

# Utilities ARM Field Manager

FIELD MANAGER CONNECTS THE WORK TO THE BUSINESS PROCESS.

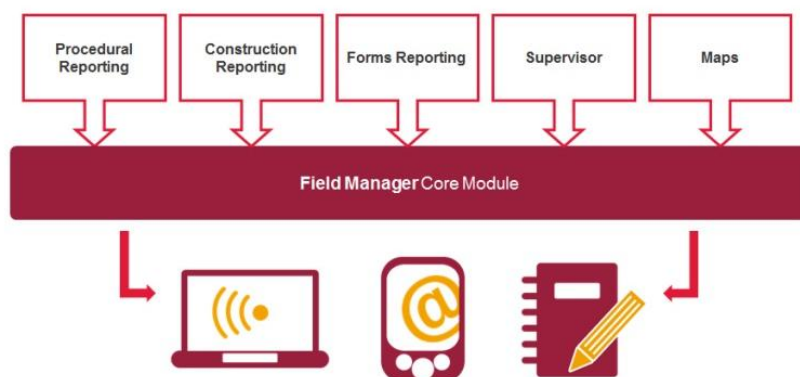

## THE CHALLENGE

Provide field crews and supervisors with real-time access to the office. Integrate. Connect. Communicate.

## OUR ANSWER

Equip your field crews with Field Manager. Part of CGI's industry-leading Asset and Resource Manager (ARM) Suite, Field Manager allows you to connect crews' work to the back office and your business process on a single mobile platform. Monitor your complete enterprise in real time.

Your resources in the field are essential to success. They often represent the only point of contact with customers. They fix real problems, and with their hands, they turn design into action. Field Manager is a tool designed for them.

Field Manager provides your field professionals with a wealth of information at the job site. In turn, crews supply accurate data, scheduling updates and first-hand reports back to you. It is a complete mobile workforce solution in one tool.

Field Manager records as-built construction executed in the field and automates reporting. Crew locations, work detail and approvals are all visible to the back office. Revised schedule details are sent to the field instantly. The "paper chase" vanishes. Response times improve. Slack schedules tighten and field worker productivity grows toward full utilization.

Designed for construction, service and maintenance operations, Field Manager increases company compliance standards and lowers operating costs. Send timely information to the field. Expect quality data returned from the field.

## KEY BENEFITS

- Integrate "out-of-the-box"
- Program workflow definitions
- Send and receive real-time status
- User-configured forms and procedures
- View asset information and history
- Review and update construction designs
- Overlay work location maps
- Update work requests in the field
- Text message anyone on the system
- View project contact information
- Safety check and validate field information.

Improve productivity and business intelligence. Extend your office to the field.  
Choose Field Manager.

### **WHY WORK WITH CGI**

We have a flexible, collaborative culture. Our innovative, practical solutions are tailored to client needs. We deliver a blended service model that combines local knowledge with global resourcing. We engage our clients on all levels. We pioneer technology across industries in recognition of the world beyond IT and we create new ways for clients to succeed.

### **ABOUT CGI**

With 69,000 professionals operating in 400 offices in 40 countries, CGI fosters local accountability for client success while bringing global delivery capabilities to clients' front doors. Founded in 1976, CGI applies a disciplined delivery approach that has achieved an industry-leading track record of on-time, on-budget projects. Our high-quality business consulting, systems integration and outsourcing services help clients leverage current investments while adopting new technology and business strategies that achieve top and bottom line results. As a demonstration of our commitment, our average client satisfaction score for the past 10 years has measured consistently higher than 9 out of 10.
