

IT Security Product Certification Services

CGI's IT Security Evaluation and Test Facility offers comprehensive software testing services and a wealth of competitive advantages to IT security product vendors worldwide.

With CGI's IT security lab, you gain the benefits of a qualified, accredited and independent evaluation laboratory along with the expertise, experience and global resources of a large, end-to-end IT services company with 69,000 professionals operating in more than 40 countries.

OUR SERVICES

CGI's systems and software testing and accreditation services include the following:

- Common Criteria evaluations
- FIPS 140 cryptographic module validations
- PCI PTS payment device consulting
- Vulnerability assessments
- Penetration testing
- Forensics, including evidence grade lock-ups
- Prototype testing and analysis, such as hardened service designs
- Assurance continuity

WHAT MAKES US A PARTNER OF CHOICE?

- **Client satisfaction:** CGI's ISO-9001 certified Client Partnership Management Framework continuously engages clients in the successful delivery of their projects.
- **Efficiency and excellence:** Canadian evaluations are recognized internationally for their high quality and effectiveness. CGI's approach leverages close relationships with clients and certification bodies to deliver successful, on-time evaluations.
- **Global scale with responsive service:** CGI's global IT services and expertise in both systems integration and outsourcing enable us to effectively manage large, complex evaluations. At the same time, our lab is known for its client commitment and technical depth, earning repeat business from clients that are industry leaders. We believe responsiveness is key to a positive experience.

SNAPSHOT OF OFFERINGS

- Common Criteria evaluations with Canada, U.S. and U.K. schemes
- FIPS 140-2 validations
- PCI PTS Payment Device consulting
- Partnerships to provide for documentation preparation for Common Criteria and FIPS 140

ADVANTAGES OF CANADIAN COMMON CRITERIA EVALUATIONS

CGI's Canadian-based IT security lab—one of only three in the country—offers numerous advantages, including the following:

- **No certification body charges:** Canada's certification body does not charge. In other jurisdictions, a surcharge is imposed on labs and those charges are passed on to the client.
- **Faster and more efficient certification:** The Canadian scheme features phased reporting throughout the course of evaluations. This ensures that the certification body is fully aware of findings and verdicts by the time a final evaluation report is submitted. Due to this supervision and monitoring by the certification body throughout the process, quick certification decisions are the norm and rework and retesting are rare.
- **Flexibility and stability:** Canada was one of the original six charter members of Common Criteria and, since 1995, has been a full partner in the FIPS-140 Cryptographic Module Validation Program with the US National Institute of Standards & Technology (NIST). Canadian certification bodies are known for the maturity and stability of their schemes, as well as their flexible approach to industry requirements.

OUR COMMITMENT TO YOU

CGI is committed to our clients and their success. As a major industry player with global reach, we bring technical depth to resolve their challenges and meet their business needs. Our lab has an extensive track record of delivering results for clients worldwide. Contact us to learn how we can help you.

ABOUT CGI

With 69,000 professionals operating in 400 offices and 40 countries, CGI fosters local accountability for client success while bringing global delivery capabilities to clients' front doors. Founded in 1976, CGI applies a disciplined delivery approach that has achieved an industry-leading track record of on-time, on-budget projects. Our high-quality business consulting, systems integration and outsourcing services help clients leverage current investments while adopting new technology and business strategies that achieve top and bottom line results. As a demonstration of our commitment, our average client satisfaction score for the past 10 years has measured consistently higher than 9 out of 10.
