Business continuity solutions

Unanticipated business interruptions, whether caused by man-made threats or natural disasters, can devastate an organization. Safeguarding your business and its reputation by providing for the continuity of operations must become a top priority.

CGI's Business Continuity Solutions help identify, assess and develop your organization's policies and procedures for addressing operational risk. With our proven methodology, clients are assured proper contingency planning to reduce the likelihood and impact of disruptive events.

An enterprise approach to risk management

For every organization, managing risk is at the core of success. The coordinated, holistic identification, assessment and prioritization of risks contribute to a business continuity plan. A sound plan helps to establish policies and procedures to address potential threats, meet financial objectives, comply with audit and regulatory needs and increase an organization's ability to keep the business running, no matter the circumstance.

Our experienced team of consultants begins by assuming that a disruptive event will occur at some point in an organization's future. CGI's engagement framework emphasizes acquiring an in-depth knowledge of each organization's culture and unique needs. For business and technology executives, higher-level management visibility of the operational impact of business disruptions is currently driving a more intense focus on business continuity management.

CGI's four-phased approach also fosters accountability among an organization's leaders and the managers responsible for critical business processes as we help develop a sound and practical plan.

A partner you can depend on

CGI brings a proven track record of delivering a full suite of business continuity services and solutions across government, finance, energy, manufacturing and non-profits.

Using methodologies that meet international standards and guidelines, CGI's industry-certified team assists in defining a tailored, systematic and structured process. With this, clients are able to proactively prepare for and execute their continuity of business operations plans, the recovery of the supporting technological infrastructure and the stability of the operational environment to resume and sustain critical business activities.

Key benefits include:

- Protection of key assets and their value
- Preservation of important trust relationships with client and partners

CGI's experts provide a full suite of business continuity solutions to help clients prepare for tomorrow's events today.

- Balanced legislative and regulatory compliance
- Managed investments
- Increased service quality
- Focused holistic, enterprise-wide approach
- Tested and proven methodologies
- Balanced enterprise risk management
