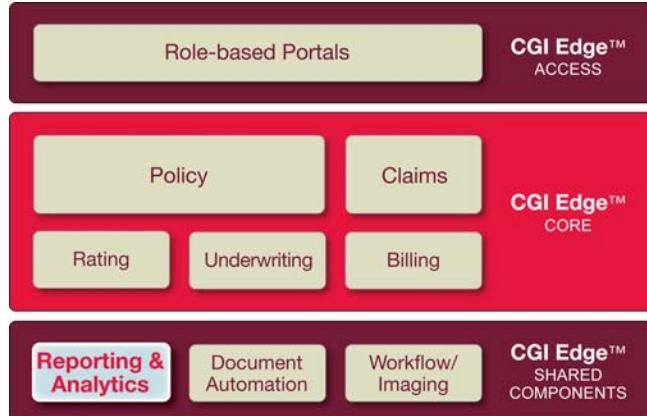

About CGI Edge

CGI Edge is a robust, flexible insurance administration system offered by CGI on both a licensed and application service provider basis. CGI Edge provides modules for managing policy, claims, premiums, reinsurance, commissions and producers for all facets of the property/casualty industry.

LEADING-EDGE TECHNOLOGY WITH BEST-IN-CLASS FUNCTIONALITY

CGI Edge™ Analytics provides a winning combination of leading-edge technology to give you access to the data you need to run your business. Using the CGI Edge Analytics component, you can easily access the data you need to run your business.

CGI Edge™ offers powerful, user-friendly functions for the full insurance lifecycle. As its integrated reporting and analytics environment, CGI Edge Analytics component provides powerful features helping you to access and analyze the data you need to maintain your competitive edge. The components work together seamlessly to make your processing more efficient, accurate, and productive.

Benefits

- CGI Edge Analytics provides an intuitive and integrated solution. Its zero footprint, web-based presentation requires no software loading, and the user interface requires little or no training. Reports are available to users as soon as source information is updated, and the security system guarantees that users see only pertinent information. Your cost to collate and distribute reports is eliminated, and reports can be customized to the individual user or to specific groups of users.
- Libraries of reports are included specifically for the insurance industry to leverage the most current industry standards. CGI Edge Analytics offers a complete and configurable tool-set to adhere to companies' specific lines of business, and the model is insurance-focused, providing premium, loss, and all other key business information.
- Enhanced access to information. Reports consolidate information from otherwise disparate systems into a single reconciled source, thus eliminating the possibility of conflicting reports when using multiple data sources.

System Capabilities:

CGI Edge Analytics

Insurance professionals know that managing an ever-changing market and engaging the competition within the insurance industry requires powerful business intelligence and reporting tools. CGI Edge Analytics provides a powerful, easy-to-use tool set that is fully integrated with CGI Edge and gives insurance professionals the capability to make accurate, timely, and effective business decisions.

Accurate decision-making available on demand

CGI Edge Analytics is a tool set that allows insurance companies to employ multiple reporting components in addressing their information needs (such as reducing claim costs, identifying revenue opportunities, and increasing profitability). Analytics accesses information stored in insurance-specific data marts, and uses this information to create, analyze, and distribute reports on demand. CGI Edge Analytics provides aggregated data which supports the creation of most annual statements, schedules, and bureau data calls.

Templates are created on demand, and all information and data that is contained and distributed emanates from a single, validated data source, thus guaranteeing accuracy and uniformity. CGI Edge Analytics facilitates access to data that provides answers to critical business questions, thereby improving overall organizational performance.

Delivering knowledge and power on demand

CGI Edge Analytics offers you the benefits of a secure, cost-effective means of distributing reports to executives and internal staff, as well as across the internet to agents, brokers, reinsurers, and other stakeholders in your organization. CGI Edge Analytics produces timely delivery of desired information in printer-friendly PDF format, without the need for software installation or training. CGI Edge Analytics provides your business with:

- Tools for accurate decision-making
- An intuitive and integrated solution
- Insurance-specific models
- Enhanced access to information
- Improved efficiency and resources

Operating environment

CGI Edge is an n-tier, service-based solution. The rich, browser-based client runs on any operating system supporting Internet Explorer 6 or 7. The web/application server runs on Windows Server 2003 and IIS6. Oracle 10g is used in the data tier.

For more information about CGI Edge or to schedule a personal demonstration, please contact CGI's insurance sales team at 1-800-433-2452 or via email at insurance@cgi.com.

CORPORATE PROFILE

At CGI, we're in the business of satisfying clients. For 30 years, we've operated upon the principles of sharing in our clients' challenges and delivering quality services to solve them.

A leading IT and business process services provider, CGI has approximately 27,000 professionals operating in 100+ worldwide offices, giving us close proximity to our clients. Through these offices, we offer local partnerships and a balanced blend of global delivery options to ensure clients receive the combination of value and expertise they require.

CGI defines success by exceeding expectations and helping clients achieve results.
