CGI Federal at a Glance

CGI, helps you succeed. For 38 years, we have partnered with U.S. defense, civilian, and intelligence agencies to support their mission-essential needs. Our experts work closely with our clients to reduce costs, increase operational efficiency and gain valuable business insights.

A CLIENT-CENTRIC, PARTNERSHIP APPROACH
We have the mission understanding and technical expertise to help you get results.

- **Federal government mission expertise**—we understand the challenges and opportunities facing federal agencies. We can help implement solutions that improve outcomes and maximize results.
- **Quality processes and frameworks**—we maintain a high level of customer satisfaction and delivery excellence through ISO 9001-certified and CMMI Level 3-compliant operations.
- **Flexible delivery options**—we combine onsite responsiveness with cost-effective remote delivery capabilities.
- **Technology independence**—we focus on selecting products, services and solutions that best fit your unique challenges and requirements.
- **Client-proximity model**—we organize operations around metro markets and client locations, allowing us to be deeply rooted in the community and locally-accountable for your project success.

RESULTS-FOCUSED SERVICES AND SOLUTIONS
Our portfolio of services enables us to serve as your full-service provider for every facet of your operations. Our key service areas include:

- **Advanced engineering and technology services**—delivers analysis, design, prototyping and engineering.
- **Application management**—day-to-day maintenance and improvement for your business applications, helping reduce costs and ensure faster delivery of programs, projects and other initiatives.
- **Business process management & services**—subject matter and technology experts, engineers, analysts and other professionals to manage back-office processes to improve efficiency and free up your time so you can focus on your mission.
- **Operational support services**—provides resource, supply chain, maintenance and sustainment planning, biometrics, communications, training, management and support to federal clients, principally to U.S. military operations.
- **Systems integration and consulting**—design and implementation of business and technology solutions that solve your business and mission challenges.
- **Technology management**—infrastructure management that adapts to your mission and business requirements, including secure data center operations.
