## CGI Edge™ Document Automation

### YOUR EDGE FOR DOCUMENT PRODUCTION

#### Simplify Document Production

With CGI Edge Document Automation, you can enable true straight-through processing, efficient operations, and the consistent results that you need.

#### Features

- Tablized configuration of the index and output order of the policy documents
- Automated sorting of policy documents by ZIP code
- Map, print, and produce large volumes of policies, billing and other documents

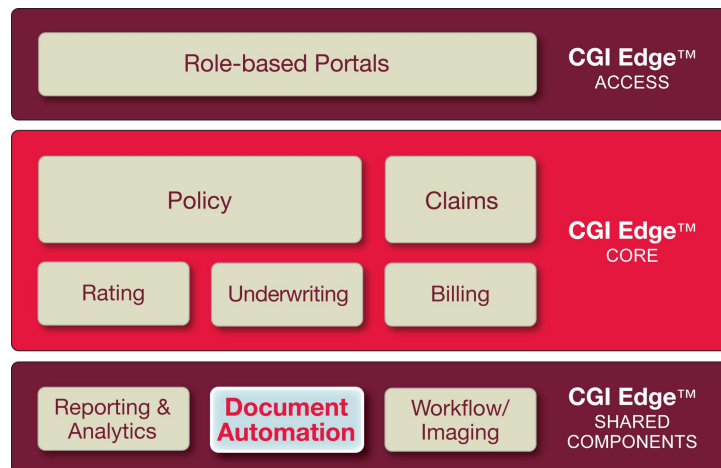

#### About CGI Edge

CGI Edge is a robust, flexible insurance administration system offered by CGI on both a licensed and application service provider basis. CGI Edge provides modules for managing policy, claims, premiums, reinsurance, commissions and producers for all facets of the property/casualty industry.

### LEADING-EDGE TECHNOLOGY WITH BEST-IN-CLASS FUNCTIONALITY

CGI Edge™ Document Automation provides a winning combination of leading-edge technology with industry-recognized best-in-class functionality. Using the CGI Edge Document Automation component, you can easily adapt to the changing marketplace, promote efficiency in your environment and put powerful tools in the hands of your users.

CGI Edge offers powerful, user-friendly functions for the full insurance lifecycle. As its integrated document production and print component, CGI's Edge Document Automation component provides powerful features that help you process efficiently and readily adapt to the marketplace. The components work together seamlessly to make your processing more effective, accurate, and productive.

#### Benefits

- Eliminate manual labor to assemble policy sets by printing a full policy set and instantly attaching all of the proper forms.
- Adapt easily to the marketplace by maintaining control of the index and output order of your policy sets through easy-to-use tables.
- Create efficiency by eliminating the manual task of sorting policy sets in ZIP code order to save postage.
- Save resources—time, postage, and manual labor expense.

## System Components:

### Document automation

The document automation component provides the ability to design, maintain and print all output requirements for an insurance company. This PC-based productivity tool gives users complete control over sorting, collating, and policy assembly.

You can modify system parameters, output options, endorsement exceptions, form letters, billing verbiage, and copies. CGI Edge Document Automation allows you to:

- Print billing statements with declarations
- Print double-sided or single-sided
- Control the agent's copy of the policy set
- Direct other functions like mailers, and change notices
- Provide special handling for your policy booklets
- Print long-form cancellation and non-renewal notices
- Print SR-22 and SR-26 financial responsibility forms
- Interface with an external imaging system
- Address real-world handling requirements that less experienced providers neglect. (For example: send all copies to agent; always send insured copy to agent; send new business (insured copy only) to agent; all new business copies to agent; special interest always to agent; agent billed—insured to agent; and agent billed—all to agent.)

### Policy print

Document automation creates policy sets with your combination of form letters, policy jackets, billing statements, declarations pages, policy forms, auto insurance cards or signature pages. You identify how a policy set is assembled for a given output type (agent, home office, insured, special interest).

### Billing statements

Document automation also creates billing statements. Any information in the system can be printed on the bill. Words and titles on bills are easily maintained without programming changes. For lien holders, document automation can automatically submit a bill to the mortgagee with a copy to the insured.

### Operating environment

CGI Edge is an n-tier, service-based solution. The rich, browser-based client runs on any operating system supporting Internet Explorer 6 or 7. The web/application server runs on Windows Server 2003 and IIS6. Oracle 10g is used in the data tier.

***For more information about CGI Edge or to schedule a personal demonstration, please contact CGI's insurance sales team at 1-800-433-2452 or via email at [insurance@cgi.com](mailto:insurance@cgi.com).***

## CORPORATE PROFILE

At CGI, we're in the business of satisfying clients. For 30 years, we've operated upon the principles of sharing in our clients' challenges and delivering quality services to solve them.

A leading IT and business process services provider, CGI has approximately 27,000 professionals operating in 100+ worldwide offices, giving us close proximity to our clients. Through these offices, we offer local partnerships and a balanced blend of global delivery options to ensure clients receive the combination of value and expertise they require.

CGI defines success by exceeding expectations and helping clients achieve results
