

# Hospital Inpatient Claims Pricing Engine

## A Partner of Choice

CGI is a leader in providing innovative business and technology solutions to the healthcare payer industry. Our clear vision and ability to deliver results have made CGI the partner of choice for many BlueCross BlueShield plans, commercial health insurance companies, government healthcare payers and Prescription Benefit Managers (PBMs). Solutions designed for healthcare payers include:

- CAS 5.0 software for comprehensive claims auditing and fraud and abuse detection
- Clinical and compliance auditing
- Prescription benefit claims auditing and analysis services
- Medicare Advantage and Part D services
- Advanced analytics
- Reimbursement consulting and pricing solutions
- Fraud investigation services including special investigative unit outsourcing and co-sourcing
- SIU training and compliance
- Complete IT services

## Meeting the Challenge of Constant Change

In today's fast-paced and ever-changing environment, healthcare payers struggle to implement new pricing criteria and methodologies for reimbursement of hospital inpatient services. CGI can help. A leading partner to healthcare payers in implementing new hospital reimbursement strategies, our proactive Inpatient Claims Pricing Engine lets your organization maintain and increase its market presence.

The system improves our ability to adapt quickly to new methodologies, implement complex criteria, maximize flexibility and customization and gather relevant and detailed data about historical performance. It is especially effective for healthcare payers unable to change their historical reimbursement models because of limited system capabilities and flexibility, lack of IT resources or lack of knowledge about new methodologies.

CGI's professional team combines its expertise in the business of healthcare, reimbursement methodologies and technology to deliver a system and process with maximum flexibility and functionality in one self-contained module. Capabilities and functions of the system include:

- Ability to support different pricing methods, such as DRG, AP-DRG, CHAMPUS DRG, per diem, percent-of-charge and case rate
- Ability to process and price claims by various breakdowns and levels, including provider, line-of-business, network and peer group
- Ability to remove, carve out and separately price specific services and procedures from the base methodology
- Ability to use multiple methodologies based on various criteria
- Access to and control of the setup and maintenance of information within the system

As part of our client partnership, CGI's professional team can manage the following functions to eliminate stress and workload for your IT department:

- Interface development within your current system to add the pricing results to your claims history
- Maintain your claims pricing history database with all relevant data stored for future reference and reporting
- Manage all issues and function related to integration and implementation

## About CGI

Founded in 1976, CGI is one of the largest independent information technology and business process services firms in the world. CGI and its affiliated companies employ approximately 26,000 professionals.
