

Utilities ARM Optimizer

OPTIMIZER TRANSFORMS SCHEDULING AND DISPATCH.

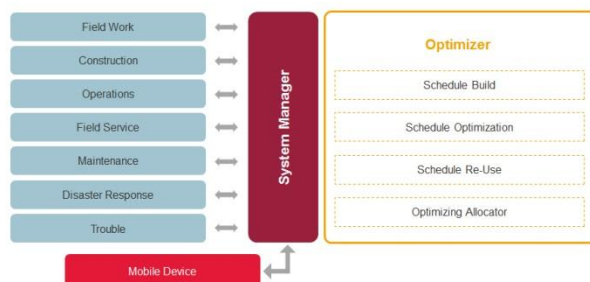

THE CHALLENGE

- Automate scheduling and dispatch for all work across an enterprise
- Continuously improve schedules and assignments based on changing priorities
- Account for hundreds of scheduling and regulatory constraints and dependencies
- Improve service
- Lower costs
- Enhance efficiency.

OUR ANSWER

Consider CGI's Optimizer. As part of the industry-leading Asset & Resource Manager (ARM) Suite, Optimizer takes schedule and dispatch to full automation.

Optimizer offers an enterprise view of all work and resources while continuously assessing and optimizing the schedule based on the changing priorities of work and the current status, location and skill set of your crews. The result is the right work, dispatched to the right crew, at the right time.

Optimizer is fully configurable to automatically build efficient schedules to meet your business needs while fully utilizing resources. Take the next step to automated scheduling and dispatching with Optimizer.

KEY BENEFITS

- Constraint-based scheduling
- Continuous re-optimization
- Soft schedule to a resource pool
- Gantt and controller matrix
- Flexible parameters
- Map verification
- Intuitive user interface
- Manual intervention through drag-and-drop
- Real-time dispatch and updates
- Dynamic response to schedule wreckers
- Enhanced customer satisfaction
- Improved workforce utilization.
