

Solutions

Cloud computing

Until now, managing IT infrastructure has been about negotiating limits... limited processing power, capacity, bandwidth and time...and limited access to the talent to manage it all.

CGI's integrated Cloud Computing solutions offer freedom from limits. Designed to meet the most demanding enterprise and government requirements, we offer both infrastructure and software as a service, supported by consulting services to help you determine the right cloud computing approach to meet your business goals.

Freedom from limits

Available globally, CGI's Cloud Computing solutions free you from resource limits by giving you the power to design, provision and scale your infrastructure and applications as your business needs change in a highly secure, robust and flexible environment.

With 35 years as a full-service IT outsourcing and infrastructure services provider, CGI leverages industry best practices, proprietary processes and tools that help you reduce costs and drive innovation.

Results you can count on

When it comes to the introduction of any new technology, clients need secure, reliable services and predictable cost savings. Moving to the cloud is no different.

With its predictable pricing model, CGI's IaaS delivers cost-effective, on-demand access to computing resources, storage and network capacity. We've made significant investment in data centers and relevant technologies and provide hosting services for agencies and enterprises requiring high levels of security. And, our mature, proven governance framework manages risk, and ensures transparency and accountability.

CGI's track record of quality delivery is confirmed by our clients (Fiscal 2010 9/10 satisfaction score from 2,500 signed client assessments) and service level agreement metrics (over 98% exceeded or met).

With adaptable contract terms and length, moving to CGI's cloud transforms your IT budget from a capital intensive investment to a predictable operational expense.

CGI INTRODUCES A CLOUD GOVERNANCE MODEL

More and more organizations are looking at cloud computing to reduce costs and shorten time to market. The cost savings that cloud computing represents can be significant, and many organizations are set to embrace the model. However, the challenge will be how to manage services deployed in this new environment. CGI has introduced a Cloud Governance model that provides CIOs with visibility and control of the use of cloud services while providing cloud benefits to business and technical users.

CGI's unique cloud advantages:

- CGI's Enterprise Service Management provides organizations with the capability **to manage cloud service usage through personalized policies**
- **Unified Portal** provides users access to request, manage and use cloud services
- Use of leading infrastructure to **ensure performance and security**

More power to you

CGI's cloud computing solutions give you the power to design, provision and scale your environment through a flexible portal interface. Proven time and again against the toughest client requirements, our processes, governance and service levels combine to deliver the promised results that drew you to the cloud model in the first place.

A comprehensive portal provides a self-managed environment for superior control, transparency and accountability. Important to business and government alike, CGI's IaaS meets industry standards for security and data protection.

CGI has harnessed the cloud for clients in the public and private sectors as well as its own IT applications and infrastructure. Our powerful combination of solutions – focused entirely on meeting enterprise-grade requirements – is designed to successfully guide you into the cloud with confidence.

Need guidance? We know the terrain.

Understanding how to maximize the promise of cloud computing as you assimilate it into your current environment requires the expertise and guidance of a veteran, not an unproven upstart.

Deciding where and how cloud computing can benefit each area of your operation is a challenging task. CGI's cloud consulting services focus on creating a strategy based on client-specific priorities and opportunities. We work with you to develop a roadmap that will move your organization from pilot to production – helping you evaluate options including public clouds, private clouds, hybrid clouds, Infrastructure as a Service (IaaS), Platform as a Service (PaaS) and Software as a Service (SaaS) offerings.

With CGI, you'll get predictable results and the expert guidance to head into the cloud with a partner by your side.

CGI's powerful combination of solutions – focused entirely on meeting enterprise-grade requirements – is designed to successfully guide our clients into the cloud with confidence.

Our offerings

Our processes, governance, security and service levels are proven to meet stringent and demanding requirements.

- **CGI's Cloud Consulting Services** focus on creating cloud strategies based on client specific priorities and opportunities. We can help clients evaluate options and develop a strategy to begin realizing the promise of cloud immediately.
- **CGI's Infrastructure as a Service (IaaS)** delivers cost-effective, on-demand access to computing resources, storage and network capacity with a predictable pricing model. A comprehensive Unified Portal provides users access to request, manage and use cloud services. Our Cloud Governance model provides organizations with the capability to manage cloud service usage through personalized policies. CGI's IaaS meets industry standards for security and data protection.
 - Offerings include:
 - IaaS virtual computing resources
 - Laptop/Backup as a Service
 - Desktop as a Service
- **CGI's Software as a Service (SaaS)** takes our industry-leading proprietary applications and delivers them to you as a service, providing an especially cost-effective procurement method for clients with dynamic business environments. For example, our Trade360 SaaS offering ensures rapid delivery of services that help banks dramatically improve their financing options for their trade businesses.

9/10 satisfaction score
from **2,500** signed client
assessments

Among the lowest
attrition rates in the
industry – with **87%**
of professionals as owners

35+ years of long-term growth
with **31,000** professionals
in **125+** offices

Committed to world-class
service levels with over
98% exceeded or met

Rigorous project monitoring
resulting in **95%** on-time,
on-budget delivery

At CGI, we're in the business of satisfying clients by helping them win and grow.

Since our founding in 1976, we've operated upon the principles of sharing in clients' challenges and delivering quality services to address them. As a leading IT and business process services provider, CGI has a strong base of 31,000 professionals operating in 125 offices worldwide, giving us the competitive advantage of close proximity to our clients.

Through these offices, we offer local partnerships and a balanced blend of global delivery options to ensure clients receive the optimal combination of value and expertise required for their success. We define success by helping our clients achieve superior performance and gain competitive advantage.

We offer services to clients across the globe in the following areas:

- Infrastructure Services, Solutions & Consulting
- Managed Application Services
- Systems Integration and Consulting
- Business Process Services
