

Utilities ARM System Manager

Experience the commitment®

SYSTEM MANAGER STREAMLINES OLD AND NEW ON ONE PLATFORM.

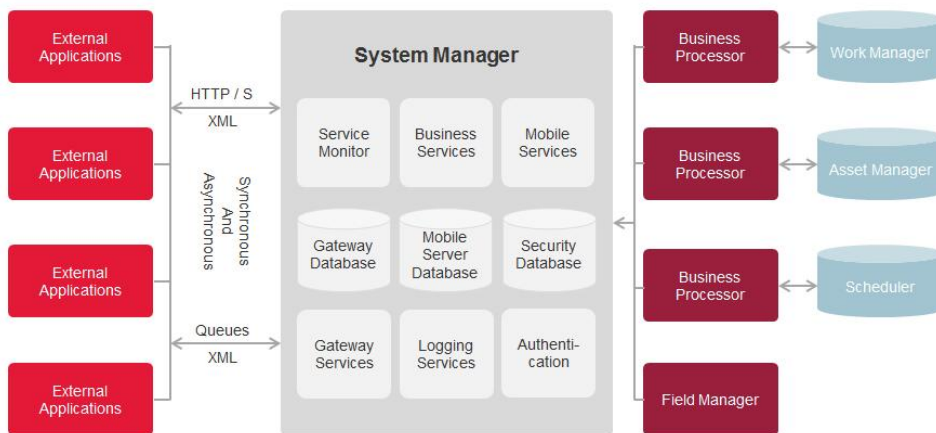

THE CHALLENGE

Integration of new solutions with legacy systems is a significant consideration for any IT initiative. Custom point-to-point interface solutions can be complicated and static. Modern service-oriented architecture (SOA) and XML-based messages often require costly middleware and other enterprise application integration tools. Finally, applying security policies and authorizations to new solutions requires time and expertise.

OUR ANSWER

CGI's System Manager is a centralized administration, security, and integration function that offers seamless alignment between legacy systems and external applications.

Pre-configured SOA and XML-based messages enable an exchange of information from hundreds of inbound messages. Advanced message tracking with detailed audit trail and message history allows your IT department to quickly identify and resolve delivery issues.

Part of our Asset & Resource Manager (ARM) Suite, System Manager is an intuitive configuration module that enables end users to manage the look and feel of the application as well as their own data. And, each application within the ARM Suite utilizes an authentication service to verify user authorization. This empowers security personnel to define individual access rules in compliance with company policies.

KEY BENEFITS

- Single point of entry for external applications
- Sequential grouping of system interfaces
- XML-based messaging standards
- Supports WebSphere MQ, AQ, JMS and HTTP/HTTPS
- Advanced transaction recovery capabilities
- Centralized security and authentication services
- Business application framework
- In-flight message translation
- Supports sequential message processing.

System Manager fits easily into your existing architecture and allows you to select an underlying platform such as Windows, Solaris or AIX. It is pre-configured and integrated to meet your entire asset and resource management needs, yet flexible enough to integrate with your existing critical applications. Integrate with style. Integrate and configure with ease. Make System Manager part of your enterprise.

ABOUT CGI

With 69,000 professionals operating in 400 offices in 40 countries, CGI fosters local accountability for client success while bringing global delivery capabilities to clients' front doors. Founded in 1976, CGI applies a disciplined delivery approach that has achieved an industry-leading track record of on-time, on-budget projects. Our high-quality business consulting, systems integration and outsourcing services help clients leverage current investments while adopting new technology and business strategies that achieve top and bottom line results. As a demonstration of our commitment, our average client satisfaction score for the past 10 years has measured consistently higher than 9 out of 10.
