We deliver...

For more than 35 years, we've maintained a steadfast focus on delivering results. Every decision we make revolves around creating and providing sustainable value for our stakeholders. For our clients, we help them innovate no matter the economic condition, allowing them to do more with less. For our members, we foster an ownership culture that incents and rewards their contributions. For our shareholders, we deliver strong financial results to provide a superior return for the long term. At CGI, we deliver to help all of our stakeholders succeed.

Message to shareholders

We deliver. Value and growth.

Serge Godin
Founder and
Executive Chairman of the Board

Michael E. Roach
President and
Chief Executive Officer

www.cgi.com/2011-ar/message-to-shareholders

AT CGI, WE ARE IN THE BUSINESS OF DELIVERING RESULTS.

We deliver consistent high-quality and industry-leading solutions and services to our clients; exciting career opportunities for our professionals who, as owners, are building a company they can be proud of; and superior returns and profitable growth to our shareholders.

We are focused on the essentials of running a sound and stable business for the long term. In fiscal 2011, we delivered results for you, our shareholders. In fact, on many key performance indicators, it was our best year yet and further solidified our industry leading position.

We successfully built on the Stanley acquisition and positioned ourselves as a key provider across all areas of the U.S. federal government. We signed key contracts with clients across the U.S. Department of Defense and booked more than \$4.9 billion in new orders for a book-to-bill ratio of 113% for the entire company. The Stanley acquisition also laid the foundation for further expansion. In September, we established a Canadian Defence, Public Safety and Intelligence unit.

The depth and breadth of our government business—which spans federal, provincial, state and local government agencies across our global operations—generated significant growth throughout the fiscal year, and provides a resilient position against difficult economic conditions. Clearly information technology is an enabler, requiring governments—and commercial organizations as well—

to invest in IT to remove costs and gain efficiencies. Our backlog of long-term contracts is evidence of our strong position within today's market.

In fiscal 2011, as part of our structured program to evaluate client satisfaction, we achieved an average rating of 9.1 out of 10 from more than 2,400 client interviews. This proves that we not only understand our clients' needs, but also deliver meaningful results in response to the challenges and opportunities they face.

Today, at \$13.5 billion, our profitable backlog provides revenue and earnings visibility for all stakeholders and allows our clients to be confident in the stability of CGI as their committed IT services partner.

But we are not resting on our laurels. We understand that in today's business environment, it's not about working harder—it's about working smarter, which is why we continuously find ways to improve our revenue mix and profitability to deliver superior returns over time.

Message to shareholders (cont.)

satisfaction score from
more than 2,400 signed
client assessments

We continue to deepen our business development capabilities and expand our expertise by investing in the development of mission critical intellectual property, such as cloud computing, cybersecurity and biometrics, which will be critical to our growth in the coming quarters and years.

Health IT is a growing industry worldwide. Accordingly, our health business is now a stand-alone vertical segment to make this growth visible. Over the past three years, the compound annual growth rate (CAGR) of our health sector has been 28.1%, and today it generates approximately \$350 million or 8.1% of annual revenue. In fiscal 2011, this segment delivered a book-to-bill ratio of 120% and, by the end of the fiscal year, had an order backlog in excess of \$1.2 billion.

During the fiscal year, we signed strategic contracts with new clients across all five of our targeted verticals using one or more of our proprietary solutions. These software-as-a-service contracts are in line with our strategy to constantly improve our revenue mix. By leveraging our intellectual property, data centers and professionals, we offer clients the ability to share IT costs with other leading organizations, while generating additional margin for our shareholders.

We are constantly changing the mix of our revenue toward longer-term growth and higher margin areas, where we can maximize the return for our shareholders. It is due to initiatives like these that CGI has a net earnings margin of 10.1%.

For clients, we deliver on our promises and strive to surpass their expectations.

Our clients demand consistent, reliable and innovative answers to their business needs, and we thrive on delivering on our promises and surpassing their expectations. The global economy is changing every day, and our clients need a flexible, reliable partner that truly understands their business needs and has the ability to react to whatever opportunities or challenges present themselves.

Our success in meeting client expectations is evident in our bookings of \$4.9 billion, or 113% of revenue. In fiscal 2011, we added new global clients while renewing, extending and expanding our relationship with our existing marquee clientele.

Our clients trust us to deliver results, and this is not something that we take for granted. Every single day we work to surpass their expectations, building a reputation of quality and performance.

This is why clients like Industrial Alliance, the U.S. Environmental Protection Agency, the State of California, Cirque du Soleil, Scotiabank, the U.S. Department of Homeland Security and the U.S. Centers for Medicare & Medicaid Services turn to us for their IT needs.

Message to shareholders (cont.)

For members*, CGI promotes an ownership culture to share in challenges and rewards.

CGI is built on a dream: “To create an environment in which we enjoy working together and, as owners, contribute to building a company we can be proud of.” In fact, 90% of CGI's members are shareholders, clearly demonstrating that our interests are aligned with yours. Our performance-based compensation system, including our stock options program, is directly linked to value creation. CGI's 31,000 professionals wake up every day with a passion for what they do, and they are committed to delivering on their promises.

“To create an environment in which we enjoy working together and, as owners, contribute to building a company we can be proud of.”

In fact, as part of our member satisfaction assessment process, our members told us that their greatest satisfaction comes from a job well done, which directly relates to 95% of our contracts being completed on time and on budget.

Our professionals represent the industry's best, and their ownership mentality—along with the exciting career opportunities that CGI provides—have resulted in one of the industry's lowest attrition rates of 12%. CGI is a destination of choice for IT professionals looking to start or grow their careers.

For shareholders, CGI delivers superior returns.

Despite global economic uncertainty, CGI increased its market valuation by almost \$1 billion in fiscal 2011. We successfully grew our business and won key contracts in both the government and commercial space.

In fiscal 2011, we delivered:

- Revenue of \$4.3 billion—19% higher than fiscal 2010 at constant currency
- 10% growth in adjusted EBIT with a 13% margin
- \$435 million in net earnings or 20% growth, with a net margin of more than 10%
- EPS expansion of more than 27% to \$1.58 per diluted share
- \$571 million in cash, or \$2.07 in cash per share
- \$4.9 billion in new business, with a good balance between new clients and contract extensions, expansions and renewals
- A backlog of \$13.5 billion
- A return on equity of 19.5%—a 310 basis point jump from last year, while our return on invested capital was 14.1%

Looking ahead to fiscal 2012 and beyond, we have more than \$1 billion in available capital, providing us ample liquidity to continue investing our cash in the most accretive opportunities for shareholders. Our investment priorities include profitable organic growth, accretive acquisitions, share repurchase and debt repayment. For example, since 2006, we have returned over \$2 billion to shareholders in the form of share buybacks. Through these buybacks, our share count has decreased from a high of 445 million to 261 million shares at the end of fiscal 2011, a reduction of 41.3%.

Overall, we remain focused on the fundamentals of delivering quality services to our clients, while proactively expanding our capabilities and offerings by investing in the highest growth areas.

* At CGI, we refer to our professionals as members to highlight our culture of ownership.

Message to shareholders (cont.)

We will continue to execute our “Build and Buy” profitable growth strategy, which is rooted in business fundamentals and quality service. We believe that executing consistently on this model delivers superior returns to shareholders over time, even in the most challenging market conditions.

Finally, we thank the members of our Board of Directors for their advice and dedication, as well as Donna Morea, who retired this year as president of our U.S., Europe and Asia operations. Her work contributed significantly to CGI's growth in the U.S. market, providing us with a solid footing from which to build in the years to come.

Once again, we thank all of our stakeholders for their ongoing commitment to CGI. Your support has brought us to where we are today and will drive our future growth.

Revenue	1,031,565	1,037,913	1,133,071	1,120,688	1,007,056	901,614	910,441	913,006
Adjusted EBIT	102,772	144,342	156,290	158,549	139,801	128,702	123,963	119,436
Adjusted EBIT margin	10.0%	13.9%	13.8%	14.1%	13.9%	14.3%	13.6%	13.1%
Net earnings	73,093	118,438	116,961	126,574	84,076	85,880	81,591	111,219
Net earnings margin	7.1%	11.4%	10.3%	11.3%	8.3%	9.5%	9.0%	12.2%
Basic earnings per share	0.28	0.45	0.44	0.47	0.31	0.30	0.28	0.38
Diluted earnings per share	0.27	0.43	0.42	0.45	0.30	0.30	0.28	0.37
Cash flow from operating activities	192,782	90,076	193,147	95,210	158,473	102,750	125,016	166,128

1 Adjusted EBIT represents earnings from continuing operations before acquisition-related and integration costs, interest on long-term debt, interest income, other (income) expenses, gain on sale of capital assets and income tax expense.

2 The reconciliation between U.S. and Canadian Generally Accepted Accounting Principles is provided in Note 29 to the consolidated financial statements.

3 The net debt to capitalization ratio represents the proportion of long-term debt and bank overdraft, net of cash and cash equivalents, short-term investments and marketable long-term investments ("net debt") over the sum of shareholders' equity attributable to shareholders of CGI and long-term debt. Net debt and capitalization are both net of the fair value of forward contracts. As at September 30, 2009, our net debt was negative (a net cash position) and therefore is shown as not applicable ("n/a").

4 Earnings per share amounts and shareholders' equity are attributable to shareholders of CGI.

At a glance

We deliver. Locally and globally.

With 31,000 members in 125 offices worldwide, CGI adheres to the fundamental belief that having a strong local presence with clients is critical to our joint success. This client-proximity business model combined with 6,000 professionals working in global delivery centers on three continents provide clients with a strong local presence and a best-fit mix of global sourcing. This model fuels our distinctive track record of on-time, on-budget delivery, which provides for an optimal mix of recurring revenue, repeat business and a backlog that delivers sustainable value to all of our stakeholders.

Our services and solutions

CGI has a comprehensive portfolio of offerings, including consulting, systems integration, the full management of IT and business functions, and 100+ proprietary solutions that improve all facets of our clients' operations.

Systems integration and consulting — strategic plans, system architecture, system development and implementation of business and technology solutions

Application management — day-to-day maintenance and improvement of clients' business applications

Infrastructure services — comprehensive infrastructure management capabilities that adapt to clients' unique business needs and service priorities

Business process services — management of back-office business processes to streamline operations

Proprietary solutions — large portfolio of 100+ mission-critical solutions that reduce costs and create operational efficiencies

Our go-to-market approach

We understand it's how we deliver our services that make us a partner of choice. Our business approach puts clients and their results first.

Client-proximity business model — organizes operations around metro markets, allowing us to be deeply rooted within clients' business communities and accountable for project success

Industry expertise — fuels our deep understanding of clients' realities to implement solutions that improve and transform their business environments

Unique global delivery options — combines onsite responsiveness through our local offices with remote delivery capabilities through CGI's onshore, nearshore and offshore centers of excellence

Quality processes — ISO 9001-certified operations ensure a high level of client, member and shareholder satisfaction and CMMI Levels 3 and 5-compliant global delivery centers provide agile, high-quality delivery

Our markets

CGI offers its end-to-end services to a select set of economic sectors in which we have deep business and technical expertise. This allows us to fully understand our clients' realities and to have the know-how and solutions needed to advance their business goals.

Government — helping hundreds of federal, provincial, state and local governments across the U.S., Canada, Europe and Australia

Financial services — helping leading institutions including most major banks in the Americas and Europe as well as leading property & casualty and life insurers

Manufacturing, retail and distribution — helping global leaders from multiple segments and channels, including over 250 retailers

Telecommunications and utilities — helping global telecom providers and over 60 utilities in North America and Europe

Health — helping more than 1,000 healthcare facilities, including 250+ hospitals and departments of health, and major health insurers

Client success stories

We deliver. Innovation.

Innovation requires new thinking and approaches.

At CGI, we deliver solutions that enable our clients to achieve rapid business results. For example, we were in the “cloud” years before the term was coined. For more than 10 years, our Trade360® SaaS solution has powered global trade finance, processing 2 million transactions annually for users in 30 countries. We also are the ground level of reform and transformation with solutions for the health sector—in fact, CGI was a winner of the Health 2.0 Developer Challenge for our Healthcare Quality Compare tool. We’re the only independent IT services company that develops, supports and hosts integrated ERP software exclusively for government, and we’re just one of two IT security evaluation and test facilities located in Canada that provide security certification services to organizations with complex security requirements. These are just a few examples of how we innovate for our clients, providing fast-track technology modernization that lets them stay ahead in a continuously evolving market.

The CGI Constitution

Our dream

To create an environment in which we enjoy working together and, as owners, contribute to building a company we can be proud of.

Our mission

To help our clients with professional services of outstanding quality, competence and objectivity, delivering the best solutions to fully satisfy client objectives in information technology, business processes and management. In all we do, we foster a culture of partnership, intrapreneurship, teamwork and integrity, building a world class IT and business process services company.

Our vision

To be a world class IT and business process services leader helping our clients succeed.

Our values

Partnership and quality

For us, partnership and quality are both a philosophy and a way of life. We develop and follow the best management practices and we entrench these approaches into client relationships and service delivery frameworks in order to foster long-term and strong partnerships with our clients. We listen to our clients and we are committed to their total satisfaction in everything we do.

Objectivity and integrity

We exercise the highest degree of independent thinking in selecting the products, services and solutions we recommend to clients. In doing so, we adhere to the highest values of quality, objectivity and integrity. Consequently, strict rules of business and professional conduct are applied. We do not accept any remuneration from suppliers.

Intrapreneurship and sharing

Our success is based on the competence, commitment and enthusiasm of our members. Therefore, we promote a climate of innovation and initiative where we are empowered with a sense of ownership in supporting clients, thus ensuring the firm's profitable growth. Through teamwork, sharing our know-how and expertise, we bring the best of CGI to our clients. As members, we share in the value we create through equity ownership and profit participation.

Respect

As a global company, we recognize the richness that diversity brings to the company and welcome this diversity while embracing the overall CGI culture. In all we do, we are respectful of our fellow members, clients, business partners and competitors.

Financial strength

We strive to deliver strong, consistent financial performance, which sustains long term growth and rewards our members and shareholders. Financial strength enables us to continuously invest and improve services and business solutions to the benefit of our clients. To this end, we manage our business to generate industry superior returns.

Corporate social responsibility

Our business model is designed to ensure that we are close to our clients and communities. As members, we embrace our social responsibilities and contribute to the continuous development of the communities in which we live and work.

_experience the commitment™

We deliver.

Financial Highlights

We deliver... Results.

We have a track record of delivering consistent and superior returns. Our “Build and Buy” profitable growth strategy is focused on the fundamentals of running a sound and stable business for the long term. On many key performance indicators, fiscal 2011’s financial performance was one of our best yet and further solidified our consistent industry leading position. We continue to invest in intellectual property and leverage the highest growth areas. These include areas such as cloud computing, cybersecurity and biometrics that deliver the highest returns.

- Adjusted EBIT represents earnings from continuing operations before acquisition-related and integration costs, interest on long-term debt, interest income, other (income) expenses, gain on sale of capital assets and income tax expense.
- The reconciliation between US and Canadian Generally Accepted Accounting Principles is provided in Note 29 to the consolidated financial statements.
- The net debt to capitalization ratio represents the proportion of long-term debt and bank overdraft, net of cash and cash equivalents, short-term investments and marketable long-term investments ("net debt") over the sum of shareholders' equity attributable to shareholders of CGI and long-term debt. Net debt and capitalization are both net of the fair value of forward contracts. As at September 30, 2009, our net debt was negative (a net cash position) and therefore is shown as not applicable ("n/a").
- Earnings per share amounts and shareholders' equity are attributable to shareholders of CGI.

Management's Discussion and Analysis of Financial Position and Results of Operations

For the year ended September 30, 2011

November 10, 2011

Basis of Presentation

This Management's Discussion and Analysis of the Financial Position and Results of Operations ("MD&A") is the responsibility of management and has been reviewed and approved by the Board of Directors. This MD&A has been prepared in accordance with the requirements of the Canadian Securities Administrators. The Board of Directors is ultimately responsible for reviewing and approving the MD&A. The Board of Directors carries out its responsibility mainly through its Audit and Risk Management Committee, which is appointed by the Board of Directors and is comprised entirely of independent and financially literate directors.

Throughout this document, CGI Group Inc. is referred to as "CGI", "we", "our" or "Company". This MD&A provides information management believes is relevant to an assessment and understanding of the audited consolidated results of operations and financial condition of the Company. This document should be read in conjunction with the audited consolidated financial statements and the notes thereto for the years ended September 30, 2011, 2010, and 2009. CGI's accounting policies are in accordance with Canadian generally accepted accounting principles ("GAAP") of the Canadian Institute of Chartered Accountants ("CICA"). These differ in some respects from generally accepted accounting principles in the United States ("U.S. GAAP"). Our reconciliation of results reported in accordance with GAAP to U.S. GAAP can be found in Note 29 to the consolidated financial statements. All dollar amounts are in Canadian dollars unless otherwise indicated.

Materiality of Disclosures

This MD&A includes information we believe is material to investors. We consider something to be material if it results in, or would reasonably be expected to result in, a significant change in the market price or value of our shares, or if it is likely that a reasonable investor would consider the information to be important in making an investment decision.

Forward-Looking Statements

All statements in this MD&A that do not directly and exclusively relate to historical facts constitute "forward-looking statements" within the meaning of that term in Section 27A of the United States Securities Act of 1933, as amended, and Section 21E of the United States Securities Exchange Act of 1934, as amended, and are "forward-looking information" within the meaning of Canadian securities laws. These statements and this information represent CGI's intentions, plans, expectations and beliefs, and are subject to risks, uncertainties and other factors, of which many are beyond the control of the Company. These factors could cause actual results to differ materially from such forward-looking statements or forward-looking information. These factors include but are not restricted to: the timing and size of new contracts; acquisitions and other corporate developments; the ability to attract and retain qualified members; market competition in the rapidly evolving information technology industry; general economic and business conditions; foreign exchange and other risks identified in the MD&A, in CGI's Annual Report on Form 40-F filed with the U.S. Securities and Exchange Commission (filed on EDGAR at www.sec.gov), the Company's Annual Information Form filed with the Canadian securities authorities (filed on SEDAR at www.sedar.com), as well as assumptions regarding the foregoing. The words "believe," "estimate," "expect," "intend," "anticipate," "foresee," "plan," and similar expressions and variations thereof, identify certain of such forward-looking statements or forward-looking information, which speak only as of the date on which they are made. In particular, statements relating to future performance are forward-looking statements and forward-looking information. CGI disclaims any intention or obligation to publicly update or revise any forward-looking statements or forward-looking information, whether as a result of new information, future events or otherwise, except as required by applicable law. Readers are cautioned not to place undue reliance on these forward-looking statements or on this forward-looking information. You will find more information about the risks that could cause our actual results to differ significantly from our current expectations in the Risk Environment section.

Non-GAAP Measures

The reader should note that the Company reports its financial results in accordance with GAAP. However, in this MD&A, certain non-GAAP financial measures are used:

1. Earnings from continuing operations before acquisition-related and integration costs, interest on long-term debt, interest income, other (income) expenses, gain on sale of capital assets, and income tax expense ("adjusted EBIT");
2. Constant currency growth;
3. Days Sales Outstanding ("DSO");
4. Return on Invested Capital ("ROIC");
5. Return on Equity ("ROE"); and
6. Net Debt to Capitalization ratio.

Management believes that these non-GAAP measures provide useful information to investors regarding the Company's financial condition and results of operations as they provide additional measures of its performance. These non-GAAP measures do not have any standardized meaning prescribed by GAAP and are therefore unlikely to be comparable to similar measures presented by other issuers. These measures should be considered as supplemental in nature and not as a substitute for the related financial information prepared in accordance with GAAP.

A reconciliation of adjusted EBIT to its closest GAAP measure can be found on page 24. Definitions of constant currency growth, DSO, ROIC, ROE, and net debt to capitalization are provided on pages 11 and 12. A discussion of DSO, ROIC, ROE and net debt to capitalization can be found on page 31.

Change in Reporting Segments

As a result of an organizational adjustment at the beginning of the fiscal year, CGI's operations are being managed through four operating segments as compared to three in the prior years. Furthermore, the corporate segment is no longer identified and is completely allocated to the other four segments. Prior period results have been retrospectively revised to reflect this change. This MD&A reflects the current segmentation and therefore, restates the segmented results of the years ended September 30, 2010 and 2009. For more details on how our operations are managed, please refer to page 8 of this MD&A and to note 23 of the consolidated financial statements.

Reclassification of Vertical Markets

On October 31, 2011, CGI announced that it will now report a separate "Health" vertical market. The new vertical is the result of the Company's strong historical performance and the sector's overall importance to CGI's global growth strategy. Previously, this sector was embedded within both the government and financial services verticals. In addition, the Company consolidated the manufacturing and retail & distribution vertical markets into one – manufacturing, retail & distribution ("MRD"). The MD&A incorporates the above changes to our vertical markets.

MD&A Objectives and Contents

- Provide a narrative explanation of the consolidated financial statements through the eyes of management;
- Provide the context within which the consolidated financial statements should be analyzed, by giving enhanced disclosure about the dynamics and trends of the Company's business; and
- Provide information to assist the reader in ascertaining the likelihood that past performance is indicative of future performance.

In order to achieve these objectives, this MD&A is presented in the following main sections:

Section	Contents	Pages
1. Corporate Overview	This includes a description of our business and how we generate revenue as well as the markets in which we operate.	
	1.1. About CGI	8
	1.2. Vision and Strategy	9
	1.3. Competitive Environment	9
2. Highlights and Key Performance Measures	A summary of key achievements during the year, the past three years' key performance measures, and CGI share performance.	
	2.1. Fiscal Year 2011 Highlights	10
	2.2. Key Performance Measures Defined	11
	2.3. Selected Yearly Information & Key Performance Measures	12
	2.4. Stock Performance	13
3. Financial Review	A discussion of year-over-year changes to operating results for years ended September 30, 2011, 2010, and 2009, describing the factors affecting revenue and earnings on a consolidated and reportable segment basis, and also by describing the factors affecting changes in the major expense categories. Also discussed are bookings broken down by geography and vertical market.	
	3.1. Bookings and Book-to-Bill Ratio	14
	3.2. Foreign Exchange	17
	3.3. Revenue Distribution	18
	3.4. Revenue Variation and Revenue by Segment	19

1. Corporate Overview

1.1. ABOUT CGI

Founded in 1976 and headquartered in Montreal, Canada, CGI is one of the largest independent providers of end-to-end information technology services (“IT services”) and business process services (“BPS”) to clients worldwide, utilizing a flexible and cost efficient delivery model. CGI and its affiliated companies have approximately 31,000 professionals across the globe. The Company’s delivery model provides for work to be carried out onsite at client premises, or through one of its centres of excellence located in North America, Europe and India. We also have a number of leading business solutions that support long-term client relationships. Our services are broken down as:

- Consulting – CGI provides a full range of IT and management consulting services, including business transformation, IT strategic planning, business process engineering and systems architecture.
- Systems integration – CGI integrates and customizes leading technologies and software applications to create IT systems that respond to clients’ strategic needs.
- Management of IT and business functions (“outsourcing”) – Clients delegate entire or partial responsibility for their IT or business functions to CGI to achieve significant savings and access the best suited technology, while retaining control over strategic IT and business functions. As part of such agreements, we implement our quality processes and practices to improve the efficiency of the clients’ operations. We also integrate clients’ operations into our technology network. Finally, we may take on specialized professionals from our clients, enabling our clients to focus on key operations. Services provided as part of an outsourcing contract may include development and integration of new projects and applications; applications maintenance and support; technology infrastructure management (enterprise and end-user computing and network services); transaction and business processing such as payroll, insurance processing, and document management services. Outsourcing contracts typically have terms from five to ten years and may be renewable.

CGI offers its end-to-end services to a focused set of industry vertical markets where we have developed extensive and deep subject matter expertise. This allows us to fully understand our clients’ business realities and to have the knowledge and solutions needed to advance their business goals. Our targeted vertical markets include government, financial services, MRD, telecommunications & utilities, and health.

The Company has more than 100 proprietary business solutions which help shape opportunities and drive incremental value for our clients and shareholders. Examples of these include Enterprise Resource Planning solutions, credit and debt collections, tax management, claims auditing and fraud detection, and energy management.

We take great pride in delivering high quality services to our clients. To do so consistently, we have implemented and continue to maintain the International Organization for Standardization (“ISO”) quality program. By designing and implementing rigorous service delivery and quality standards, followed by monitoring and measurement, we are best able to satisfy our clients’ needs. All of our business units continue to be certified.

Our operations are managed in four operating segments based on our delivery model incorporating domestic activities as well as services from utilizing our unique global delivery model. The Global Infrastructure Services (“GIS”) segment incorporates all services we provide to our clients globally for the management of their technology infrastructure. The other segments are based on our geographic delivery model: Canada, U.S. and India (“U.S.”) and Europe and Asia Pacific (“Europe”).

1.2. VISION AND STRATEGY

At CGI, we derive our business vision from our dream which is to create an environment in which members enjoy working together and, as owners, contribute to building a company they can be proud of. That dream led to CGI's vision of being a world-class IT and BPS leader, helping its clients win and grow. Our build and buy strategy is refined through a four-pillar growth strategy that combines organic growth and acquisitions. CGI has been and will continue to be a consolidator in the IT services industry.

The first two pillars of our strategy focus on organic growth. The first focuses on smaller contract wins, renewals and extensions. The second involves the pursuit of new large, long-term outsourcing contracts, leveraging our end-to-end services, global delivery model and critical mass.

The third pillar of our growth strategy focuses on the acquisition of smaller firms or niche players. We identify niche acquisitions through a strategic mapping program that systematically searches for targets that will strengthen our vertical market knowledge or increase the richness of our service offerings.

The fourth pillar involves the pursuit of transformational acquisitions focused on expanding our geographic presence and critical mass. This approach further enables us to strengthen our qualifications to compete for large outsourcing contracts.

Throughout its history, CGI has been highly disciplined in following this four-pillar growth strategy, with an emphasis on earnings accretion and maximizing shareholder value. Currently, our key growth target markets are the U.S. and Europe.

1.3. COMPETITIVE ENVIRONMENT

As a global provider of end-to-end information technology and business process services, CGI operates in a highly competitive and rapidly evolving global industry. Our competition comprises a variety of global players, from niche companies providing specialized services to other end-to-end service providers, mainly in the U.S., Europe and India, all of whom are competing to deliver some or all of the services we provide.

Recent mergers and acquisition activity has resulted in CGI being positioned as one of the few remaining IT services firms that operates independently of any hardware or software vendor. Our independence allows CGI to deliver the best-suited technology available globally to our clients.

CGI offers its end-to-end services to a select set of targeted vertical markets in which we have deep business and technical expertise covering 90% of global IT spend. These vertical markets are: government, financial services, MRD, telecommunications & utilities, and health. To compete effectively, CGI focuses on high-end systems integration, consulting and outsourcing where vertical market industry knowledge and expertise are required.

Our client proximity metro markets business model combined with our global delivery model results in highly responsive and cost competitive delivery. CGI's global delivery model provides clients with a unique blend of onshore, nearshore and offshore delivery options that caters to their strategic and cost requirements. CGI also has a number of leading business solutions that support long-term client relationships. Moreover, all of CGI's business operations are executed based on the same management foundation, ensuring consistency and cohesion across the company.

There are many factors involved in winning and retaining IT and BPS contracts in today's global market, including the following: total cost of services; ability to deliver; track record; vertical market expertise; investment in business solutions; local presence; global delivery capability; and the strength of client relationships. CGI compares favourably with its competition with respect to all of these factors.

In summary, CGI's competitive value proposition encompasses the following: end-to-end IT and BPS capability; expertise and proprietary business solutions in five vertical markets covering the majority of global IT spending; a unique global delivery model, which includes industry leading delivery capabilities; a disciplined management foundation; and our focus on client satisfaction which is supported by our client proximity business model. Based on this value proposition and CGI's growing critical mass in our three main markets – Canada, the U.S. and Europe, collectively covering approximately 70% of global IT spending – we are in a position to compete effectively on an international scale and win large contracts.

2. Highlights and Key Performance Measures

2.1. FISCAL YEAR 2011 HIGHLIGHTS

The Company continued to grow year-over-year and our adjusted EBIT margin continues to remain strong, providing necessary cash from operations to pay down our long-term debt and to increase the return to our shareholders. The highlights below include the impacts of the Performance Improvement Plan as explained below in section 2.1.3.:

- Bookings of \$4.9 billion;
- Book-to-bill ratio of 113%;
- Constant currency revenue growth of 18.9% over last year;
- Adjusted EBIT margin remains high at 13.0%;
- Basic and diluted EPS grew by 29.1% and 27.4% respectively compared to the prior year;
- Return on equity reached 19.5%;
- Cash provided by continuing operating activities remained strong, representing 13.2% of revenue; and
- Repurchased 16.4 million Class A subordinate shares of the Company.

2.1.1. Conseillers en informatique d'affaires CIA Inc.

On April 4, 2011, CGI concluded a transaction whereby Conseillers en informatique d'affaires CIA Inc. ("CIA") repurchased its shares held by CGI. CGI simultaneously purchased the operations carried out in CIA's Paris office. The sale and acquisition did not have a material impact on the Company's net earnings or financial position. The revenue reported in Canada decreased by approximately \$17.3 million during the year from fiscal 2010.

2.1.2. Private Debt Placement

During the fourth quarter, the Company entered into a US\$475.0 million private debt placement financing with U.S. institutional investors. The private placement is comprised of three tranches of senior U.S. unsecured notes, with a weighted average maturity of 8.2 years and a weighted average fixed coupon of 4.57%. The Company will draw down the proceeds no later than December 15, 2011, and plans to execute interest rate swaps subject to favourable market conditions in order to reduce its financing costs and maximize flexibility. The Company intends to use the proceeds of the private placement to pay down part of the Company's existing revolving term facility which matures in August 2012.

2.1.3. Performance Improvement Plan

During the fourth quarter, the Company accelerated the on-going optimization of its cost structure in light of the current economic environment and outlook. Technological advancements have enabled our workforce to become increasingly mobile. This increased mobility of our workforce along with the growth in our global delivery centres evolved our real estate needs. As a result, and in order to remain competitive, a total pre-tax charge of \$45.4 million was taken mainly comprised of provisions on excess real estate, related leasehold improvements and severance costs in the amount of \$33.7 million. Also, through a review of the Company's business solutions portfolio and following the deferral of investments by some of our clients, management decided to lower the outlook for certain of the Company's business solution investments and therefore, resulted in the impairment of two business solutions. An impairment charge of \$11.7 million was taken on these solutions primarily for the financial services market. Of the \$45.4 million charge, \$29.6 million is included in "Cost of services, selling and administrative" while the \$11.7 million impairment charge and \$4.1 million of leasehold improvements write-off is included in "Amortization" on the Consolidated Statement of Earnings. Please see section 7 – Fourth Quarter Results for more information.

2.2. KEY PERFORMANCE MEASURES DEFINED

We use a combination of financial measures, ratios, and non-GAAP measures to assess our Company's performance. The table below summarizes our most relevant key performance measures. The calculated results and discussion of each indicator follow in the subsequent sections.

Profitability	<ul style="list-style-type: none"> Adjusted EBIT – is a measure of earnings before items not directly related to the cost of operations, such as financing costs, acquisition-related and integration costs and income taxes (see definition on page 5). Management believes this best reflects the profitability of our operations. Diluted earnings per share attributable to shareholders of CGI – is a measure of earnings generated for shareholders on a per share basis, assuming all dilutive elements are exercised.
Liquidity	<ul style="list-style-type: none"> Cash provided by continuing operating activities – is a measure of cash generated from managing our day-to-day business operations. We believe strong operating cash flow is indicative of financial flexibility, allowing us to execute our corporate strategy. Days sales outstanding – is the average number of days to convert our trade receivables and work in progress into cash. Management tracks this metric closely to ensure timely collection, healthy liquidity, and is committed to a DSO below its 45-day target.
Growth	<ul style="list-style-type: none"> Constant currency growth – is a measure of revenue growth before foreign currency impacts. This growth is calculated by translating current period results in local currency using the conversion rates in the equivalent period from the prior year. We believe that it is helpful to adjust revenue to exclude the impact of currency fluctuations to facilitate period-to-period comparisons of business performance. Backlog – represents management's best estimate of revenue to be realized in the future based on the terms of respective client agreements active at a point in time. Book-to-Bill ratio – is a measure of the proportion of the value of our contract wins to our revenue in the period. This metric allows management to monitor the Company's business development efforts to ensure we grow our backlog and our business over time. Management remains committed to maintaining a target ratio greater than 100% over a 12-month period. Management believes that the longer period is a more effective measure as the size and timing of bookings could cause this measurement to fluctuate significantly if taken for only a three-month period.
Capital Structure	<ul style="list-style-type: none"> Net Debt to Capitalization ratio – is a measure of our level of financial leverage net of our cash and cash equivalents, short-term investments and marketable long-term investments. Management uses this metric to monitor the proportion of debt versus capital used to finance our operations and it provides insight into our financial strength. Return on Equity – is a measure of the rate of return on the ownership interest of our shareholders. Management looks at ROE to measure its efficiency at generating profits for the Company's shareholders and how well the Company uses the invested funds to generate earnings growth. Return on Invested Capital – is a measure of the Company's efficiency at allocating the capital under its control to profitable investments. Management examines this ratio to assess how well it is using its money to generate returns.

2.3. SELECTED YEARLY INFORMATION & KEY PERFORMANCE MEASURES

As at and for the year ended September 30 (in thousands of dollars unless otherwise noted)	2011	2010	2009	Change 2011/2010	Change 2010/2009
Growth					
Backlog ¹ (in millions of dollars)	13,456	13,320	10,893	1.0%	22.3%
Bookings (in millions of dollars)	4,875	4,643	4,059	5.0%	14.4%
Book-to-bill ratio	113%	124%	106%		
Revenue	4,323,237	3,732,117	3,825,161	15.8%	-2.4%
Year-over-year growth	15.8%	-2.4%	3.2%		
Constant currency growth ²	18.9%	3.4%	-1.9%		
Profitability					
Adjusted EBIT ³	561,952	511,902	460,741	9.8%	11.1%
Adjusted EBIT margin	13.0%	13.7%	12.0%		
Net earnings	435,065	362,766	317,205	19.9%	14.4%
Net earnings margin	10.1%	9.7%	8.3%		
Basic EPS (in dollars) ⁴	1.64	1.27	1.03	29.1%	23.3%
Diluted EPS (in dollars) ⁴	1.58	1.24	1.02	27.4%	21.6%
Liquidity					
Cash provided by continuing operating activities	571,215	552,367	630,244	3.4%	-12.4%
As a percentage of revenue	13.2%	14.8%	16.5%		
Days sales outstanding ⁵	53	47	39	12.8%	20.5%
Capital structure					
Net debt to capitalization ratio ⁶	26.8%	30.6%	n/a		
Net debt (cash)	897,418	1,010,816	(66,034)	-11.2%	1630.8%
Return on equity ⁷	19.5%	16.4%	14.2%		
Return on invested capital ⁸	14.1%	16.3%	14.0%		
Balance sheet					
Cash, cash equivalents, bank overdraft and short-term investments	92,389	141,020	343,427	-34.5%	-58.9%
Total assets	4,685,543	4,607,191	3,899,910	1.7%	18.1%
Long-term financial liabilities ⁹	728,809	1,159,198	349,362	-37.1%	231.8%

¹ Backlog includes new contract wins, extensions and renewals ("bookings"), partially offset by the backlog consumed during the year as a result of client work performed and adjustments related to the volume, cancellation and/or the impact of foreign currencies to our existing contracts. Backlog incorporates estimates from management that are subject to change.

² Constant currency growth is adjusted to remove the impact of foreign currency exchange rate fluctuations. Please refer to page 19 for details.

³ Adjusted EBIT is a non-GAAP measure for which we provide the reconciliation to its closest GAAP measure on page 24.

⁴ Earnings per share ("EPS") amounts are attributable to shareholders of CGI.

⁵ Days sales outstanding is obtained by subtracting deferred revenue from trade accounts receivable and work in progress; the result is divided by the quarter's revenue over 90 days.

⁶ The net debt to capitalization ratio represents the proportion of long-term debt and bank overdraft, net of cash and cash equivalents, short-term and marketable long-term investments ("net debt") over the sum of shareholders' equity attributable to shareholders of CGI and long-term debt. Net debt and capitalization are both net of the fair value of forward contracts. At the end of fiscal 2009, the net debt to capitalization ratio was negative (a net cash position) and therefore shown as not applicable ("n/a").

⁷ The return on equity ratio is calculated as the proportion of earnings from continuing operations for the year over the last four quarters' average equity attributable to shareholders of CGI.

⁸ The return on invested capital ratio represents the proportion of the after-tax adjusted EBIT over the last four quarters' average invested capital, which is defined as the sum of equity attributable to shareholders of CGI, long-term debt and bank overdraft, less cash and cash equivalents, short-term and marketable long-term investments, net of the impact of the fair value of forward contracts.

⁹ Long-term financial liabilities include the long-term portion of debt and other long-term liabilities.

2.4. STOCK PERFORMANCE

2.4.1. FY 2011 Trading Summary

CGI's shares are listed on the Toronto Stock Exchange ("TSX") (stock quote – GIB.A) and the New York Stock Exchange ("NYSE") (stock quote – GIB) and are included in the S&P/TSX Composite Index, the S&P/TSX Capped Information Technology and Midcap Indices, and the Dow Jones Sustainability Index.

TSX	(CDN\$)	NYSE	(US\$)
Open:	15.27	Open:	15.03
High:	24.30	High:	25.63
Low:	15.27	Low:	14.88
Close:	19.71	Close:	18.81
CDN average daily trading volumes:	1,150,372	U.S. average daily trading volumes:	259,029

Includes the average daily volumes of both the TSX and alternative trading systems.

2.4.2. Share Repurchase Program

On January 26, 2011, the Company's Board of Directors authorized and received the approval from the TSX for the renewal of the Normal Course Issuer Bid ("NCIB") to purchase up to 10% of the public float of the Company's Class A subordinate shares over the next 12 months. The NCIB enables CGI to purchase, on the open market, up to 23,006,547 Class A subordinate shares for cancellation. The Class A subordinate shares may be purchased under the NCIB commencing February 9, 2011 and ending on the earlier of February 8, 2012, or the date on which the Company has either acquired the maximum number of Class A subordinate shares allowable under the NCIB, or elects to terminate the NCIB.

During fiscal year 2011, the Company repurchased 16,373,400 of its Class A subordinate shares for \$305.0 million at an average price of \$18.63, under the current and previous NCIB. As at September 30, 2011, the Company may purchase up to an additional 13.3 million shares under the current NCIB.

2.4.3. Capital Stock and Options Outstanding (as at November 3, 2011)

227,289,487 Class A subordinate shares

33,608,159 Class B shares

26,372,456 options to purchase Class A subordinate shares

3. Financial Review

3.1. BOOKINGS AND BOOK-TO-BILL RATIO

The Company achieved a book-to-bill ratio of 113% for the year. Of the \$4.9 billion in bookings signed during the year, 63% came from new business, while 37% came from extensions and renewals.

Our largest vertical markets for bookings were government and financial services, making up approximately 54% and 24% of total bookings, respectively. From a geographical perspective, U.S. accounted for 64% of total bookings, followed by Canada at 31% and Europe at 5%.

Information regarding our bookings is a key indicator of the volume of our business over time. However, due to the timing and transition period associated with outsourcing contracts, the realization of revenue related to these bookings may fluctuate from period to period. The values initially booked may change over time due to their variable attributes, including demand-driven usage, modifications in the scope of work to be performed caused by changes in client requirements as well as termination clauses at the option of the client. As such, information regarding our bookings is not comparable to, nor should it be substituted for an analysis of our revenue; it is instead a key indicator of our future revenue used by the Company's management to measure growth.

3.1.1. Significant Bookings in the Year

ANNOUNCEMENT DATE	CLIENT	DURATION	VALUE
October 21, 2010	U.S. General Services Administration <i>CGI has been selected as one of the 11 companies awarded a five-year, government-wide Blanket Purchase Agreement for Infrastructure as a Service by the U.S. General Services Administration. During this contract CGI will offer government agencies virtual machines and Web hosting services in a cloud environment.</i>	Five years	US\$76.0 million
November 5, 2010	SaskEnergy <i>CGI's work includes the replacement of SaskEnergy's legacy customer and billing information system utilizing Oracle's Customer Care and Billing application to manage critical business functions including customer service, billing, collections and meter management.</i>	Seven years	Not released
November 17, 2010	U.S. Defense Information Technology Contracting Organization <i>CGI will support the Kyrgyzstan Border Service's efforts to better coordinate control of their border as well as provide information technology support to the U.S. Army Communications-Electronics Command's counter narcotics efforts.</i>	Five years	US\$28.0 million
January 11, 2011	U.S. Department of Housing and Urban Development ("HUD") <i>In conjunction with state and local housing agencies, CGI administers HUD's multi-family housing programs in California, Florida, New York, Ohio, and Washington, DC. CGI's contract is performance-based and, since its award 10 years ago, the company has demonstrated a strong track record of performance on behalf of its partner housing agencies.</i>	Until Sept 30, 2011	US\$40.3 million
January 12, 2011	Industrial Alliance Insurance and Financial Services, Inc. <i>CGI will continue to support the strategic growth of Industrial Alliance, the fourth largest life and health insurance firm in Canada, by becoming its preferred IT vendor delivering a wide range of IT services.</i>	Ten year extension and expansion	\$137.0 million
January 12, 2011	Centers for Medicare & Medicaid Services <i>CGI will continue software development and operational support services for the Provider Enrollment Chain Ownership System including Health Information Technology for Economic and Clinical Health registration and attestation functionality.</i>	Five years	US\$55.0 million
January 18, 2011	Société Générale Corporate & Investment Banking ("SG CIB") <i>CGI will provide application development and support services using its global delivery centres to SG CIB locations in Paris, London, New York, Singapore and Hong Kong.</i>	Three years	Not released

ANNOUNCEMENT DATE	CLIENT	DURATION	VALUE
March 2, 2010	Highmark Blue Cross Blue Shield <i>CGI will provide comprehensive claims audit services to identify provider overpayments and coding errors on claims submitted from providers throughout the Commonwealth of Pennsylvania. The work will be performed by consultants, claims investigators, clinicians, and coding specialists using the company's proprietary Customized Audit System software—an enterprise-wide solution designed to support the prediction, identification, management, and analysis of claims.</i>	Five year renewal	Not released
April 26, 2011	State of California Franchise Tax Board ("FTB") <i>CGI's innovative solution will support fundamental changes in FTB's tax processing that will generate an estimated \$2.8 billion in additional revenue for the State by 2016-2017, helping to narrow its substantial tax revenue gap. The Enterprise Data to Revenue project will be a performance-based, benefits-funded contract where CGI is paid from a percentage of the increased revenues generated. The contract includes a five-year option for maintenance and operation valued at an additional \$139 million.</i>	Five and a half years	US\$399.0 million
May 17, 2011	Space and Naval Warfare Systems Center <i>CGI will continue to provide production execution, testing, and technical support for U.S. military Command, Control, Communications, Computers, Combat Systems, Intelligence, Surveillance and Reconnaissance (C5ISR) mission modules.</i>	Not Released	US\$49.0 million
May 18, 2011	Environmental Protection Agency ("EPA") <i>Under the multi-vendor ITS-EPA II Program Blanket Purchase Agreement, CGI will partner with EPA to develop and implement a new cyber security approach focused on strengthening the internal security posture, streamlining processes, re-engineering operations, and enhancing service tracking.</i>	Seven years	US\$34.0 million
May 19, 2011	Evraz <i>CGI will provide IT services support to its North American operations.</i>	Until 2016	Not released
May 31, 2011	Commonwealth of Pennsylvania, Department of Public Welfare <i>CGI will help prevent, detect, deter and correct provider improper payments within Pennsylvania's Medicaid Medical Assistance program. CGI will use its proprietary data mining software, the Customized Audit System, to conduct reviews of claims and records, identify over and underpayments for recovery, and provide support for appeals activities.</i>	Four year renewal	US\$44.9 million
June 7, 2011	University Health Network <i>CGI's solution will provide a secure, shared repository for storage, retrieval and viewing of diagnostic images such as X-rays and MRIs, and associated documents across multiple hospital sites in greater Toronto and central Ontario.</i>	Seven years	\$50.0 million
July 22, 2011	State of Alaska's Department of Administration <i>CGI will provide services for project management, business process redesign, system configuration and development, data conversion and training. The State will subscribe to CGI's managed services offering, Managed Advantage, for application maintenance, technical upgrades and help desk support.</i>	Seven years	US\$54.0 million
July 22, 2011	Encana Corporation <i>CGI will manage over 370 custom applications Encana requires to run its business. CGI is leveraging its near-shore delivery capabilities and predictive cost model to minimize risk and reduce cost.</i>	Five years	Not released
August 10, 2011	Scotiabank <i>CGI will replace multiple legacy trade and supply chain applications at Scotiabank with a single, integrated platform to enhance service to clients, reduce costs, and provide greater visibility and transparency into its North America, Latin America, Caribbean and Asia operations.</i>	Seven years	Not released
September 13, 2011	Environmental Protection Agency <i>CGI will continue to support EPA's Central Data Exchange through a wide range of technology services, including information assurance/cyber security, web application and systems development, program management, user support, and operations and maintenance services.</i>	Six year renewal	US\$207.0 million
September 15, 2011	Wake County, NC <i>CGI will host the system and securely manage day-to-day operations under its Managed Advantage program, which includes application maintenance, technical upgrades, disaster recovery services, and client support. The County will benefit from a single point of accountability for software, services, and hosting as well as a predictable cost over the contract term for product upgrades, infrastructure, and maintenance.</i>	Twelve years	US\$30.5 million

ANNOUNCEMENT DATE	CLIENT	DURATION	VALUE
October 3, 2011	Environmental Protection Agency	Five years	US\$64.5 million
<i>CGI will provide production application platform management to support EPA's primary data center, the National Computing Center, including support for application deployment checklist process, management of numerous applications platforms, and delivery of technical consulting services. This contract was signed prior to but announced subsequent to our year-end.</i>			
October 5, 2011	Wyoming State Auditor's Office	Five year renewal	US\$28.7 million
<i>CGI will continue to provide secure day-to-day ERP operations management, including application maintenance, technical upgrades, disaster recovery services, and client support. This contract was signed prior to but announced subsequent to our year-end.</i>			

3.1.2. Significant Contract Vehicles

In addition to the significant bookings outlined above, CGI also participates in a number of contract vehicles that simplify and streamline the procurement process. Ordering against these vehicles meets U.S. federal requirements for full and open competition, and assures that our past performance credentials have been thoroughly validated. These contract vehicles offer CGI the flexibility to respond to broad agency requirements in a quick and efficient manner. Bookings are registered only when a specific task order is awarded from the contract vehicles. The key vehicles are outlined below along with their term and total value.

CONTRACT VEHICLES	TERM	VEHICLE US\$ CEILING*
US Army AMCOM EXPRESS	March 1, 2005 to January 31, 2012	Not released
GSA Alliant	May 1, 2009 to April 30, 2014	\$50.0 billion
Navy Seaport-e	April 5, 2004 to April 4, 2014 <i>With five option years</i>	\$39.0 billion
NIH CIO SP2	December 20, 2000 to December 20, 2011	\$19.5 billion
DISA ENCORE	Ending May 31, 2013 <i>Includes five one-year options</i>	\$12.2 billion
US Army FIRST	January 1, 2007 to January 1, 2014	\$9.0 billion
CMS-ESD	September 14, 2007 to September 13, 2017	\$4.0 billion
EPA-ITS	July 1, 2009 to September 30, 2016	\$955.0 million
US Marine Corps CEOss	September 5, 2006 to September 30, 2016	\$500.0 million
Awarded in FY 2011		
VA T-4	Five years	\$12.0 billion
CDC CIMS	Two years <i>With four two-year options</i>	\$4.0 billion
Treasury TIPSS 4	December 28, 2010 to December 27, 2020 <i>With nine option years</i>	\$4.0 billion
US Army OPTARSS II	March 1, 2011 to March 1, 2016	\$2.5 billion
GSA Infrastructure (IaaS)	Years 2010 to 2015	\$76.0 million

* Vehicle US\$ Ceiling are for all awarded vendors including CGI Group Inc.

3.2. FOREIGN EXCHANGE

The Company operates globally and is exposed to changes in foreign currency rates. We report all dollar amounts in Canadian dollars. Accordingly, we value assets, liabilities and transactions that are measured in foreign currencies using various exchange rates as prescribed by GAAP.

Closing foreign exchange rates

As at September 30,	2011	2010	2009	Change 2011/2010	Change 2010/2009
U.S. dollar	1.0389	1.0298	1.0722	0.9%	-4.0%
Euro	1.3971	1.4006	1.5686	-0.2%	-10.7%
Indian rupee	0.0212	0.0231	0.0223	-8.2%	3.6%
British pound	1.6231	1.6198	1.7158	0.2%	-5.6%

Average foreign exchange rates

For the years ended September 30,	2011	2010	2009	Change 2011/2010	Change 2010/2009
U.S. dollar	0.9866	1.0407	1.1804	-5.2%	-11.8%
Euro	1.3759	1.4116	1.5944	-2.5%	-11.5%
Indian rupee	0.0219	0.0226	0.0242	-3.1%	-6.6%
British pound	1.5845	1.6227	1.8235	-2.4%	-11.0%

3.3. REVENUE DISTRIBUTION

The following charts provide additional information regarding our revenue mix for the year:

Contract Types

- A. Management of IT and business functions (outsourcing) – 68%
 - 1. IT services – 51%
 - 2. Business process services – 17%
- B. Systems integration and consulting – 32%

Client Geography

Based on client's domicile

- A. U.S. – 47%
- B. Canada – 47%
- C. Europe – 6%

Vertical Markets

- A. Government – 39%
- B. Financial services – 26%
- C. Manufacturing, retail and distribution – 14%
- D. Telecommunications and utilities – 13%
- E. Health – 8%

3.3.1. Client Concentration

Canadian GAAP guidance on Segment Disclosures defines a single customer as a group of entities that are known to the reporting enterprise to be under common control and considers the federal government, the provincial or territorial government, the local government, or a foreign government each to be a single customer. Our work for the U.S. federal government including its various agencies represented 28.5% of our revenue for fiscal 2011 as compared to 13.7% in fiscal 2010, and 10.3% in fiscal 2009.

3.4. REVENUE VARIATION AND REVENUE BY SEGMENT

The following table provides a summary of our revenue growth, in total and by segment, separately showing the impacts of foreign currency exchange rate variations between the 2011 and 2010 fiscal periods. The 2010 and 2009 revenue by segment is recorded reflecting the actual foreign exchange rates for that year. The foreign exchange impact is the difference between the current period's actual results and the current period's results converted with prior year's foreign exchange rates.

For the years ended September 30				Change	Change
(in thousands of dollars except for percentage)	2011	2010	2009	2011/2010	2010/2009
Total CGI Revenue	4,323,237	3,732,117	3,825,161	15.8%	-2.4%
Variation prior to foreign currency impact	18.9%	3.4%	-1.9%		
Foreign currency impact	-3.1%	-5.8%	5.1%		
Variation over previous period	15.8%	-2.4%	3.2%		
Global Infrastructure Services					
Revenue prior to foreign currency impact	816,891	857,955	928,897	-4.8%	-6.0%
Foreign currency impact	(4,807)				
Global Infrastructure Services revenue	812,084	857,955	928,897	-5.3%	-7.6%
Canada					
Revenue prior to foreign currency impact	1,339,704	1,345,445	1,335,455	-0.4%	1.3%
Foreign currency impact	(3,324)				
Canada revenue	1,336,380	1,345,445	1,335,455	-0.7%	0.7%
U.S.					
Revenue prior to foreign currency impact	2,058,064	1,335,795	1,310,093	54.1%	14.6%
Foreign currency impact	(104,053)				
U.S. revenue	1,954,011	1,335,795	1,310,093	46.3%	2.0%
Europe					
Revenue prior to foreign currency impact	224,653	192,922	250,716	16.4%	-13.9%
Foreign currency impact	(3,891)				
Europe revenue	220,762	192,922	250,716	14.4%	-23.1%

For fiscal 2011, revenue was \$4,323.2 million, an increase of \$591.1 million or 15.8% compared to fiscal 2010. On a constant currency basis, revenue grew by 18.9% year-over year, while foreign exchange fluctuations negatively impacted our revenue by \$116.1 million or 3.1% mainly due to the fluctuations of the U.S. dollar exchange rate. We experienced a significant increase in revenue in our U.S. segment primarily due to the inclusion of a full year's revenue from Stanley, Inc. ("Stanley"), a U.S. federal government contractor. Stanley was acquired on August 17, 2010. On a constant currency basis, our government vertical market grew the most over the past year at 58.8% followed by our health and MRD vertical markets at 21.5% and 10.6%, respectively.

The economic challenges of fiscal 2009 continued into the first quarter of our fiscal 2010; by the second quarter, our results were showing modest signs of recovery in North America while our Europe segment continued to feel its effects. We ended fiscal 2010 with revenue of \$3,732.1 million, a decrease of \$93.0 million or 2.4% over fiscal 2009. On a constant currency basis, our revenue grew by 3.4% while fluctuations in foreign exchange rates unfavourably impacted our revenue by \$223.3 million or 5.8%. On a constant currency basis from fiscal 2009 to 2010, our health vertical market grew the most at 33.9% followed by our government vertical market at 8.2%.

3.4.1. Global Infrastructure Services

Revenue for GIS was \$812.1 million in fiscal 2011, compared to \$858.0 million in the prior year representing a decrease of \$45.9 million or 5.3% over fiscal 2010. There was a \$4.8 million unfavourable foreign exchange impact included in the revenue of GIS. The change is due to the expiration of an outsourcing contract in our financial services vertical market.

For the year ended September 30, 2010, revenue from our GIS operating segment was \$858.0 million representing a decrease of \$70.9 million or 7.6% over fiscal 2009 revenue of \$928.9 million. In fiscal 2009, a larger than normal volume of IT projects were started especially for our clients in the MRD vertical market. The volume reduced in the following year causing the majority of the decrease for the segment.

3.4.2. Canada

Revenue in Canada was \$1,336.4 million in fiscal 2011, a decrease of \$9.1 million or 0.7% over fiscal 2010. The decrease came from lower work volumes and delays in project start-ups from our clients, particularly in the telecommunications & utilities and government vertical markets. The government vertical market was also impacted by the expiration of a low margin contract. In addition, with the disposition of CIA in April 2011, revenue in Canada was unfavourably impacted by approximately \$17.3 million in fiscal 2011. These decreases were partially offset by growth in the MRD and health vertical markets.

Revenue in Canada was \$1,345.4 million in fiscal 2010, an increase of \$10.0 million or 0.7% over fiscal 2009. The increase comes mostly from financial services clients, partially offset by decreases in telecommunications & utilities and government clients.

3.4.3. U.S.

Revenue in U.S. was \$1,954.0 million in fiscal 2011, an increase of \$618.2 million or 46.3% over fiscal 2010. On a constant currency basis, revenue in this segment rose by \$722.3 million or 54.1%. The unfavourable foreign currency fluctuations caused a decrease of \$104.1 million. The increase in revenue was mainly generated by the growth from the government vertical market, mostly due to the full year's impact of the acquisition of Stanley. In addition, we have seen increases in volumes of work from our health vertical market and from work being delivered out of our global delivery centres. This growth was partially offset by decreases experienced with state and local government clients, and with clients in our financial services vertical market.

U.S. revenue was \$1,335.8 million in fiscal 2010, an increase of \$25.7 million or 2.0% over fiscal 2009. On a constant currency basis, revenue in this segment rose by 14.6%. Part of this growth is from a combination of new contracts won in the fiscal 2010 and the contracts that came on stream in the latter part of fiscal 2009. These contracts were mostly in the financial services, government and health vertical markets. The increase is also partially attributed to the revenue growth generated by the acquisition of Stanley, reflecting six weeks of operations in fiscal 2010.

3.4.4. Europe

Revenue for Europe was \$220.8 million in fiscal 2011, compared to \$192.9 million in the prior year representing an increase of \$27.8 million or 14.4% over fiscal 2010. Before foreign currency impacts, revenue increased by \$31.7 million or 16.4%, with growth across all our major geographies. The unfavourable foreign exchange rate fluctuations negatively impacted revenue by \$3.9 million, mostly due to the devaluation of the euro and British pound. Higher work volumes came from new and existing clients in the financial services and telecommunications & utilities vertical markets.

Revenue in Europe was \$192.9 million in fiscal 2010 compared to \$250.7 million in fiscal 2009, a decrease of \$57.8 million or 23.1%. Before foreign currency impacts, revenue decreased by 13.9%, reflecting the economic situation in this region where many of our clients took precautionary steps to conserve capital and therefore, decreased their spending on IT projects. Our clients in this segment are predominantly in the financial services and telecommunications & utilities vertical markets, which were the two hardest hit by the economic recession.

3.5. OPERATING EXPENSES

For the years ended September 30 (in thousands of dollars except for percentage)	% of 2011 Revenue		% of 2010 Revenue		% of 2009 Revenue	
Costs of services, selling and administrative	3,553,192	82.2%	3,025,823	81.1%	3,170,406	82.9%
Foreign exchange gain	(3,279)	(0.1%)	(916)	(0.0%)	(1,747)	(0.0%)
Amortization	211,372	4.9%	195,308	5.2%	195,761	5.1%
<i>Capital assets</i>	<i>78,627</i>	<i>1.8%</i>	<i>72,067</i>	<i>1.9%</i>	<i>61,412</i>	<i>1.6%</i>
<i>Contract costs related to transition costs</i>	<i>23,100</i>	<i>0.5%</i>	<i>30,396</i>	<i>0.8%</i>	<i>22,377</i>	<i>0.6%</i>
<i>Other intangible assets</i>	<i>97,926</i>	<i>2.3%</i>	<i>92,845</i>	<i>2.5%</i>	<i>100,829</i>	<i>2.6%</i>
<i>Impairment of other intangible assets</i>	<i>11,719</i>	<i>0.3%</i>	-	0.0%	<i>11,143</i>	<i>0.3%</i>

3.5.1. Costs of Services, Selling and Administrative

When compared to fiscal 2010, costs of services, selling and administrative expenses increased by \$527.4 million mainly due to the acquired business of Stanley. The translation of the results of our foreign operations from their local currencies to the Canadian dollar favourably impacted costs by \$103.0 million, partially offsetting the unfavourable translation impact of \$116.1 million on revenue. As a percentage of revenue, costs of services, selling and administrative increased by 1.1% to 82.2% from 81.1% for fiscal 2010. Our costs of services increased as a percentage of revenue due mostly to the impact of including the first full year of operations from the acquisition of Stanley with its higher proportion of cost-plus contracts. In addition, some of our offices experienced delays in project start-ups which resulted in under utilization of our resources and therefore, impacted our direct costs. The Company incurred \$43.2 million in our fiscal year related primarily to the rationalization of excess real estate in our operations and severance costs to realign our workforce, as explained in section 2.1.3. This was \$16.8 million more than the \$26.4 million incurred in the prior year for similar expenses. The variances were also offset partially by the favourable impact from a license sale for \$10.2 million and the settlement of a bad debt during the first quarter of the fiscal year. Our selling and administrative expenses, as a percentage of revenue, decreased as we continued to rationalize our facilities and other fixed costs. Our costs of services are primarily driven by expenses associated with our human resources which can vary due to performance based adjustments to our profit sharing amounts and other compensation accruals in the period.

In 2010, costs of services, selling and administrative expenses decreased by \$144.6 million. The translation of the results of our foreign operations from their local currencies to the Canadian dollar favourably impacted costs by \$189.3 million, partially offsetting the \$223.3 million of unfavourable exchange rate fluctuations noted in our revenue section. In terms of a percentage of revenue, our costs of services, selling and administrative expenses improved from 82.9% to 81.1%. The improvement is due to the numerous initiatives taken in the prior two years to improve our gross margin. In 2010, we incurred approximately \$26.4 million on severances and the elimination of excess real estate. Our selling and administrative expenses as a percentage of revenue decreased slightly from the prior year.

3.5.2. Foreign Exchange Gain

This line item includes the realized and unrealized foreign exchange impact on our earnings. The Company, in addition to its natural hedge, has a strategy in place to manage its exposure, to the extent possible, to exchange rate fluctuations through the effective use of forward contracts.

3.5.3. Amortization

Amortization for fiscal 2011 increased by \$16.1 million to \$211.4 million representing 4.9% of revenue. This compares to \$195.3 million incurred in fiscal 2010 representing 5.2% of revenue. The increase in expense is primarily related to the impairment of business solutions and the write-off of leasehold improvements as a result of exited space in the total amount of \$15.8 million. The translation of the results of our foreign operations from their local currencies to the Canadian dollar favourably impacted amortization expense for \$4.8 million.

In fiscal 2010, total amortization decreased by \$0.5 million compared to fiscal 2009 and the ratio of expense to revenue remained relatively stable. The translation of the results of our foreign operations from their local currencies to the Canadian dollar favourably impacted amortization expense for \$8.2 million in 2010.

For fiscal year 2011, the increase of \$6.6 million in amortization expense for capital assets over 2010 is mainly due to the write-off of leasehold improvements associated with certain facilities in North America which were exited for approximately \$4.1 million. In addition, amortization of computer equipment increased in line with the investments made to support new contracts and to upgrade our data centre infrastructure.

When comparing fiscal 2010 to 2009, the amortization of capital assets increased by \$10.7 million. The majority of the increase related to the full year's impact of equipment purchased the previous year to support our new contracts and to improve our data centre infrastructure. This was partially offset by the decrease in amortization of leasehold improvements which resulted from accelerated amortization taken on excess space and workspace densification efforts over the past couple of years decreasing the need for leased space and the associated leasehold improvements.

In fiscal 2011, amortization of contract costs decreased by \$7.3 million to \$23.1 million compared to fiscal 2010. The decrease is due to the impact of successfully completed projects partially offset by the amortization of transition costs on new contracts awarded to us in the prior periods. Additionally, in 2010, amortization expense was higher due to the modification of two contracts. When comparing 2010 and 2009 the amortization of contract costs increased by \$8.0 million. This reflects the accelerated amortization of contract costs for the modification of two contracts as well as the start-up of new, large contracts signed over the prior quarters.

For fiscal 2011, amortization of other intangible assets increased by \$5.1 million to \$97.9 million compared to \$92.8 million in fiscal 2010. The increase is due to the amortization of new client relationships relating to the Stanley acquisition and to new software licenses required to support our growth. These increases were partially offset by lower amortization from other client relationships and certain business solutions that have been fully amortized over the last year.

Amortization of other intangible assets decreased by \$8.0 million in fiscal 2010 when compared to fiscal 2009. This is mainly attributable to the lower amortization associated on certain client relationships being fully amortized and the acceleration of amortization on certain business solutions at the end of fiscal 2009. In addition, over the last two years, we have expanded the utilization of our offshore resources to reduce our investment cost in business solutions. Our results incorporated incremental amortization of \$3.6 million mainly pertaining to client relationships associated with the acquisition of Stanley.

In the last quarter of fiscal 2011, due to the current economic environment outlook and the deferral of investment decisions by some of our clients, an impairment charge of \$11.7 million was taken on certain business solutions primarily serving the financial markets. No impairment charges were taken in fiscal 2010. At the end of fiscal 2009, a charge of \$11.1 million was taken predominantly for other solutions deemed impaired for the financial markets.

3.6. ADJUSTED EBIT BY SEGMENT

For the years ended September 30 (in thousands of dollars except for percentage)	2011	2010	2009	Change 2011/2010	Change 2010/2009
Global Infrastructure Services	106,902	89,225	85,720	19.8%	4.1%
As a percentage of GIS revenue	13.2%	10.4%	9.2%		
Canada	263,700	259,075	212,546	1.8%	21.9%
As a percentage of Canada revenue	19.7%	19.3%	15.9%		
U.S.	182,840	166,917	149,015	9.5%	12.0%
As a percentage of U.S. revenue	9.4%	12.5%	11.4%		
Europe	8,510	(3,315)	13,460	356.7%	-124.6%
As a percentage of Europe revenue	3.9%	-1.7%	5.4%		
Adjusted EBIT	561,952	511,902	460,741	9.8%	11.1%
<i>Adjusted EBIT margin</i>	<i>13.0%</i>	<i>13.7%</i>	<i>12.0%</i>		

3.6.1. Global Infrastructure Services

Adjusted EBIT in GIS was \$106.9 million, an increase of \$17.7 million over fiscal 2010. As a percentage of revenue, the margin increased from 10.4% to 13.2%. The increase is due to the favourable impacts from investments within our data centre operations and productivity improvements made in the year. This was partially offset by the expiration of an outsourcing contract in our third quarter causing a temporary increase in excess capacity. In addition, the current year was impacted by provisions for excess real estate, severance costs and leasehold improvements write-offs in the amount of \$9.3 million, an increase of \$6.7 million over last year.

In fiscal 2010, adjusted EBIT in GIS was \$89.2 million, an increase of \$3.5 million over fiscal 2009. The increase is due predominately to improvements made within our data centre operations from prior years' initiatives. The improvement was partially offset by the margin impact associated with lower work volumes from our clients as discussed above in the revenue section.

3.6.2. Canada

Canada adjusted EBIT increased by 1.8%, reaching \$263.7 million in fiscal 2011, compared to \$259.1 million in fiscal 2010. As a percentage of revenue, the margin increased from 19.3% in 2010 to 19.7% in 2011. The increase is attributed to a number of factors including higher margins associated with increased intellectual property based revenues, the collection of a \$6.5 million bad debt in the first quarter of fiscal 2011 and a reduction to the segment's incentive accruals based on its growth performance. These factors were partially offset by the impacts of the revenue decrease as outlined earlier and the incremental year-over-year expenses associated with excess real estate, severances, leasehold improvement write-offs and impairments in the amount of \$21.7 million.

In fiscal 2010, adjusted EBIT in Canada increased by \$46.5 million or 21.9% over fiscal 2009. As a percentage of revenue, the margin also increased from 15.9% to 19.3%. The increase in margin for Canada is due to prior year's initiatives to improve our gross margin in this segment. Severances and real estate provisions taken in 2010 were \$12.1 million.

3.6.3. U.S.

Adjusted EBIT in U.S. increased by \$15.9 million or 9.5% over fiscal 2010. Before the unfavourable foreign exchange impact of \$8.5 million, adjusted EBIT would have increased by \$24.4 million or 14.6% over fiscal 2010. The increase is mainly due to the Stanley acquisition and the \$10.2 million license sale in the first quarter of fiscal 2011 pertaining to the reorganization and divestment of some operations by one of our clients. The adjusted EBIT margin decreased from 12.5% to 9.4%. This is due to a number of factors: we made investments in our India delivery centres to expand our capacity in

order to respond to new opportunities; the Stanley acquisition contributed to an increase in amortization of client relationships of \$16.4 million as well as higher proportion of cost-plus contracts; and the effect of lower member utilization due to the delays in project start-ups for certain clients. Despite our bid and proposal activities to initiate new projects, the uncertainty reigning in the U.S. economy caused the pace of the federal government contract awards to be delayed to the latter half of the fiscal year, thereby increasing costs and impacting our U.S. profitability. During the year, approximately \$12.3 million was incurred primarily for severance costs, impairments, leasehold improvements write-off and excess real estate which represented an increase of \$7.2 million over fiscal 2010.

In 2010, U.S. adjusted EBIT increased by \$17.9 million or 12.0% when compared to fiscal 2009. The results for Stanley since August 17th were incorporated into our results. As a percentage of revenue, our margin increased from 11.4% to 12.5%. The improvement was the result of increased productivity in both our domestic operations and our Indian centres of excellence.

3.6.4. Europe

Adjusted EBIT from our Europe operations totalled \$8.5 million in fiscal 2011, an \$11.8 million increase compared to fiscal 2010. As a percentage of revenue, our margin also increased by 5.6% from negative 1.7% in 2010 to 3.9% in 2011. The prior year's restructuring initiatives continued to help improve our earnings margins in the current year. Revenue growth in the telecommunications & utilities and financial services vertical markets also helped improve earnings in this segment. In addition, severances and related costs incurred in fiscal 2011 totalled approximately \$3.7 million whereas in the prior fiscal year, \$6.7 million of charges were taken.

In fiscal 2010, our Europe adjusted EBIT decreased by \$16.8 million when compared to fiscal 2009. As a percentage of revenue, our margin decreased from 5.4% in 2009 to negative 1.7% in 2010. The decline in margin is primarily due to the reduction in revenue outlined earlier contributing to excess capacity across all regions of the segment. However, in certain geographies, we were limited by regulations from taking action as quickly or as significantly as we would have preferred. Severances and other related charges were taken in the amount of \$6.7 million in an effort to return this segment back to historical profitable levels.

3.7. EARNINGS FROM CONTINUING OPERATIONS BEFORE INCOME TAXES

The following table provides, for the periods indicated, a reconciliation between our adjusted EBIT and earnings from continuing operations before income taxes, which is reported in accordance with Canadian GAAP.

For the years ended September 30 (in thousands of dollars except for percentage)	% of 2011 Revenue		% of 2010 Revenue		% of 2009 Revenue	
Adjusted EBIT	561,952	13.0%	511,902	13.7%	460,741	12.0%
Acquisition-related and integration costs	3,675	0.1%	20,883	0.6%	-	0.0%
Interest on long-term debt	19,395	0.4%	17,123	0.5%	18,960	0.5%
Interest income	(3,759)	-0.1%	(2,419)	-0.1%	(2,908)	-0.1%
Other (income) expenses	(3,917)	-0.1%	(952)	0.0%	3,569	0.1%
Gain on sale of capital assets	-	0.0%	(469)	0.0%	-	0.0%
Earnings from continuing operations before income taxes	546,558	12.6%	477,736	12.8%	441,120	11.5%

3.7.1. Acquisition-Related and Integration Costs

These amounts pertained to the costs to integrate the operations and to realize synergies in regards to the acquisition of Stanley concluded in August 2010. Total acquisition-related and integration costs in fiscal 2010 and fiscal 2011 totalled \$24.6 million. Only \$3.7 million of acquisition-related and integration costs were incurred in fiscal 2011 compared to the \$5.4 million expected at the end of fiscal 2010. No more costs pertaining to the Stanley acquisition will be incurred.

3.7.2. Interest on Long-Term Debt

The year-over-year increase in interest expense for the fiscal year is mainly due to the debt used to finance the acquisition of Stanley, partially offset by the repayment of the second tranche of U.S. Senior unsecured notes that matured at the end of January 2011.

3.7.3. Interest Income

Interest income includes interest and other investment income (net of interest expenses) related to cash balances, investments, and tax assessments.

3.7.4. Other (Income) Expenses

Other (income) expenses reflects mainly changes in the fair value of certain investments related to a deferred compensation arrangement we manage as a trustee on behalf of certain U.S. employees. Any change in value related to the deferred compensation arrangement is totally offset in the compensation expense under costs of services, selling and administrative, thus not impacting our profitability.

3.8. NET EARNINGS AND EARNINGS PER SHARE

The following table sets out the information supporting the earnings per share calculations:

For the years ended September 30 (in thousands of dollars unless otherwise indicated)	2011	2010	2009	Change 2011/2010	Change 2010/2009
Earnings from continuing operations before income taxes	546,558	477,736	441,120	14.4%	8.3%
Income tax expense	111,493	114,970	125,223	-3.0%	-8.2%
Effective tax rate	20.4%	24.1%	28.4%		
Earnings from discontinued operations, net of income taxes	-	-	1,308	N/A	-100.0%
Net earnings	435,065	362,766	317,205	19.9%	14.4%
Margin	10.1%	9.7%	8.3%		
Earnings attributable to shareholders of CGI Group Inc.	434,809	362,386	316,466	20.0%	14.5%
Earnings attributable to non-controlling interest	256	380	739	-32.6%	-48.6%
Weighted average number of shares					
Class A subordinate shares and Class B shares (basic)	265,333,074	284,826,257	306,853,077	-6.8%	-7.2%
Class A subordinate shares and Class B shares (diluted)	275,286,534	292,919,950	310,345,241	-6.0%	-5.6%
Earnings per share (in dollars)¹					
Basic EPS	1.64	1.27	1.03	29.1%	23.3%
Diluted EPS	1.58	1.24	1.02	27.4%	21.6%

¹ EPS amounts are attributable to shareholders of CGI.

3.8.1. Income Tax Expense

For fiscal 2011, income tax expense was \$111.5 million, a decrease of \$3.5 million compared to \$115.0 million in the prior fiscal year, while our effective income tax rate decreased from 24.1% to 20.4%. Favourable tax adjustments reduced our income taxes in both 2011 and 2010 in the amount of \$41.4 million and \$38.0 million respectively. These adjustments pertain to final determinations from agreements with tax authorities and expiration of statutes of limitation periods. The

decrease in income tax expense and tax rate was also due to benefits arising from investments in our subsidiaries and the effect of foreign tax rate differences.

Income tax expense for fiscal 2010 and 2009 were \$115.0 million and \$125.2 million, respectively. Our effective income tax rates for fiscal years 2010 and 2009 were 24.1% and 28.4%, respectively. Included in the fiscal 2010 amount are favourable adjustments mainly from the final determinations from agreements with tax authorities and expirations of statutes of limitation periods in the amount of \$38.0 million. This is compared to the \$15.9 million of favourable adjustments in fiscal 2009.

Below is a table showing the year-over-year comparison with the favourable tax adjustments and the impact of acquisition-related and integration costs removed:

For the years ended September 30				Change	Change
<i>(in thousands of dollars unless otherwise indicated)</i>	2011	2010	2009	2011/2010	2010/2009
Earnings from continuing operations before income taxes	546,558	477,736	441,120	14.4%	8.3%
<i>Add back:</i>					
Acquisition-related and integration costs	3,675	20,883	-	-82.4%	N/A
Earnings from continuing operations before income taxes prior to adjustments	550,233	498,619	441,120	10.4%	13.0%
Income tax expense	111,493	114,970	125,223	-3.0%	-8.2%
<i>Add back:</i>					
Tax adjustments	41,415	37,964	15,850	9.1%	139.5%
Tax deduction on acquisition-related and integration costs	1,235	3,688	-	-66.5%	N/A
Income tax expense prior to adjustments	154,143	156,622	141,073	-1.6%	11.0%
<i>Effective tax rate prior to adjustments</i>	28.0%	31.4%	32.0%		
Earnings from discontinued operations, net of income taxes	-	-	1,308	N/A	-100.0%
Net earnings prior to adjustments	396,090	341,997	301,355	15.8%	13.5%
<i>Margin</i>	9.2%	9.2%	7.9%		
Earnings per share (in dollars)¹					
Basic EPS	1.49	1.20	0.98	24.2%	22.4%
Diluted EPS	1.44	1.17	0.97	23.1%	20.6%

¹ EPS amounts are attributable to shareholders of CGI and prior to tax adjustments and acquisition-related and integration costs.

We expect our effective tax rate before any significant adjustments to be in the range of 27.0% to 30.0% in subsequent periods.

3.8.2. Earnings Attributable to Non-Controlling Interest

The non-controlling interest in our statement of earnings represents the percentage of ownership of CIA held by minority shareholders. On April 4, 2011, CGI concluded a transaction whereby CIA repurchased its shares held by CGI. Accordingly, starting in the third quarter of the current fiscal year, we no longer recorded earnings attributable to a non-controlling interest.

3.8.3. Earnings from Discontinued Operations

The earnings from discontinued operations recorded in fiscal 2009 were mainly due to the Company's disposition of the net assets of our claims adjusting and risk management services business in July 2008.

3.8.4. Weighted Average Number of Shares

CGI's basic and diluted weighted average number of shares for fiscal 2011 decreased compared to the prior year due to the repurchase of shares on the open market as part of the NCIB, partly offset by the issuance of Class A subordinate shares upon the exercise of stock options. During the current fiscal year, 16.4 million shares were repurchased and 5.7 million options were exercised.

4. Liquidity

4.1. STATEMENTS OF CASH FLOWS

CGI's growth is financed through a combination of our cash flow from operations, borrowing under our existing credit facilities, the issuance of long-term debt, and the issuance of equity. One of our primary financial goals is to maintain an optimal level of liquidity through the active management of our assets and liabilities as well as our cash flows.

As at September 30, 2011, cash and cash equivalents, net of bank overdrafts, were \$82.2 million. The following table provides a summary of the generation and utilization of cash for the years ended September 30, 2011, 2010 and 2009.

For the years ended September 30 (in thousands of dollars)	2011	2010	2009	Change 2011/2010	Change 2010/2009
Cash provided by continuing operating activities	571,215	552,367	630,244	18,848	(77,877)
Cash used in continuing investing activities	(129,972)	(1,024,914)	(127,585)	894,942	(897,329)
Cash (used in) provided by continuing financing activities	(491,608)	267,311	(198,227)	(758,919)	465,538
Effect of foreign exchange rate changes on cash and cash equivalents and bank overdrafts from continuing operations	4,764	(10,367)	(11,300)	15,131	933
Net (decrease) increase in cash and cash equivalents net of bank overdraft from continuing operations	(45,601)	(215,603)	293,132	170,002	(508,735)

4.1.1. Cash Provided by Continuing Operating Activities

Cash provided by continuing operating activities was \$571.2 million in fiscal 2011, representing 13.2% of revenue. This is compared to \$552.4 million or 14.8% of revenue in the prior year. The improvement is due to the increase in our earnings partially offset by the increase in our DSO mainly related to an increasing proportion of our revenues coming from government entities. The timing of our working capital inflows and outflows will always have an impact on the cash flow from operations.

Cash provided by continuing operating activities was \$552.4 million or 14.8% of revenue for fiscal 2010. This is compared with \$630.2 million or 16.5% of revenue in fiscal 2009. In fiscal 2009, the cash flow from operations reflected the benefit of our initiatives to reduce our DSO. The reduction of 11 days from 50 days to 39 days generated a \$113.2 million year-over-year improvement. Our cash flow from operations would have increased by approximately \$35.3 million over the cash generated in fiscal 2009 when the benefit of the DSO improvement is removed. This improvement was primarily driven by the increase in our earnings in fiscal 2010.

4.1.2. Cash Used in Continuing Investing Activities

Cash used in continuing investing activities decreased by \$894.9 million in fiscal 2011 compared to fiscal 2010, which was almost entirely due to the acquisition of Stanley. In fiscal 2010, the Company acquired Stanley for a cash consideration of \$899.6 million, net of the cash acquired.

Short-term investments, comprised of term deposits, have original maturities over three months, but not more than one year, at the date of purchase. In 2011, the Company had net cash inflows of \$2.0 million whereas in the prior year, \$12.9 million was disbursed for the purchase of investments.

Cash used for the purchase of capital assets amounted to \$65.3 million during the year, an increase of \$17.6 million over the \$47.7 million invested the previous fiscal year. The increase was due to a higher investment in additional computer equipment to support our new contracts and continued investment program as well as increase in leasehold improvements in certain offices in the U.S.

Cash used for the purchase of capital assets was \$47.7 million in fiscal 2010, a decrease of \$21.5 million from fiscal 2009's investment level of \$69.2 million. The decrease was due to a higher investment in equipment in 2009 for infrastructure upgrades to our data centres. Also, as part of our restructuring efforts in 2009, less office space was needed and as a result, fewer investments were made on leasehold improvements in 2010.

Investments in intangible assets amounted to \$56.0 million, representing a decrease of \$13.7 million from the previous fiscal year. The decrease is partially due to less contract costs capitalized as projects migrated out of their transition phase. In addition, lower levels of spending incurred on software licenses also contributed to the decrease.

Investments in intangible assets amounted to \$69.7 million in fiscal 2010, an increase of \$7.4 million from fiscal 2009. The increase is partially due to new transition costs capitalized on contracts signed with new and existing clients, and additional software license costs capitalized in response to new contracts for our services.

The Company purchased \$14.2 million in long-term marketable investments for the year ended September 30, 2011. No such investments were made in the prior fiscal years.

4.1.3. Cash (Used) Provided by Continuing Financing Activities

During the year ended September 30, 2011, we used \$491.6 million for financing activities, a change of \$758.9 million when compared to \$267.3 million provided by financing activities a year ago. The large difference is mostly due to the drawing on our credit facilities for the acquisition of Stanley in fiscal 2010.

In fiscal 2011, we repaid \$234.0 million of our long-term debt and credit facilities; whereas in fiscal 2010, the Company drew US\$100.0 million from its credit facilities to create a hedge in the second quarter of 2010 to protect our U.S. dollar denominated cash balances from fluctuations in the exchange rate. In the last quarter of 2010, we drew another US\$800.0 million from our credit facilities to fund the acquisition of Stanley. We also repaid portions of our long-term debt and credit facilities in the amount of \$207.9 million in fiscal 2010. In fiscal 2009, we drew \$144.7 million from our credit facilities.

In fiscal 2011, we used \$305.0 million to repurchase 16.4 million CGI shares under the current and previous NCIB. In fiscal 2010, we used \$516.7 million to repurchase 35.6 million CGI shares. Fewer shares were repurchased this year compared to the prior year as some funds were allocated for debt reduction. In fiscal 2009, we used \$101.7 million as 9.5 million CGI shares were bought back at a lower average share price.

The current fiscal year yielded \$52.1 million from the exercise of stock options compared to \$53.0 and \$16.1 million received in fiscal 2010 and 2009, respectively. Issuances of our shares have increased since fiscal 2010 due to more exercises as our share price became more favourable to option holders.

In the second quarter of 2009, there was also a positive cash impact of \$18.3 million resulting from the settlement of our cash flow hedges associated with the payment of the first tranche of our Senior U.S. unsecured notes. No principal payments were due on these notes during fiscal 2010.

4.1.4. Effect of Foreign Exchange Rate Changes on Cash and Cash Equivalents and Bank Overdrafts from Continuing Operations

For the year ended September 30, 2011, there was a \$4.8 million increase in cash from the effect of foreign exchange rate changes. For the years ended September 30, 2010 and 2009, foreign exchange changes caused a decrease of \$10.4 and \$11.3 million in cash and cash equivalents, respectively. These amounts had no effect on net earnings as they were recorded in other comprehensive income.

4.2. CAPITAL RESOURCES

<i>(in thousands of dollars)</i>	Total commitment	Available at September 30, 2011	Outstanding at September 30, 2011
	\$	\$	\$
Cash and cash equivalents	—	157,761	—
Bank overdraft	—	(75,538)	—
Short-term investments	—	10,166	—
Long-term marketable investments	—	15,309	—
Unsecured committed revolving facilities ¹	1,500,000	622,406	877,594 ²
Senior U.S. unsecured notes	493,478	493,478	—
Total	1,993,478	1,223,582	877,594 ²

¹ Excluding any existing credit facility under non-majority owned entities.

² Consists of drawn portion of \$859.3 million and Letters of Credit for \$18.3 million.

Our cash position and bank lines are sufficient to support our growth strategy. At September 30, 2011, cash and cash equivalents, net of bank overdrafts, short-term and long-term marketable investments were \$107.7 million. The amount available under our credit facilities was \$622.4 million. The long-term debt agreements contain covenants which require us to maintain certain financial ratios. At September 30, 2011, CGI was in compliance with these covenants.

During the fourth quarter, the Company entered into a US\$475.0 million private debt placement financing with U.S. institutional investors. Please refer to the Private Debt Placement section 2.1.2 for more details. The Company intends to renew the unsecured committed revolving facilities before its maturity.

Cash equivalents typically include money market funds and term deposits as well as bankers' acceptances and bearer deposit notes issued by major banks, all with initial maturities of 90 days or less.

Short-term investments include fixed deposits, term deposits, municipal, provincial and government bills with initial maturities ranging from 91 days to 1 year.

Long-term marketable investments include corporate and government bonds with maturities ranging from one to five years, rated AA or higher.

Total long-term debt decreased by \$148.2 million to \$1,005.7 million at September 30, 2011, compared with \$1,153.9 million at September 30, 2010. The variation is mainly explained by the repayments of the second tranche of U.S. Senior unsecured notes for US\$87.0 million and unsecured committed revolving facilities for US\$105.0 million. In addition, the Company incurred various obligations repayable in blended monthly instalments for equipment and intangible assets totalling an amount of \$44.4 million. The remainder of the decrease is due to an unrealized loss of \$4.5 million on foreign exchange translation.

4.3. CONTRACTUAL OBLIGATIONS

We are committed under the terms of contractual obligations with various expiration dates, primarily for the rental of premises, computer equipment used in outsourcing contracts and long-term service agreements in the aggregate amount of \$1,919.8 million. Total contractual obligations decreased by \$270.0 million compared to fiscal 2010, primarily due to paying down our long-term debt and rent payments made in the normal course of our operations.

Commitment type <i>(in thousands of dollars)</i>	Total	Less than 1 year	2nd and 3rd years	4th and 5th years	Years 6 to 10	After 10 years
Long-term debt	938,499	379,595	48,096	16,040	494,768	-
Capital lease obligations	67,182	22,939	31,696	12,013	534	-
Operating leases						
Rental of office space ¹	773,157	109,729	191,841	164,123	263,713	43,751
Computer equipment	33,613	15,316	15,598	2,699	-	-
Automobiles	9,001	4,342	4,441	218	-	-
Long-term service agreements and other	98,391	48,547	44,644	5,200	-	-
Total contractual obligations	1,919,843	580,468	336,316	200,293	759,015	43,751

¹ Included in these obligations are \$25.3 million of office space leases from past acquisitions.

4.4. FINANCIAL INSTRUMENTS AND HEDGES

The Company uses various financial instruments to manage its exposure to fluctuations of foreign currency exchange rates. The Company does not hold or use any derivative instruments for trading purposes. Foreign exchange translation gains or losses on the net investments in self-sustaining foreign subsidiaries are recorded under other comprehensive loss. Any realized or unrealized gains or losses on instruments covering the U.S. denominated debt are also recognized in other comprehensive income (loss).

The Company has the following outstanding hedging instruments:

Hedges on net investments in self-sustaining foreign subsidiaries

- US\$815.0 million debt designated as the hedging instrument to the Company's net investment in U.S. subsidiaries;
- €9.0 million debt designated as the hedging instrument to the Company's net investment in European subsidiaries.

Cash flow hedges on future revenue

- US\$76.7 million foreign currency forward contracts to hedge the variability in the expected foreign currency exchange rate between the U.S. dollar and the Canadian dollar;
- US\$45.0 million foreign currency forward contracts to hedge the variability in the expected foreign currency exchange rate between the U.S. dollar and the Indian rupee;
- \$62.2 million foreign currency forward contracts to hedge the variability in the expected foreign currency exchange rate between the Canadian dollar and the Indian rupee.

Cash flow hedges on Senior U.S. unsecured notes

- US\$20.0 million foreign currency forward contracts.

The effective portion of the change in the fair value of the derivative instruments is recognized in other comprehensive income (loss) and the ineffective portion, if any, in the consolidated statement of earnings. During the year ended September 30, 2011, the Company's hedging instruments were effective.

The Company expects that approximately \$4.1 million of the accumulated net unrealized gains on derivative financial instruments designated as cash flow hedges at September 30, 2011 will be reclassified in net income in the next 12 months.

4.5. SELECTED MEASURES OF LIQUIDITY AND CAPITAL RESOURCES

As at September 30,	2011	2010	2009
Net debt to capitalization ratio	26.8%	30.6%	n/a
Net debt (cash) <i>(in thousands of dollars)</i>	897,418	1,010,816	(66,034)
Return on equity	19.5%	16.4%	14.2%
Return on invested capital	14.1%	16.3%	14.0%
Days sales outstanding	53	47	39

The Company uses the net debt to capitalization ratio as an indication of its financial leverage in order to pursue any large outsourcing contracts, expand global delivery centres, or make acquisitions. In fiscal 2010, our long-term debt increased as US\$800.0 million was drawn against our credit facilities to fund the acquisition of Stanley. This caused the ratio to increase to 30.6%. During fiscal 2011, we paid down our debt, causing the ratio to decrease to 26.8% as at September 30, 2011.

Return on equity is a measure of the return we are generating for our shareholders. At September 30, 2011, ROE stood at 19.5% compared to 16.4% at the end of September 30, 2010. The main cause of the increase is due to the higher earnings as compared to the year ago period from all our segments, and to a lesser degree, lower acquisition-related and integration costs. Part of the increase in ROE is also due to the repurchase of CGI shares under the NCIB, and the impacts of the fluctuation of foreign exchange rates on the investment values of our international operations.

Return on invested capital was 14.1% as at September 30, 2011, a decrease compared to 16.3% a year ago. The ratio decreased due to an increase in our average invested capital balance due to the debt taken for the financing of the Stanley acquisition.

DSO increased to 53 days from 47 days last year. In calculating the DSO, we subtract the deferred revenue balance from trade accounts receivable and work in progress; for that reason, the timing of payments received from outsourcing clients in advance of the work to be performed and the timing of payments related to project milestones can affect the DSO fluctuations. Our DSO increased due to the addition of the Stanley operations as its main clientele are government entities as well as the impact from milestone based payments on some projects. At the end of the year, we exceeded our target of 45 days but remain committed to manage our DSO within this target based on past history.

4.6. OFF-BALANCE SHEET FINANCING AND GUARANTEES

We do not engage in the practice of off-balance sheet financing, except for the use of operating leases for office space, computer equipment and vehicles. In accordance with GAAP, neither the lease liability nor the underlying asset is carried on the balance sheet as the terms of the leases do not meet the criteria for capitalization. From time to time, we also enter into agreements to provide financial or performance assurances to third parties on the sale of assets, business divestitures, guarantees and U.S. Government contracts.

In connection with sales of assets and business divestitures, we may be required to pay counterparties for costs and losses incurred as the result of breaches in representations and warranties, intellectual property right infringement and litigation against counterparties. While some of the agreements specify a maximum potential exposure totalling approximately \$3.7 million, others do not specify a maximum amount or limited period. It is impossible to reasonably estimate the maximum amount that may have to be paid under such guarantees. The amounts are dependent upon the outcome of future contingent events, the nature and likelihood of which cannot be determined at this time. The Company does not expect to incur any potential payment in connection with these guarantees that could have a materially adverse effect on its consolidated financial statements.

We are also engaged to provide services under contracts with the U.S. Government. The contracts are subject to extensive legal and regulatory requirements and, from time to time, agencies of the U.S. Government investigate whether our operations are being conducted in accordance with these requirements. Generally, the Government has the right to

change the scope of, or terminate, these projects at its convenience. The termination or a reduction in the scope of a major government project could have a material adverse effect on our results of operations and financial condition.

In the normal course of business, we may provide certain clients, principally governmental entities, with bid and performance bonds. In general, we would only be liable for the amount of the bid bonds if we refuse to perform the project once the bid is awarded. We would also be liable for the performance bonds in the event of default in the performance of our obligations. As at September 30, 2011, we had committed for a total of \$43.2 million for these bonds. To the best of our knowledge, we complied with our performance obligations under all service contracts for which there was a performance or bid bond, and the ultimate liability, if any, incurred in connection with these guarantees would not have a material adverse effect on our consolidated results of operations or financial condition.

In addition, we provided a guarantee of \$5.9 million on the residual value of leased equipment, accounted for as an operating lease, at the expiration of the lease term.

4.7. CAPABILITY TO DELIVER RESULTS

Sufficient capital resources and liquidity are required for supporting ongoing business operations to execute our build and buy growth strategy. The Company has sufficient capital resources coming from the cash generated from operations, credit facilities, long-term debt agreements and invested capital from shareholders. Use of these funds has been primarily aimed at procuring new large outsourcing and managed services contracts; investing in our business solutions; pursuing accretive acquisitions; buying back CGI shares and paying down debt. Funds were also used to expand our global delivery network as more and more of our clients demand lower cost alternatives. In terms of financing, we are well positioned to continue executing our four-pillar growth strategy in fiscal 2012.

Strong and experienced leadership is essential to successfully implement our corporate strategy. CGI has a strong leadership team with members who are highly knowledgeable and have gained a significant amount of experience within the IT industry via various career paths and leadership roles. CGI fosters leadership development to ensure a continuous flow of knowledge and strength is maintained throughout the organization. As part of our succession planning in key positions, we established the Leadership Institute, our own corporate university, to develop leadership, technical and managerial skills inspired by CGI's roots and traditions.

As a company built on human capital, our professionals and their knowledge are critical to delivering quality service to our clients. Our human resources program provides competitive compensation and benefits, a favourable working environment, and our training and career development programs combine to allow us to attract and retain the best talent. Employee satisfaction is monitored regularly through a company-wide survey and issues are addressed immediately. Approximately 83% of our employees, whom we refer to as members, are also owners of CGI through our Share Purchase Plan. This includes our members joining from Stanley, who effective January 1, 2011 were eligible to participate in the Share Purchase Plan. This, along with the Profit Participation Program, allows members to share in the success of the Company and aligns member objectives with our strategic goals.

In addition to our capital resources and the talent of our human capital, CGI has established a Management Foundation encompassing governance policies, sophisticated management frameworks and an organizational model for its business unit and corporate processes. This foundation, along with our appropriate internal systems, helps in providing for a consistent high standard of quality service to our clients. CGI's offices maintain appropriate certifications in accordance with service requirements such as the ISO and Capability Maturity Model Integration quality programs.

5. Related Party Transactions

In the normal course of business, CGI is party to contracts with Innovapost, a joint venture, pursuant to which CGI is its preferred IT supplier. The Company exercises joint control over Innovapost's operating, financing and investing activities through its 49% ownership interest. The value of the transactions between the Company and Innovapost, and resulting balances, which were measured at commercial rates, are presented below:

As at and for the years ended September 30 <i>(in thousands of dollars)</i>	2011	2010	2009
Revenue	80,075	81,760	108,139
Accounts receivable	4,570	681	10,542
Work in progress	1,158	1,076	5,937
Contract costs	3,713	6,210	8,706
Deferred revenue	2,985	1,012	3,351

6. Joint Venture: Supplementary Information

The Company's proportionate share of its joint venture investee's operations included in the consolidated financial statements is as follows:

As at and for the years ended September 30 <i>(in thousands of dollars)</i>	2011	2010	2009
Revenue	98,578	91,015	101,964
Net earnings	13,359	11,418	13,412
Current assets	44,287	38,148	37,608
Non-current assets	2,309	2,992	2,998
Current liabilities	17,445	15,609	14,721
Non-current liabilities	994	933	445

7. Fourth Quarter Results

As outlined in section 2.1.3., due to the increased mobility of our workforce and growth of our global delivery centres, a total charge of \$45.4 million was taken mainly comprised of provisions on excess real estate, related leasehold improvements and severance costs in the amount of \$33.7 million. In addition, through a review of the Company's business solution portfolio, an impairment charge of \$11.7 million was taken on solutions primarily for the financial services market. The following sections incorporate the impacts of the measures taken above.

Average foreign exchange rates

For the three months ended September 30,	2011	2010	Change
U.S. dollar	0.9802	1.0391	-5.7%
Euro	1.3836	1.3441	2.9%
Indian rupee	0.0214	0.0224	-4.5%
British pound	1.5773	1.6117	-2.1%

7.1. REVENUE VARIATION AND REVENUE BY SEGMENT

The following table provides a summary of our revenue growth, in total and by segment, separately showing the impacts of foreign currency variations between 2011 and 2010. The 2010 revenue by segment is recorded reflecting the actual foreign exchange rates for that year. The foreign exchange impact is the difference between the current period's actual results and the current period's results converted with prior year's foreign exchange rates.

For the three months ended September 30 (in thousands of dollars except for percentage)			
	2011	2010	Change
Total CGI Revenue	1,031,565	1,007,056	2.4%
Variation prior to foreign currency impact	5.3%	13.8%	
Foreign currency impact	-2.9%	-5.1%	
Variation over previous period	2.4%	8.7%	
Global Infrastructure Services			
Revenue prior to foreign currency impact	173,451	217,041	-20.1%
Foreign currency impact	(1,350)		
Global Infrastructure Services revenue	172,101	217,041	-20.7%
Canada			
Revenue prior to foreign currency impact	313,058	314,251	-0.4%
Foreign currency impact	(782)		
Canada revenue	312,276	314,251	-0.6%
U.S.			
Revenue prior to foreign currency impact	521,267	427,760	21.9%
Foreign currency impact	(28,256)		
U.S. revenue	493,011	427,760	15.3%
Europe			
Revenue prior to foreign currency impact	52,942	48,004	10.3%
Foreign currency impact	1,235		
Europe revenue	54,177	48,004	12.9%

For the fourth quarter of 2011, revenue increased by \$24.5 million or 2.4%. This is due predominantly to the acquisition of Stanley representing a full quarter of revenue in 2011 versus approximately six weeks in the same period of 2010, partially offset by the expiration of an outsourcing contract during the third quarter of fiscal 2011. Assuming a constant exchange rate between the Canadian dollar and the currencies of our foreign operations, our revenue grew by 5.3% as the weakened U.S. dollar had an unfavourable effect on our revenue, causing a 2.9% decrease. On a constant currency basis, the largest growth in our vertical markets was from government, due mostly to the new clients from the Stanley acquisition.

7.1.1. Global Infrastructure Services

Revenue for GIS was \$172.1 million in the fourth quarter of fiscal 2011, a decrease of \$44.9 million or 20.7% year-over-year. The decrease is due predominantly to an outsourcing contract in the financial services vertical market that expired in the third quarter of fiscal 2011. The decrease was partially offset by an increase in work volumes from the MRD vertical market.

7.1.2. Canada

Revenue in Canada was \$312.3 million for the three months ended September 30, 2011, a decrease of \$2.0 million or 0.6% compared to the same period in the prior year. The decreases came from delays in project start-ups, the expiration of a low margin contract in the government vertical market, and the disposition of our ownership interest in CIA. These decreases were partially offset by an increase in work volumes from clients in our MRD and health vertical markets.

7.1.3. U.S.

For the three months ended September 30, 2011, revenue in the U.S. was \$493.0 million, an increase of \$65.3 million or 15.3% from the same period in the prior year. On a constant currency basis, revenue increased by \$93.5 million or 21.9% due to an unfavourable foreign exchange impact of \$28.3 million. Most of the increase in revenue is due to the Stanley acquisition; in the current quarter ended September 30, 2011, a full quarter of Stanley's revenue is included, whereas only six weeks of Stanley's revenue was included in the prior year. This increase was partially offset by the completion of projects for our clients in the financial services and government vertical markets while the start-up of new projects experienced delays.

7.1.4. Europe

In the fourth quarter of 2011, Europe revenue increased by \$6.2 million or 12.9% to \$54.2 million. Increases occurred across most of our geographic markets with particular growth from new and existing clients in the telecommunications & utilities vertical market.

7.2. ADJUSTED EBIT BY SEGMENT

For the three months ended September 30 (in thousands of dollars except for percentage)			
	2011	2010	Change
Global Infrastructure Services	10,277	31,400	-67.3%
As a percentage of GIS revenue	6.0%	14.5%	
Canada	46,830	57,871	-19.1%
As a percentage of Canada revenue	15.0%	18.4%	
U.S.	42,607	50,280	-15.3%
As a percentage of U.S. revenue	8.6%	11.8%	
Europe	3,058	250	1123.2%
As a percentage of Europe revenue	5.6%	0.5%	
Adjusted EBIT	102,772	139,801	-26.5%
Adjusted EBIT margin	10.0%	13.9%	

7.2.1. Global Infrastructure Services

Adjusted EBIT in GIS was \$10.3 million for the three months ended September 30, 2011, a decrease of \$21.1 million from the same period in the prior year. As a percentage of revenue, the margin decreased from 14.5% to 6.0%. The decrease is predominantly from the expiration of an outsourcing contract in the financial services vertical market, creating a temporary excess in capacity. In addition, the segment incurred expenses associated with excess real estate and severances of approximately \$6.2 million or \$5.3 million more than the same period a year ago.

7.2.2. Canada

Canada adjusted EBIT was \$46.8 million in the fourth quarter of 2011, a decrease of \$11.0 million or 19.1%. As a percentage of revenue, the margin decreased from 18.4% to 15.0%. The decrease was due to the revenue factors outlined above (see section 7.1.2.) and the expenses associated with the provisions taken for the excess real estate,

leasehold improvements write-off and severances in the amount of \$18.4 million or \$12.1 million more than the same period a year ago. In addition, an impairment charge of \$9.6 million was taken on a business solution that was impacted by clients in the financial services vertical market deferring their investment decisions.

7.2.3. U.S.

U.S. adjusted EBIT was \$42.6 million, a decrease of \$7.7 million compared to the fourth quarter of 2010. As a percentage of revenue, the margin decreased from 11.8% to 8.6%. While growth in the government vertical market helped increase earnings, the impact of unassigned members from the delays in project start-ups for certain clients resulted in an overall decrease of earnings. The uncertainty reigning in the U.S. economy caused the pace of the federal government contract awards to slow down, thereby increasing costs and impacting our U.S. profitability. The acquisition of Stanley with its related amortization for client relationships along with its higher proportion of cost-plus contracts also contributed to the year-over-year margin fluctuation. In addition, the segment incurred charges associated with excess real estate, severances, leasehold improvements write-off and a business solution impairment of approximately \$9.6 million. This is \$8.4 million more than the amount for the same period a year ago.

7.2.4. Europe

Europe adjusted EBIT was \$3.1 million for the fourth quarter of 2011, an increase of \$2.8 million compared to the fourth quarter in the prior year. As a percentage of revenue, the margin increased from 0.5% to 5.6%. The increase is attributable to the revenue growth across all vertical markets partially offset by expenses associated with severances in the amount of \$1.6 million or \$0.6 million more than the same period last year.

7.3. NET EARNINGS AND EARNINGS PER SHARE

The following table sets out the information supporting the earnings per share calculations:

For the three months ended September 30			
<i>(in thousands of dollars unless otherwise indicated)</i>			
	2011	2010	Change
Adjusted EBIT	102,772	139,801	-26.5%
Acquisition-related and integration costs	-	16,655	-100.0%
Interest on long-term debt	4,132	5,206	-20.6%
Interest income	(692)	(649)	6.6%
Other expenses (income)	558	(1,432)	-139.0%
Gain on sale of capital assets	-	(73)	-100.0%
Earnings before income taxes	98,774	120,094	-17.8%
Income tax expense	25,681	36,018	-28.7%
<i>Effective tax rate</i>	26.0%	30.0%	
Net earnings	73,093	84,076	-13.1%
<i>Margin</i>	7.1%	8.3%	
<i>Earnings attributable to shareholders of CGI Group Inc.</i>	73,093	83,994	-13.0%
<i>Earnings attributable to non-controlling interest</i>	-	82	-100.0%
Weighted average number of shares			
Class A subordinate shares and Class B shares <i>(basic)</i>	261,897,680	274,524,411	-4.6%
Class A subordinate shares and Class B shares <i>(diluted)</i>	271,305,183	281,951,998	-3.8%
Earnings per share <i>(in dollars)</i>¹			
Basic EPS	0.28	0.31	-9.7%
Diluted EPS	0.27	0.30	-10.0%

¹ EPS amounts are attributable to shareholders of CGI.

Net earnings were \$73.1 million for the quarter ended September 30, 2011 compared to \$84.1 million in the same period of the prior year. The adjusted EBIT decreased mainly due to the expenses incurred for the Performance Improvement Plan in the amount of \$45.4 million. This decrease was partially offset by lower acquisition-related and integration costs in the amount of \$16.7 million.

The decrease in weighted average number of shares is due to the buyback of shares under the current NCIB, partly offset by the issuance of Class A subordinate shares upon the exercise of stock options. During the current quarter, 3.3 million shares were repurchased and 1.0 million options were exercised.

In the fourth quarter of fiscal 2011, the Company accelerated the on-going optimization of its cost structure and incurred a significant amount of charges. This in turn lowered our net earnings by 13.1% despite growth in revenue. As the charges taken in the current quarter are higher than normal, the \$45.4 million of provisions on excess real estate, related leasehold improvements write-off, severance costs, and impairment charges are added back to earnings in order to calculate a more meaningful net earnings and margin number. Similar types of charges are added back to the fourth quarter of fiscal 2010 to show a more meaningful comparison. Below is a table showing the year-over-year comparison with the favourable tax adjustments, the impact of acquisition-related and integration costs related to Stanley, the provisions on excess real estate, the related leasehold improvements write-off, the severance costs and the impairment charges removed:

For the three months ended September 30			
<i>(in thousands of dollars unless otherwise indicated)</i>			
	2011	2010	Change
Earnings before income taxes	98,774	120,094	-17.8%
<i>Add back:</i>			
Acquisition-related and integration costs	-	16,655	-100.0%
Severances, excess real estate provisions, leasehold improvement write-offs and impairment charge	45,419	9,336	386.5%
Earnings from continuing operations before income taxes prior to adjustments	144,193	146,085	-1.3%
Income tax expense	25,681	36,018	-28.7%
<i>Add back:</i>			
Tax adjustments	-	2,500	-100.0%
Tax deduction on acquisition-related and integration costs, severances, excess real estate provisions and impairment charges	13,717	6,482	111.6%
Income tax expense prior to adjustments	39,398	45,000	-12.4%
<i>Effective tax rate prior to adjustments</i>	27.3%	30.8%	
Net earnings prior to adjustments	104,795	101,085	3.7%
<i>Margin</i>	10.2%	10.0%	
Earnings per share (in dollars) ¹			
Basic EPS	0.40	0.37	8.1%
Diluted EPS	0.39	0.36	8.3%

¹ EPS amounts are attributable to shareholders of CGI and prior to tax adjustments, acquisition-related and integration costs, severances, excess real estate provisions, leasehold improvement write-offs and impairment charges.

8. Summary of Quarterly Results

8.1. KEY PERFORMANCE MEASURES FOR THE PAST EIGHT QUARTERS

As at and for the three months ended (in thousands of dollars unless otherwise noted)	Sept. 30, 2011	June 30, 2011	Mar. 31, 2011	Dec. 31, 2010	Sept. 30, 2010	June 30, 2010	Mar. 31, 2010	Dec. 31, 2009

Long-term financial liabilities	728,809	1,033,288	1,102,990	1,090,485	1,159,198	387,341	379,227	354,392

8.2. QUARTERLY VARIANCES

There are factors causing quarterly variances which may not be reflective of the Company's future performance. First, there is seasonality in SI&C work, and the quarterly performance of these operations is impacted by occurrences such as vacations and the number of statutory holidays in any given quarter. Outsourcing contracts including BPS contracts are affected to a lesser extent by seasonality. Second, the workflow from some clients may fluctuate from quarter to quarter based on their business cycle and the seasonality of their own operations. Third, the savings that we generate for a client on a given outsourcing contract may temporarily reduce our revenue stream from this client, as these savings may not be immediately offset by additional work performed for this client.

In general, cash flow from operating activities could vary significantly from quarter to quarter depending on the timing of monthly payments received from large clients, cash requirements associated with large acquisitions, outsourcing contracts and projects, the timing of the reimbursements for various tax credits as well as profit sharing payments to members and the timing of restructuring cost payments.

Foreign exchange fluctuations also contribute to quarterly variances, and these variances are likely to increase as the percentage of revenue in foreign currencies changes. From a margin perspective, CGI benefits from a natural hedge

against currency fluctuations driven mainly by U.S. dollar expenses incurred in Canada, such as licenses, maintenance, insurance and interest expenses.

9. Summary of Significant Accounting Policies

The audited, consolidated financial statements for the years ended September 30, 2011, 2010, and 2009 include all adjustments that CGI's management considers necessary for the fair presentation of its financial position, results of operations, and cash flows.

Certain comparative figures have been reclassified to conform to the current period's presentation.

9.1. CHANGES IN ACCOUNTING POLICIES

On October 1, 2010, the Company elected to early adopt the following accounting guidance:

- a) Emerging Issue Committee ("EIC") Abstract No. 175 ("EIC-175"), "Revenue Arrangements with Multiple Deliverables" issued by the CICA in December 2009 which amends the EIC Abstract No. 142 ("EIC-142"), "Revenue Arrangements with Multiple Deliverables". EIC-175 is equivalent to the U.S. GAAP standard, Accounting Standards Update ("ASU") No. 2009-13 ("ASU 2009-13"), "Multiple-Deliverable Revenue Arrangements" issued by the Financial Accounting Standards Board ("FASB") and applies to arrangements that include multiple-deliverables that are not accounted for pursuant to other specific guidance, such as Accounting Standards Codification ("ASC") Topic 985-605 ("ASC 985-605"), "Software – Revenue Recognition". The new guidance changes the requirements for establishing separate units of accounting in a multiple-deliverable arrangement and requires the allocation of total arrangement consideration to each separate unit of accounting based on their relative selling prices. Based on this method, the selling price of each separate unit of accounting is determined using vendor-specific objective evidence ("VSOE") of selling price if available, otherwise third-party evidence ("TPE") of selling price, or estimated selling price ("ESP") if neither VSOE nor TPE of selling price is available. The residual method of allocating arrangement consideration is no longer permitted. EIC-175 also expands the disclosure required for multiple-deliverable arrangements.
- b) ASU No. 2009-14 ("ASU 2009-14"), "Certain Revenue Arrangements that Include Software Elements" the U.S. GAAP standard issued by the FASB which amends ASC 985-605. ASU 2009-14 modifies the scope of the software recognition guidance to exclude tangible products that contain both software and non-software deliverables that function together to deliver a product's essential functionality. There is no specific software revenue recognition guidance under Canadian GAAP, therefore the Company follows U.S. guidance.

The adoption of the above accounting guidance, which was applied prospectively to new revenue arrangements with multiple-deliverables entered into or materially modified on or after October 1, 2010, did not have any material impact on the Company's consolidated financial statements for the year ended September 30, 2011.

9.2. CRITICAL ACCOUNTING ESTIMATES

The Company's significant accounting policies are described in Note 2 of the September 30, 2011 audited consolidated financial statements. The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting period. Because of the use of estimates inherent in the financial reporting process, actual results could differ from those estimates.

An accounting estimate is considered critical if the estimate requires management to make assumptions about matters that were highly uncertain at the time the estimate was made, if different estimates could reasonably have been used in the period, or changes in the accounting estimates that are reasonably likely to occur, could have a material impact on the presentation of our financial condition, changes in financial condition or results of operations.

Areas impacted by estimates	Consolidated balance sheets	Consolidated statements of earnings			
		Revenue	Cost of services, selling and administrative	Amortization or impairment	Income taxes
Business combinations	✓			✓	
Income taxes	✓				✓
Contingencies and other liabilities	✓		✓		
Revenue recognition ¹	✓	✓			
Stock-based compensation	✓		✓		
Investment tax credits and government programs	✓		✓		
Impairment of long-lived assets and goodwill	✓			✓	

¹ Affects the balance sheet through accounts receivable, work in progress and deferred revenue.

Business combinations

The Company accounts for its business combinations using the acquisition method. Under this method, estimates we made to determine the fair values of asset and liabilities acquired, include judgements in our determinations of acquired intangible assets and assessment of the fair value of existing capital assets. Acquired liabilities can include litigation and other contingency reserves existing at the time of the acquisition. The Company allocates the purchase consideration to net identifiable assets and liabilities assumed based on estimated fair values at the date of acquisition with the excess of the purchase price amount being allocated to goodwill.

When establishing fair values, management will make significant estimates and assumptions, especially with respect to intangible assets. Intangible assets acquired and recorded by the Company may include client relationships and contracts, software licenses, trademarks and business solutions. Estimates include but are not limited to the forecasting of future cash flows and discount rates. From time to time, the Company may engage third-party firms to assist us in determining the fair value of assets and liabilities assumed. Management's estimates of fair values are based upon assumptions believed to be reasonable, but which are inherently uncertain and unpredictable. As a result, actual results may differ from estimates impacting our earnings.

Income taxes

The Company measures income tax assets and liabilities, both current and future, according to enacted or substantively enacted income tax legislation that is expected to apply when the asset is realized or the liability settled. The applicable income tax legislation and regulations are subject to the Company's interpretation. An assessment of the ultimate realization of the future income taxes generated from temporary differences between the book value and the tax value of assets and liabilities as well as tax losses carried forward is performed regularly. The conclusion of whether it is more likely than not that future assets will be realized includes making assessments of expectations of future taxable income. The ultimate amount of future income taxes and income tax provisions could be materially different from those recorded, as it is influenced by future operating results of the Company and its tax interpretations.

Contingencies and other liabilities

The Company accrues for costs and other liabilities requiring significant judgment. Contingencies for pending or threatened litigation, guarantees and other possible liabilities involve uncertainty as to possible gain or loss to the Company that will ultimately be resolved when one or more future events occur or fail to occur. Resolution of the uncertainty may confirm the reduction of a liability or the occurrence of a liability. The accrued liabilities are based on historical experience, current trends and other assumptions that are believed to be reasonable under the circumstances.

Furthermore, there are various claims and pending actions against the Company arising in the ordinary course of its business as well as inherited from business acquisitions. Certain of these actions seek damages in significant amounts. Among other things, the Company considers the period in which the underlying cause of the claim occurred, the degree of probability of an unfavourable outcome and the ability to make a reasonable estimate of the loss to determine whether a loss accrual or disclosure in the consolidated financial statements is required.

The Company accrues lease provisions which consist of estimated costs associated with vacated premises. The provisions reflect the present value of lease payments in excess of the expected sublease proceeds on the remaining term of the lease. Key assumptions include the discount rate and the estimate of potential revenues from the subleasing of vacated premises.

Revenue recognition

CGI provides services containing pricing mechanisms such as fixed-price arrangements under percentage-of-completion which requires estimates of revenue and costs over the entire term of the arrangement, including estimates of resources and costs necessary to complete performance.

Another assessment, related to a contract which involves the provision of multiple-service elements, is to determine how estimated contract revenue is allocated to each element based on fair values or selling prices. Revenue is then recognized for each element as for single-element contracts.

Revenue from system benefits-funded arrangements is recognized only to the extent it can be predicted, with reasonable certainty, that the benefit stream will generate amounts sufficient to fund the value on which revenue recognition is based.

Management regularly reviews arrangement profitability and the underlying estimates. Estimates of total revenue at the start of the contract may differ materially from actual revenue generated due to volume variations, changes in technology and other factors which may not be foreseen at inception. Further, if total costs from a contract are more likely than not to exceed the total revenue from the contract, then a provision for the probable loss is made in the period in which the loss first becomes evident.

Stock-based compensation

CGI accounts for its stock option plan in accordance with section 3870, "Stock-based Compensation and Other Stock-based Payments" of the CICA Handbook. Pursuant to the recommendations of this section, CGI has elected to value the options granted as part of its share-based payment transactions using the Black-Scholes valuation model. The variables in the model include, but are not limited to: the expected stock price volatility over the term of the awards, expected forfeitures, the expected life of the options and the risk-free interest rate. Different assumptions and changes in circumstances could create material differences in our results of operations.

Investment tax credits and government programs

The Company receives refundable tax credits on salaries and tax credits on research and software development costs, which meet the criteria of investment tax credits and government programs. The Company is subject to annual audits to verify the amount for which it is entitled and whether it operates eligible activities under the terms of various government tax credit programs. Assessments of the proportion of eligible expenses and of the acceptability rate by these different governments are performed periodically.

Impairment of long-lived assets and goodwill

The Company tests the recoverability of long-lived assets, such as intangibles and capital assets, at the end of each year when events or changes in circumstances exist that the carrying amount may not be recoverable. For business solutions, software licenses and client relationships, estimates and assumptions include determining the appropriate period over which to amortize the capitalized costs based on the estimated useful lives and estimating the related future cash flows, and assessing these against the unamortized balances. For internal-use software and capital assets, the appropriate amortization period is based on estimates of the Company's ability to utilize these assets on an ongoing basis. To assess the recoverability of business solutions and contract costs, the Company must estimate future revenue, costs and future cash inflows and outflows. The undiscounted estimated cash flows are projected over its remaining life and compared to the carrying amount.

Goodwill is assessed for potential impairment at the reporting unit level, at least annually or when events or changes in circumstances exist such that the carrying amount may not be recoverable. Such an assessment requires a comparison of the fair value of the reporting unit to its carrying value. Our four operating segments are our reporting units. The estimate of fair value of a reporting unit is based on a discounted cash flows analysis using management approved key assumptions such as future cash flows, growth projections, terminal values, discount rates and industry data. Any change in the estimates used could have a material impact on the calculation of fair value and the resulting impairment charge.

9.3. INTERNATIONAL FINANCIAL REPORTING STANDARDS

In February 2008, the Canadian Accounting Standards Board confirmed that the use of IFRS would be required for Canadian publicly accountable enterprises for fiscal years beginning on or after January 1, 2011. Accordingly, our first quarter under the IFRS reporting standards will be for the three-month period ending December 31, 2011. Financial reporting under IFRS differs from current GAAP in a number of respects, some of which are significant. IFRS on the date of adoption may also differ from current IFRS due to new standards that are expected to be issued before the changeover date.

We describe below our IFRS changeover plan, key deliverables and their status, and the significant known impacts on our financial reporting. This is provided to allow readers to obtain a better understanding of our IFRS changeover plan and the resulting possible effects on our financial statements and operating performance measures. Readers are cautioned, however, that it may not be appropriate to use such information for any other purpose. This information also reflects our most recent assumptions and expectations; circumstances may arise, such as changes in IFRS, regulations or economic conditions, which could change these assumptions or expectations. We will continue to monitor and adjust for any movements in the standards made to ensure the reader is kept abreast of such developments.

In preparation for the conversion to IFRS, the Company has developed an IFRS changeover plan consisting of four phases:

PHASE	STATUS	DETAILS
Phase 1 <i>Diagnostic</i>	Completed	<ul style="list-style-type: none"> Completed a high-level review of the differences between current GAAP and IFRS, as well as a review of the alternatives available on adoption; and Assessed these differences and their impact on the financial statements, business processes and/or IT systems in order to determine the scope of the project.
Phase 2 <i>Detailed Impact Assessment</i>	Completed	<ul style="list-style-type: none"> Completed a detailed impact assessment of differences between Canadian GAAP and IFRS; Documented the rationale supporting initial accounting policy choices, new disclosure requirements, authoritative literature supporting these choices and the quantification of any impacts; and Further assessed impacts on our other key elements such as information technology changes, education and training requirements, impacts on business activities, integrity of internal control over financial reporting and disclosure controls and procedures.

PHASE	STATUS	DETAILS
Phase 3 & 4 <i>Design & Implementation</i>	Completed	<ul style="list-style-type: none"> Adjusted or redesigned the appropriate systems and business processes; Updated and developed accounting policies, disclosure controls and procedures and internal controls over financial reporting; Prepared our opening balance sheet; Conducted an engagement with our external auditors addressing the opening financial position upon conversion; Conducting an engagement with our external auditors addressing the parallel comparative year financial statements (fiscal 2011); Continuing education and training in areas that will have the most significant impact on our operations; and Monitoring the development of any new accounting standards and their impact on the choices and exemptions made by the Company to date.

We have a project manager, a detailed project plan and a progress reporting mechanism in place to support and communicate the evolution of the changeover plan. In addition to the working team, we have established an IFRS Steering Committee responsible for monitoring the progress and approving recommendations from the working team. The working team meets weekly, while the Steering Committee meets monthly, and quarterly updates are being provided to the Audit and Risk Management Committee.

In order to establish IFRS financial reporting expertise at all levels, our Company established a training plan. Beyond the technical training for the key finance working team, we have been delivering training to other finance and operational personnel throughout the current phase. Our strategy has been to gather and retain the expertise “in-house” as much as possible supplementing with external resources as necessary. On a quarterly basis, our Audit and Risk Management Committee members also gather the necessary knowledge through training topics at each meeting. We also provided our Board of Directors with a briefing in November 2010.

IFRS 1, “First-time Adoption of International Financial Reporting Standards”, requires that first-time adopters select accounting policies that are in compliance with each IFRS effective at the end of the Company’s first IFRS reporting period and apply those policies to all periods presented in their first IFRS financial statements. The general requirement of IFRS 1 is full retrospective application of all accounting standards; however, certain mandatory exceptions and optional exemptions are available. The significant optional exemptions that we expect to apply are described within the relevant notes below, along with the opening balance sheet impact.

The Company has assessed the impact of IFRS on its opening balance sheet. Below is the preliminary opening balance sheet of the Company as at October 1, 2010 (“Transition Date”). The original published balance sheet prepared under Canadian GAAP is presented, followed by the IFRS adjustments in the next column which are further explained in the corresponding notes. The IFRS column is the balance sheet we expect to present in our first financial statements prepared under IFRS for the three-month period ending December 31, 2011 (first quarter of fiscal 2012). The opening consolidated IFRS balance sheet may differ significantly from this internal opening consolidated balance sheet due to changes in financial reporting requirements arising from new or revised standards issued by the International Accounting Standards Board (“IASB”), interpretations issued by the International Financial Reporting Interpretations Committee or other items identified through the first quarter of 2012.

Based on our initial assessment, we do not believe there will be any significant additional differences on adoption of IFRS from Canadian GAAP.

PRELIMINARY OPENING CONSOLIDATED BALANCE SHEET

As at October 1, 2010

<i>(in thousands of Canadian dollars)</i>	Canadian GAAP \$		Adjustments (see notes below) \$	IFRS \$

Initial elections upon IFRS adoption

Set forth below are the IFRS 1 optional exemptions applied in the conversion from Canadian GAAP to IFRS. Exemptions that were not elected, not applicable or not considered material to the Company are not included in the discussion.

A. Business combinations

IFRS 1 provides the option to apply IFRS 3, "Business Combinations" (as revised in 2008), retrospectively or prospectively from the Transition Date. The retrospective basis would require restatement of all business combinations that occurred prior to the Transition Date. The Company elected not to retrospectively apply IFRS 3. As a result, there is no adjustment in the opening balance sheet related to business combinations entered into prior to the Transition Date. IFRS 3 will be applied to business combinations entered into subsequently. Additionally, due to the Company's election to apply IFRS 3 prospectively, International Accounting Standards ("IAS") 27, "Consolidated and Separate Financial Statements", will also be applied prospectively.

B. Currency translation differences

Retrospective application of IFRS would require the Company to determine cumulative foreign currency translation differences in accordance with IAS 21, "The Effects of Changes in Foreign Exchange Rates", from the date a subsidiary was formed or acquired to the Transition Date. IFRS 1 permits cumulative foreign translation gains and losses to be reset to zero at the Transition Date. The Company elected to apply this exemption and as such reversed the balance of \$413.0 million within "net unrealized losses on translating financial statements of self-sustaining foreign operations" and \$76.8 million within "net unrealized gains on translating long-term debt designated as a hedge of net investments in self-sustaining foreign operations" included in accumulated other comprehensive loss. The net loss of \$336.2 million was recognized as a decrease to accumulated other comprehensive loss with a corresponding decrease to retained earnings.

C. Employee benefits

IFRS 1 provides the option to recognize all cumulative actuarial gains and losses deferred as a result of applying the corridor approach in accounting for defined benefit plans in retained earnings at Transition Date. The Company elected to apply this exemption. As a result, other long-term liabilities decreased by \$0.8 million. After a related increase to deferred income tax liabilities of \$0.2 million, retained earnings increased by \$0.6 million. Additionally, the Company's joint venture, which is accounted for under the equity method as noted in section (R), applied the same exemption. As a result, the investment in the joint venture decreased by \$1.8 million with a corresponding decrease in retained earnings.

D. Decommissioning liabilities included in the cost of property, plant and equipment

IFRS 1 allows a first-time adopter to use a simplified treatment of historic changes when estimating the decommissioning liability between initial inception of the liability and the Transition Date. The Company elected to apply the method specified within IFRS 1 for valuing the decommissioning liability and as a result, property, plant and equipment decreased by \$0.7 million and long-term provisions increased by \$0.6 million. After a related decrease to deferred income tax liabilities of \$0.2 million and an increase to deferred income tax assets of \$0.2 million, retained earnings decreased by \$0.9 million.

E. Borrowing costs

IFRS 1 allows the Company to choose the effective date of IAS 23, "Borrowing Costs". The Company elected to apply IAS 23 as of the Transition Date and as such will capitalize borrowing costs for qualifying assets for which construction commences on or after the Transition Date.

Set forth below are the applicable mandatory exceptions in IFRS 1 applied in the conversion from Canadian GAAP to IFRS.

F. Hedge accounting

Hedge accounting can only be applied prospectively from the Transition Date to transactions that satisfy the hedge accounting criteria in IAS 39, "Financial Instruments: Recognition and Measurement", at that date. Hedging relationships cannot be designated retrospectively and the supporting documentation cannot be created retrospectively. As a result, only hedging relationships that satisfy the hedge accounting criteria as of the Transition Date are reflected as hedges in the Company's results under IFRS. The application of this mandatory exception did not result in any adjustments upon IFRS conversion.

G. Estimates

Hindsight is not used to create or revise estimates. The estimates previously made by the Company under Canadian GAAP were not revised for application of IFRS except where necessary to reflect any difference in accounting policies.

Set forth below are discussions of differences between IFRS and Canadian GAAP.

H. Reversal of intangible asset impairment

As opposed to current GAAP, impairments under IFRS are conducted in one step using discount rates that are asset specific. In addition, when determining future cash flows associated with an asset, there are certain limitations in what can be included. With the more restrictive guidance under IFRS, there is a higher probability of asset impairment. However, there are also provisions under IFRS for the subsequent reversal of these impairment charges if circumstances change such that the previously determined impairment is reversed. Under Canadian GAAP, the reversal of impairment losses is prohibited. Upon adoption of IFRS, the Company reversed an impairment recognized under Canadian GAAP as a result of changes in the expected cash flows relating to a business solution. As a result, intangible assets increased by \$0.8 million as of the Transition Date. After a related increase to deferred income tax liabilities of \$0.2 million, retained earnings increased by \$0.6 million.

I. Reversal of contract cost impairment

Under Canadian GAAP, contract costs consisting of transition costs and incentives are classified as intangible assets. Under IFRS, contract costs are recognized in accordance with IAS 11, "Construction Contracts" and no longer qualify as intangible assets. Upon adoption of IFRS, the Company reversed an impairment loss on a contract cost that was recognized under Canadian GAAP due to the fact that at the Transition Date the contract was profitable and, in accordance with IAS 11, did not require a provision for loss. As a result, contract costs increased by \$2.1 million as of the Transition Date. After a related increase to deferred income tax liabilities of \$0.8 million, retained earnings increased by \$1.3 million.

J. Share-based payment

With respect to compensation costs for stock options, IFRS requires the use of the graded vesting method for grants with vesting periods greater than one year. Each tranche in an award with graded vesting is considered a separate grant with a different vesting date and fair value, and each grant is accounted for on that basis. Currently, CGI accounts for the costs under the straight-line method for Canadian GAAP, but reconciles to the graded vesting method for U.S. GAAP purposes. Under IFRS 1, CGI has chosen to not apply IFRS retroactively on transition to vested options and will only retroactively apply IFRS to unvested options. As a result of the difference of accounting for each grant of graded share-based awards, contributed surplus increased by \$8.1 million as of the Transition Date with a corresponding decrease to retained earnings.

K. Income taxes

Assets or liabilities acquired other than in a business combination

Under Canadian GAAP, the carrying amount of an asset or liability acquired other than in a business combination is adjusted for by the amount of the related recognized deferred tax asset or liability. Under IFRS, a deferred tax asset or liability cannot be recognized if it arises from the initial recognition of an asset or liability in a transaction that is not a business combination and if at the time of the transaction neither accounting profit nor taxable profit is affected. As a result, the Company decreased deferred tax liabilities by \$3.4 million, intangible assets by \$2.9 million, contract costs by \$0.5 million and deferred tax assets by \$5.0 million with a corresponding decrease to other long-term liabilities of \$0.9 million and retained earnings of \$4.1 million.

Share-based payment

Under Canadian GAAP, a deferred tax asset is recognized on the difference between the accounting expense and the tax deduction relating to a share-based payment. Under IFRS, the deferred tax asset recognized in relation to the share-based payment is adjusted each period to reflect the amount of the tax deduction the Company would receive if the award were tax deductible in the current period based on the current market price of the shares. If the tax deduction or future tax deduction estimated exceeds the related cumulative share-based payment expense, the excess associated current and deferred tax is recognized in contributed surplus. As a result, deferred tax liabilities decreased by \$5.5 million and retained earnings increased by \$2.1 million while contributed surplus increased by \$3.4 million.

L. Commitment to purchase outstanding shares of non-controlling interest

As at April 4, 2011, this commitment to purchase the remaining shares of CIA no longer exists. However, IFRS requires the restatement of all comparative financial statements and therefore, the impact of IFRS will have to be assessed for the period before CGI sold its interest in CIA. Under Canadian GAAP, the value of the put and call option to purchase the remaining shares of CIA is disclosed as a commitment, but not recorded as a liability. Under IFRS, it must be recorded as a liability. As a result, accounts payable and accrued liabilities increased by \$10.4 million. The equity attributable to non-controlling interest of \$6.5 million was eliminated and retained earnings decreased by the remaining balance of \$3.9 million.

M. Property, plant and equipment

We do not expect any modifications to the groupings of our major assets. Management will continue to use historical cost as its measurement basis and in addition, indicators of impairment will be assessed at the Transition Date and annually thereafter if there are triggering events.

N. Leases

Unlike Canadian GAAP, when classifying capital leases (or “finance leases”) under IFRS, more judgement is applied due to the lack of quantitative thresholds. IFRS includes additional qualitative indicators that assist in determining lease classification. After our review during the detailed assessment phase, we concluded that we had no classification differences. When quantifying the value of a finance lease, IFRS requires the use of the interest rate implicit in the lease. This differs from current GAAP in that the rate to use is the lower of the incremental borrowing rate and the implicit rate. This difference does not result in a material difference in the value of our finance leases. An IFRS exposure draft on leases was issued in August 2010, which if adopted, would result in all leases as well as all expected payments being recognized on the balance sheet. This adoption could have a material impact to our balance sheet. It has recently been announced that a revised exposure draft will be issued at the beginning of calendar 2012.

O. Consolidation

Uniform accounting policies and reporting periods are applied throughout the Company under current GAAP. Under IFRS, non-controlling interest is initially recognized at fair value as opposed to carrying value under current GAAP. In fiscal 2010, we elected for the early adoption of Sections 1601, “Consolidated Financial Statements” and 1602 “Non-Controlling Interests”, of the CICA Handbook which are similar to the corresponding provisions of IFRS standard, IAS 27, “Consolidated and Separate Financial Statements”.

P. Intangibles

Other than the adjustments noted in sections (I) and (V), IAS 38, "Intangible Assets", is similar to CICA Handbook Section 3064, "Goodwill and Intangible Assets", which was adopted by the Company during fiscal 2009.

Q. Government grants

IAS 20, "Accounting for Government Grants and Disclosure of Government Assistance", permits the same accounting treatment as current GAAP for investment tax credits.

R. Joint ventures

Under Canadian GAAP, the Company accounts for its joint venture in Innovapost under the proportionate consolidation method. Under IAS 31, "Interests in Joint Ventures" ("IAS 31"), companies are allowed to account for any joint venture interest under either the proportionate consolidation or equity method. During the quarter ended June 30, 2011, IFRS 11, "Joint Arrangements" ("IFRS 11"), was issued and is effective for annual periods beginning January 1, 2013, with early adoption permitted. This new standard focuses on the rights and obligations of the arrangement rather than the legal form. Under the new standard, joint ventures must be accounted for using the equity method when the parties have rights to the net assets of the arrangement. Due to the fact that there is a choice available in the accounting method for a joint venture under IAS 31 and that the equity method will be required under IFRS 11, the Company has elected to account for its investment in Innovapost under the equity method as of the Transition Date.

In the MD&A for the quarter ended June 30, 2011, the preliminary opening consolidated balance sheet included the joint venture accounted for using the proportionate consolidation method. As a result of the subsequent decision to adopt the equity method, the effect of proportionate consolidation has been removed from the balance sheet and the joint venture has been accounted for as an equity investment as of the Transition Date as follows:

	Adjustment for Joint Venture
<i>(in thousands of Canadian dollars)</i>	\$
Assets	
Current assets	
Cash and cash equivalents	(19,295)
Short-term investments	—
Accounts receivable	(9,527)
Work in progress	(1,318)
Prepaid expenses and other current assets	(7,646)
Income taxes	—
Future income taxes	—
Total current assets before funds held for clients	(37,786)
Funds held for clients	—
Total current assets	(37,786)
Property, plant and equipment	(669)
Contract costs	(478)
Intangible assets	(1,207)
Other long-term assets	(638)
Deferred tax assets	(362)
Investment in joint venture	24,598
Goodwill	—
	(16,542)
Liabilities	
Current liabilities	
Accounts payable and accrued liabilities	(5,940)
Accrued compensation	(5,835)
Deferred revenue	(2,491)
Income taxes	(1,343)
Provisions	—
Future income taxes	—
Current portion of long-term debt	—
Total current liabilities before clients' funds obligations	(15,609)
Clients' funds obligations	—
Total current liabilities	(15,609)
Deferred tax liabilities	(404)
Long-term provisions	—
Long-term debt	—
Other long-term liabilities	(529)
	(16,542)

Additionally, as a result of accounting for the investment under the equity method, the consolidated statement of earnings and consolidated statement of cash flows will be amended.

S. Revenue recognition

The revenue recognition guidance under IAS 11 as well as IAS 18, "Revenue", is not as specific as many standards under Canadian and U.S. GAAP. Over the past few months, the Company has been reviewing guidance from the standard setting authorities as well as accounting firms' interpretations in order to develop its proposed treatment based on current IFRS standards. The following provides a high level summary of the differences upon conversion to IFRS using standards in place today.

Under Canadian GAAP, the allocation of the consideration for arrangements that fall under ASC 985-605 is done based on VSOE of fair value. VSOE of fair value is established through internal evidence of prices charged for each revenue item when that item is sold separately. Under IFRS, the total arrangement value is allocated based on relative selling price. Relative selling price will maximize the use of observable inputs, or the Company's best estimate of selling price. In addition, under Canadian GAAP, the residual method can be used as an allocation method when there is objective and reliable evidence of the fair value(s) of the undelivered item(s) but no such evidence of the delivered item(s). Under IFRS, the residual method will no longer be an appropriate method and the allocation of the consideration needs to be done based on the relative selling price. With the adoption of EIC 175 on October 1, 2010, these differences do not exist for arrangements that fall under this new guidance.

Currently, under ASC 985-605, software arrangements for the sale of software licenses with other services (i.e., customization or installation) are bundled as a single deliverable for revenue recognition when the services are essential to the functionality of the software license. Under IFRS, the standard permits the recognition of the software license separately from the other services if it meets the criteria of a separately identifiable component (i.e., it has value to a client on a stand-alone basis).

Under IFRS, revenue from arrangements with extended payment terms can be recognized when the services are rendered and it is probable that the economic benefits associated with the transition will flow to the entity. Under current GAAP, the criteria for these arrangements are more restrictive and often revenue needs to be recognized on a cash basis.

Under IFRS, when payment from a client is due either significantly before or after the transfer of goods or services, the amount of revenue is adjusted to reflect the time value of money, if deemed material.

Canadian GAAP requires revenue for long-term contracts under fixed-fee arrangements such as outsourcing and BPS arrangements to be recognized on a straight-line basis over the term of the arrangement, unless there is a better measure of performance or delivery. Under IFRS, revenue for those types of arrangement will be recognized as services are provided to the client, and recognized based on contractual prices within an acceptable threshold based on demonstrated fair values.

Currently, under GAAP, revenue is limited to the amount not contingent on future performance obligations. Under IFRS, revenue is recognized when it is probable that the economic benefits associated with the transaction will flow to the entity.

A revised exposure draft is expected to be issued by the IASB and the Financial Accounting Standards Board on revenue recognition by the end of calendar 2011. The standards are not expected to be in place until the Fall of 2012.

Presentation Reclassifications

T. Provisions

IAS 37, "Provisions, Contingent Liabilities and Contingent Assets", requires a provision to be recognized when an entity has a present obligation as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation. The thresholds for recognition of provisions are lower under IFRS than under Canadian GAAP.

Under Canadian GAAP, provision for decommissioning liabilities, onerous leases and legal claims were presented within accounts payable and accrued liabilities or other long-term liabilities. Under IFRS, provisions require separate line disclosure on the face of the balance sheet according to their short-term or long-term classification. As a result, an amount of \$11.0 million was reclassified from accounts payable and accrued liabilities into short-term provisions and an amount of \$8.7 million was reclassified from other long-term liabilities to long-term provisions.

U. Tax reclassification

Under Canadian GAAP, deferred taxes are split between current and non-current components on the basis of either the underlying asset or liability or the expected reversal of items not related to an asset or liability. Under IFRS, all deferred tax assets are classified as non-current. As a result, the short-term portion of future income tax assets of \$16.5 million was reclassified to deferred income tax assets and the short-term portion of future income tax liabilities of \$26.4 million was reclassified to deferred income tax liabilities.

V. Contract costs

Under Canadian GAAP, contract costs consisting of transition costs and incentives are classified as intangible assets. Under IFRS, transition costs and incentives provided in the form of cash or equity instruments are presented separately as contract costs and incentives provided in the form of discounts are presented within accounts receivable. As a result, \$97.4 million of transition costs and \$34.6 million of incentives in the form of cash or equity instruments were reclassified from intangible assets to contract costs and \$11.8 million was reclassified from intangible assets to accounts receivable.

Presentation

The presentation section is addressed through individual IAS, most of which do not have significant differences from current GAAP. However, certain sections will require additional disclosure within the notes to the financial statements. Examples include property, plant and equipment, intangible assets, costs of services, selling and administrative expenses, income taxes, goodwill and provisions. In certain cases, there will be a shift of information between the notes and the face of the financial statements.

Under IFRS, it will be mandatory for CGI to present a separate Statement of Equity whereas the Statement of Retained Earnings will be discontinued.

With respect to our reportable segment disclosure under IFRS 8, "Operating Segments", we do not see any significant differences from our current presentation.

Further to the above assessment of the impact of transitioning to IFRS on the opening balance sheet and on certain presentation items, below is a summary of the expected impact on our internal control and information systems.

KEY ACTIVITIES	EXPECTED CHANGES
Information technology and data systems	No material system impact
The Company did not identify any material system impact in our conversion to IFRS. The Company has completed dual-recordkeeping for the first three quarters of fiscal 2011 and is in the process of finalizing the fourth quarter of fiscal 2011. Effective October 1, 2011, only IFRS recordkeeping will be in use.	
Internal controls over financial reporting	No impact
The Company has concluded that internal controls applicable to our reporting processes under current GAAP are fundamentally the same as those required in our IFRS reporting environment. During fiscal 2011, special attention was given to the effectiveness of controls during our transition year.	
Disclosure controls and procedures	Implemented
The Company designed appropriate procedures and controls to ensure additional information can be gathered and reported upon. Documentation was amended in all areas and processes were developed for the production and communication of asset or liability specific discount rates.	
As communicated earlier, our financial statement note disclosures will be expanded. The working team also produced a draft of our first set of interim consolidated financial statements under IFRS. In these statements, additional annual disclosures that would have been presented in the September 30, 2011 consolidated financial statements if prepared under IFRS will be included. Information that is not considered material to the understanding of the Company's interim financial information will not be included.	

KEY ACTIVITIES	EXPECTED CHANGES
Business processes	Implemented
<p>Over the past few months, training has been targeted to our employees based in the operations especially as it pertains to revenue recognition, provisions and asset impairments. In addition, we continue to provide guidance to those involved in client contracts to ensure they are aware of potential impacts once we convert to IFRS.</p> <p>We have assessed the implications of IFRS on our debt covenants and did not encounter any impacts that would cause debt covenants to be breached.</p> <p>Processes were developed to prepare budgets and strategic plans under IFRS for fiscal 2012. In addition, we have assessed the impacts on the Company's incentive programs.</p>	

10. Integrity of Disclosure

Our management assumes the responsibility for the existence of appropriate information systems, procedures and controls to ensure that information used internally and disclosed externally is complete and reliable. The Board of Directors' duties include the assessment of the integrity of the Company's internal control and information systems.

CGI has a formal Corporate Disclosure Policy as a part of its Fundamental Texts whose goal is to raise awareness of the Company's approach to disclosure among the Board of Directors, senior management and employees. The Board of Directors has established a Disclosure Policy Committee responsible for all regulatory disclosure requirements and overseeing the Company's disclosure practices.

The Audit and Risk Management Committee of CGI is composed entirely of independent directors who meet the independence and experience requirements of the New York Stock Exchange as well as those that apply under Canadian securities regulation. The responsibilities of our Audit and Risk Management Committee include: a) the review of all our public disclosure documents containing audited or unaudited financial information; b) identifying and examining the financial and operating risks to which we are exposed and reviewing the various policies and practices that are intended to manage those risks; c) the review and assessment of the effectiveness of our accounting policies and practices concerning financial reporting; d) the review and monitoring of our internal control procedures, programs and policies and assessment of the adequacy and effectiveness thereof; e) reviewing the adequacy of our internal audit resources including the mandate and objectives of the internal auditor; f) recommendation to the Board of Directors of CGI on the appointment of external auditors, the assertion of the external auditors' independence, the review of the terms of their engagement as well as pursuing ongoing discussions with them; g) the review of the audit procedures; h) the review of related party transactions; and i) such other responsibilities usually attributed to audit and risk committees or as directed by our Board of Directors.

The Company evaluated the effectiveness of its disclosure controls and procedures and internal controls over financial reporting, supervised by and with the participation of the Chief Executive Officer and the Chief Financial Officer as of September 30, 2011. The CEO and CFO concluded that, based on this evaluation, the Company's disclosure controls and procedures and internal controls over financial reporting were adequate and effective, at a reasonable level of assurance, to ensure that material information related to the Company and its consolidated subsidiaries would be made known to them by others within those entities.

The CEO and CFO have limited the scope of the design of disclosure controls and procedures and internal controls over financial reporting to exclude controls, policies and procedures of Innovapost, a joint venture in which we have a 49% interest. The design was excluded from our evaluation as we do not have the ability to dictate or modify the entity's internal controls over financial reporting, and we do not have the practical ability to assess those controls. Our assessment is limited to the internal controls over the inclusion of our share of the joint venture and its results in our consolidated financial statements. CGI's interest in the joint venture represents approximately 1% of our consolidated total assets and approximately 2% of our consolidated revenue as at and for the year ended September 30, 2011. Please refer to page 33 of this MD&A for supplementary financial information about Innovapost.

11. Risk Environment

11.1. RISKS AND UNCERTAINTIES

While we are confident about our long-term prospects, the following risks and uncertainties could affect our ability to achieve our strategic vision and objectives for growth and should be considered when evaluating our potential as an investment.

11.1.1. Risks Related to the Market

Economic risk

The level of business activity of our clients, which is affected by economic conditions, has a bearing upon the results of our operations. We can neither predict the impact that current economic conditions will have on our future revenue, nor predict when economic conditions will show meaningful improvement. During an economic downturn, our clients and potential clients may cancel, reduce or defer existing contracts and delay entering into new engagements. In general, companies also decide to undertake fewer IT systems projects during difficult economic times, resulting in limited implementation of new technology and smaller engagements. Since there are fewer engagements in a downturn, competition usually increases and pricing for services may decline as competitors, particularly companies with significant financial resources, decrease rates to maintain or increase their market share in our industry and this may trigger pricing adjustments related to the benchmarking obligations within our contracts. Our pricing, revenue and profitability could be negatively impacted as a result of these factors.

11.1.2. Risks Related to our Industry

The competition for contracts

CGI operates in a global marketplace in which competition among providers of IT services is vigorous. Some of our competitors possess greater financial, marketing, sales resources, and larger geographic scope in certain parts of the world than we do, which, in turn, provides them with additional leverage in the competition for contracts. In certain niche, regional or metropolitan markets, we face smaller competitors with specialized capabilities who may be able to provide competing services with greater economic efficiency. Some of our competitors have more significant operations than we do in lower cost countries that can serve as a platform from which to provide services worldwide on terms that may be more favourable. Increased competition among IT services firms often results in corresponding pressure on prices. There can be no assurance that we will succeed in providing competitively priced services at levels of service and quality that will enable us to maintain and grow our market share.

The availability and retention of qualified IT professionals

There is strong demand for qualified individuals in the IT industry. Therefore, it is important that we remain able to successfully attract and retain highly qualified staff. If our comprehensive programs aimed at attracting and retaining qualified and dedicated professionals do not ensure that we have staff in sufficient numbers and with the appropriate training, expertise and suitable government security clearances required to serve the needs of our clients, we may have to rely on subcontractors or transfers of staff to fill resulting gaps. This might result in lost revenue or increased costs, thereby putting pressure on our earnings.

The ability to continue developing and expanding service offerings to address emerging business demands and technology trends

The rapid pace of change in all aspects of information technology and the continually declining costs of acquiring and maintaining information technology infrastructure mean that we must anticipate changes in our clients' needs. To do so, we must adapt our services and our solutions so that we maintain and improve our competitive advantage and remain able to provide cost effective services. The market for the services and solutions we offer is extremely competitive and there can be no assurance that we will succeed in developing and adapting our business in a timely manner. If we do not keep pace, our ability to retain existing clients and gain new business may be adversely affected. This may result in pressure on our revenue, profit margin and resulting cash flows from operations.

Infringing on the intellectual property rights of others

Despite our efforts, the steps we take to ensure that our services and offerings do not infringe on the intellectual property rights of third parties may not be adequate to prevent infringement and, as a result, claims may be asserted against us or our clients. We enter into licensing agreements for the right to use intellectual property and may otherwise offer indemnities against liability and damages arising from third-party claims of patent, copyright, trademark or trade secret infringement in respect of our own intellectual property or software or other solutions developed for our clients. In some instances, the amount of these indemnity claims could be greater than the revenue we receive from the client. Intellectual property claims or litigation could be time-consuming and costly, harm our reputation, require us to enter into additional royalty or licensing arrangements, or prevent us from providing some solutions or services. Any limitation on our ability to sell or use solutions or services that incorporate software or technologies that are the subject of a claim could cause us to lose revenue-generating opportunities or require us to incur additional expenses to modify solutions for future projects.

Benchmarking provisions within certain contracts

Some of our outsourcing contracts contain clauses allowing our clients to externally benchmark the pricing of agreed upon services against those offered by other providers in an appropriate peer comparison group. The uniqueness of the client environment is factored in and, if results indicate a difference outside the agreed upon tolerance, we may be required to work with clients to reset the pricing for their services.

Protecting our intellectual property rights

Our success depends, in part, on our ability to protect our proprietary methodologies, processes, know-how, tools, techniques and other intellectual property that we use to provide our services. CGI's business solutions will generally benefit from available copyright protection and, in some cases, patent protection. Although CGI takes reasonable steps to protect and enforce its intellectual property rights, there is no assurance that such measures will be enforceable or adequate. The cost of enforcing our rights can be substantial and, in certain cases, may prove to be uneconomic. In addition, the laws of some countries in which we conduct business may offer only limited intellectual property rights protection. Despite our efforts, the steps taken to protect our intellectual property may not be adequate to prevent or deter infringement or other misappropriation of intellectual property, and we may not be able to detect unauthorized use of our intellectual property, or take appropriate steps to enforce our intellectual property rights.

11.1.3. Risks Related to our Business

Risks associated with our growth strategy

CGI's Build and Buy strategy is founded on four pillars of growth: first, organic growth through contract wins, renewals and extensions in the areas of outsourcing and system integration; second, the pursuit of new large outsourcing contracts; third, acquisitions of smaller firms or niche players; and fourth, transformational acquisitions.

Our ability to grow through organic growth and new large outsourcing transactions is affected by a number of factors outside of our control, including a lengthening of our sales cycle for major outsourcing contracts.

Our ability to grow through niche and transformational acquisitions requires that we identify suitable acquisition targets and that we correctly evaluate their potential as transactions that will meet our financial and operational objectives. There can be no assurance that we will be able to identify suitable acquisition candidates and consummate additional acquisitions that meet our economic thresholds, or that future acquisitions will be successfully integrated into our operations and yield the tangible accretive value that had been expected.

If we are unable to implement our Build and Buy strategy, we will likely be unable to maintain our historic or expected growth rates.

The variability of financial results

Our ability to maintain and increase our revenues is affected not only by our success in implementing our Build and Buy strategy, but also by a number of other factors, including: our ability to introduce and deliver new services and products; a lengthened sales cycle; the cyclicity of purchases of technology services and products; the nature of a customer's business; and the structure of agreements with customers. For example, clients are increasingly demanding extended

terms of payment, often stretching more than a year. These, and other factors, make it difficult to predict financial results for any given period.

Business mix variations

The proportion of revenue that we generate from shorter-term systems integration and consulting (“SI&C”) projects, versus revenue from long-term outsourcing contracts, will fluctuate at times, affected by acquisitions or other transactions. An increased exposure to revenue from SI&C projects may result in greater quarterly revenue variations.

The financial and operational risks inherent in worldwide operations

We manage operations in numerous countries around the world. The scope of our operations makes us subject to currency fluctuations; the burden of complying with a wide variety of national and local laws; differences in and uncertainties arising from local business culture and practices; multiple and sometimes conflicting laws and regulations; the absence in some jurisdictions of effective laws to protect our intellectual property rights; restrictions on the movement of cash and other assets; restrictions on the import and export of certain technologies; restrictions on the repatriation of earnings; and political, social and economic instability including the threats of terrorism and pandemic illnesses. We have a hedging strategy in place to mitigate foreign currency exposure; but, other than the use of financial products to deliver on our hedging strategy, we do not trade derivative financial instruments. Any or all of these risks could impact our global business operations and cause our profitability to decline.

Taxes

In estimating our income tax payable, management uses accounting principles to determine income tax positions that are likely to be sustained by applicable tax authorities. However, there is no assurance that our tax benefits or tax liability will not materially differ from our estimates or expectations. The tax legislation, regulation and interpretation that apply to our operations are continually changing. In addition, future tax benefits and liabilities are dependent on factors that are inherently uncertain and subject to change, including future earnings, future tax rates, and anticipated business mix in the various jurisdictions in which we operate. Moreover, our tax returns are continually subject to review by applicable tax authorities; it is these tax authorities that will make the final determination of the actual amounts of taxes payable or receivable, of any future tax benefits or liabilities and of income tax expense that we may ultimately recognize. Any of the above factors could have a material adverse effect on our net income or cash flows by affecting our operations and profitability, the availability of tax credits, the cost of the services we provide, and the availability of deductions for operating losses as we develop our international service delivery capabilities.

Credit risk with respect to accounts receivable

In order to sustain our cash flows and net earnings from operations, we must collect the amounts owed to us in an efficient and timely manner. Although we maintain provisions to account for anticipated shortfalls in amounts collected, the provisions we take are based on management estimates and on our assessment of our clients’ creditworthiness which may prove to be inadequate in the light of actual results. To the extent that we fail to perform our services in accordance with our contracts and our clients’ reasonable expectations, and to the extent that we fail to invoice clients for our services correctly in a timely manner, our collections could suffer resulting in a direct and adverse impact to our revenue, net earnings and cash flows. In addition, a prolonged economic downturn may cause clients to curtail or defer projects, impair their ability to pay for services already provided, and ultimately cause them to default on existing contracts, in each case, causing a shortfall in revenue and impairing our future prospects.

Material developments regarding major commercial clients resulting from such causes as changes in financial condition, mergers or business acquisitions

Consolidation among our clients resulting from mergers and acquisitions may result in loss or reduction of business when the successor business’ information technology needs are served by another service provider or are provided by the successor company’s own personnel. Growth in a client’s information technology needs resulting from acquisitions or operations may mean that we no longer have a sufficient geographic scope or the critical mass to serve the client’s needs efficiently, resulting in the loss of the client’s business and impairing our future prospects. There can be no assurance that we will be able to achieve the objectives of our growth strategy in order to maintain and increase our geographic scope and critical mass in our targeted markets.

Early termination risk

If we should fail to deliver our services according to contractual agreements, some of our clients could elect to terminate contracts before their agreed expiry date, which would result in a reduction of our earnings and cash flow and may impact the value of our backlog. In addition, a number of our outsourcing contractual agreements have termination for convenience and change of control clauses according to which a change in the client's intentions or a change in control of CGI could lead to a termination of the said agreements. Early contract termination can also result from the exercise of a legal right or when circumstances that are beyond our control or beyond the control of our client prevent the contract from continuing. In cases of early termination, we may not be able to recover capitalized contract costs and we may not be able to eliminate ongoing costs incurred to support the contract.

Cost estimation risks

In order to generate acceptable margins, our pricing for services is dependent on our ability to accurately estimate the costs and timing for completing projects or long-term outsourcing contracts. In addition, a significant portion of our project-oriented contracts are performed on a fixed-price basis. Billing for fixed-price engagements is carried out in accordance with the contract terms agreed upon with our client, and revenue is recognized based on the percentage of effort incurred to date in relation to the total estimated costs to be incurred over the duration of the respective contract. These estimates reflect our best judgment regarding the efficiencies of our methodologies and professionals as we plan to apply them to the contracts in accordance with the CGI Client Partnership Management Framework ("CPMF"), a process framework which helps ensure that all contracts are managed according to the same high standards throughout the organization. If we fail to apply the CPMF correctly or if we are unsuccessful in accurately estimating the time or resources required to fulfil our obligations under a contract, or if unexpected factors, including those outside of our control, arise, there may be an impact on costs or the delivery schedule which could have an adverse impact on our expected profit margins.

Risks related to teaming agreements and subcontracts

We derive substantial revenues from contracts where we enter into teaming agreements with other providers. In some teaming agreements we are the prime contractor whereas in others we act as a subcontractor. In both cases, we rely on our relationships with other providers to generate business and we expect to do so in the foreseeable future. Where we act as prime contractor, if we fail to maintain our relationships with other providers, we may have difficulty attracting suitable participants in our teaming agreements. Similarly, where we act as subcontractor, if our relationships are impaired, other providers might reduce the work they award to us, award that work to our competitors, or choose to offer the services directly to the client in order to compete with our business. In either case, our business, prospects, financial condition and operating results could be harmed.

Our partners' ability to deliver on their commitments

Increasingly large and complex contracts may require that we rely on third party subcontractors including software and hardware vendors to help us fulfil our commitments. Under such circumstances, our success depends on the ability of the third parties to perform their obligations within agreed upon budgets and timeframes. If our partners fail to deliver, our ability to complete the contract may be adversely affected, which may have an unfavourable impact on our profitability.

Guarantees risk

In the normal course of business, we enter into agreements that may provide for indemnification and guarantees to counterparties in transactions such as consulting and outsourcing services, business divestitures, lease agreements and financial obligations. These indemnification undertakings and guarantees may require us to compensate counterparties for costs and losses incurred as a result of various events, including breaches of representations and warranties, intellectual property right infringement, claims that may arise while providing services or as a result of litigation that may be suffered by counterparties.

Risk related to human resources utilization rates

In order to maintain our profit margin, it is important that we maintain the appropriate availability of professional resources by having a high utilization rate while still being able to assign additional resources to new work. Maintaining an efficient utilization rate requires us to forecast our need for professional resources accurately and to manage professional training programs and attrition rates among our personnel appropriately. To the extent that we fail to do so, our utilization rates may be reduced, thereby having an impact on our revenue and profitability. Conversely, we may find that we do not have sufficient resources to deploy against new business opportunities in which case our ability to grow our revenue would suffer.

Client concentration risk

We derive a substantial portion of our revenue from the services we provide to the U.S. federal government and its agencies, and we expect that this will continue for the foreseeable future. In the event that a major U.S. federal government agency were to limit, reduce, or eliminate the business it awards to us, we might be unable to recover the lost revenue with work from other agencies or other clients, and our business, prospects, financial condition and operating results could be materially and adversely affected.

Government business risk

Changes in federal, provincial or state government spending policies or budget priorities could directly affect our financial performance. Among the factors that could harm our government contracting business are the curtailment of governments' use of consulting and IT services firms; a significant decline in spending by governments in general, or by specific departments or agencies in particular; the adoption of new legislation and/or actions affecting companies that provide services to governments; delays in the payment of our invoices by government payment offices; and general economic and political conditions. These or other factors could cause government agencies and departments to reduce their purchases under contracts, to exercise their right to terminate contracts, to issue temporary stop work orders, or not to exercise options to renew contracts, any of which would cause us to lose future revenue. Although Canadian GAAP considers a national government and its agencies as a single client, our client base in the government economic sector is in fact diversified with contracts from many different departments and agencies in the U.S., Canada and Europe; nevertheless, government spending reductions or budget cutbacks at these departments or agencies could materially harm our continued performance under these contracts, or limit the awarding of additional contracts from these agencies.

Regulatory risk

Our business with the US federal government and its agencies requires that we comply with complex laws and regulations relating to government contracts. These laws relate to the integrity of the procurement process, impose disclosure requirements, and address national security concerns, among others matters. For instance, we are routinely subject to audits by U.S. government agencies with respect to compliance with these rules. If we fail to comply with these requirements we may incur penalties and sanctions, including contract termination, suspension of payments, suspension or debarment from doing business with the federal government, and fines.

Legal claims made against our work

We create, implement and maintain IT solutions that are often critical to the operations of our clients' business. Our ability to complete large projects as expected could be adversely affected by unanticipated delays, renegotiations, and changing client requirements or project delays. Also, our solutions may suffer from defects that adversely affect their performance; they may not meet our clients' requirements or may fail to perform in accordance with applicable service levels. Such problems could subject us to legal liability, which could adversely impact our business, operating results and financial condition, and may negatively affect our professional reputation. We typically include provisions in our contracts which are designed to limit our exposure to legal claims relating to our services and the applications we develop. These provisions may not protect us adequately or may not be enforceable under some circumstances or under the laws of some jurisdictions.

Information and infrastructure risks

Our business often requires that our clients' applications and information, which may include their proprietary information, be processed and stored on our networks and systems, and in data centres that we manage. Digital information and

equipment is subject to loss, theft or destruction, and services that we provide may become temporarily unavailable as a result thereof or upon an equipment or system malfunction. Failures can arise from human error in the course of normal operations, maintenance and upgrading activities, or from hacking, vandalism (including denial of service attacks and computer viruses), theft and unauthorized access by third parties, as well as from power outages or surges, floods, fires, natural disasters or from any other causes. The measures that we take to protect information and software, including both physical and logical controls on access to premises and information and backup systems may prove in some circumstances to be inadequate to prevent the loss, theft or destruction of client information or service interruptions. Such events may expose the Company to financial loss or damages.

Risk of harm to our reputation

CGI's reputation as a capable and trustworthy service provider and long term business partner is key to our ability to compete effectively in the market for information technology services. The nature of our operations exposes us to the potential loss, unauthorized access to, or destruction of our clients' information, as well as temporary service interruptions. Depending on the nature of the information or services, such events may have a negative impact on how the Company is perceived in the marketplace. Under such circumstances, our ability to obtain new clients and retain existing clients could suffer with a resulting impact on our revenue and profit.

Risks associated with the integration of new operations

The successful integration of new operations that arise from our acquisitions strategy or from large outsourcing contracts requires that a substantial amount of management time and attention be focused on integration tasks. Management time that is devoted to integration activities may detract from management's normal operations focus with resulting pressure on the revenues and earnings from our existing operations. In addition, we may face complex and potentially time-consuming challenges in implementing the uniform standards, controls, procedures and policies across new operations to harmonize their activities with those of our existing business units. Integration activities can result in unanticipated operational problems, expenses and liabilities. If we are not successful in executing our integration strategies in a timely and cost-effective manner, we will have difficulty achieving our growth and profitability objectives.

Liquidity and funding risks

The Company's future growth is contingent on the execution of its business strategy, which, in turn, is dependent on its ability to grow the business organically as well as conclude business acquisitions. By its nature, our growth strategy requires us to fund the investments required to be made using a mix of cash generated from our existing operations, money borrowed under our existing or future credit agreements, and equity funding generated by the issuance of shares of our capital stock to counterparties in transactions, or to the general public. Our ability to raise the required funding depends on the capacity of the capital markets to meet our financing needs in a timely fashion and on the basis of interest rates and share prices that are reasonable in the context of profitability objectives. Increasing interest rates, volatility in our share price, and the capacity of our current lenders to meet our liquidity requirements are all factors that may have an adverse impact on our access to the funding we require. If we are unable to obtain the necessary funding, we may be unable to achieve our growth objectives.

11.2. LEGAL PROCEEDINGS

The Company is involved in legal proceedings, audits, claims and litigation arising in the ordinary course of its business. Certain of these matters seek damages in significant amounts. Although, the outcome of such matters is not predictable with assurance, the Company has no reason to believe that the disposition of any such current matter could reasonably be expected to have a materially adverse impact on the Company's financial position, results of operations or the ability to carry on any of its business activities.

Management's and Auditors' reports

MANAGEMENT'S STATEMENT OF RESPONSIBILITY FOR FINANCIAL REPORTING

The management of CGI Group Inc. ("the Company") is responsible for the preparation and integrity of the consolidated financial statements and the Management's Discussion and Analysis ("MD&A"). The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in Canada and necessarily include some amounts that are based on management's best estimates and judgment. Financial and operating data elsewhere in the MD&A are consistent with that contained in the accompanying consolidated financial statements.

To fulfill its responsibility, management has developed, and continues to maintain, systems of internal controls reinforced by the Company's standards of conduct and ethics, as set out in written policies to ensure the reliability of the financial information and to safeguard its assets. The Company's internal control over financial reporting and consolidated financial statements are subject to audit by the independent auditors, Ernst & Young LLP, whose report follows. They were appointed as independent auditors, by a vote of the Company's shareholders, to conduct an integrated audit of the Company's consolidated financial statements and of the Company's internal control over financial reporting. In addition, the Management Committee of the Company reviews the disclosure of corporate information and oversees the functioning of the Company's disclosure controls and procedures.

Members of the Audit and Risk Management Committee of the Board of Directors, all of whom are independent of the Company, meet regularly with the independent auditors and with management to discuss internal controls in the financial reporting process, auditing matters and financial reporting issues and formulates the appropriate recommendations to the Board of Directors. The independent auditors have unrestricted access to the Audit and Risk Management Committee. The consolidated financial statements and MD&A have been reviewed and approved by the Board of Directors.

MANAGEMENT REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's consolidated financial statements for external reporting purposes in accordance with accounting principles generally accepted in Canada.

The Company's internal control over financial reporting includes policies and procedures that:

- Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of the assets of the Company;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with accounting principles generally accepted in Canada, and that receipts and expenditures are being made only in accordance with authorizations of management and the directors of the Company; and,
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the Company's consolidated financial statements.

All internal control systems have inherent limitations; therefore, even where internal control over financial reporting is determined to be effective, it can provide only reasonable assurance. Projections of any evaluation of effectiveness to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

There was one exclusion from our assessment. Our interest in a joint venture was excluded from our assessment as we do not have the ability to dictate or modify the joint venture's internal control over financial reporting, and we do not have the practical ability to assess those controls. Our interest in the joint venture represents approximately 1% of our consolidated total assets and approximately 2% of our consolidated revenue as at and for the year ended September 30, 2011. We have assessed the Company's internal controls over the inclusion of our share of the joint venture and its results for the year in our consolidated financial statements.

As of the end of the Company's 2011 fiscal year, management conducted an assessment of the effectiveness of the Company's internal control over financial reporting based on the framework established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management has determined the Company's internal control over financial reporting as at September 30, 2011, was effective.

The effectiveness of the Company's internal control over financial reporting as at September 30, 2011, has been audited by the Company's independent auditors, as stated in their report appearing on page 61.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON INTERNAL CONTROL OVER FINANCIAL REPORTING

To the Board of Directors and Shareholders of CGI Group Inc.

We have audited CGI Group Inc.'s (the "Company") internal control over financial reporting as at September 30, 2011, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("the COSO criteria"). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records, that in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As indicated in the accompanying Management's Report on Internal Control Over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of its interest in a joint venture, which is included in the 2011 consolidated financial statements of the Company, and constituted approximately 1% of total assets as of September 30, 2011 and approximately 2% of revenue for the year then ended.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 30, 2011 based on the COSO criteria.

We also have audited, in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements of the Company as at and for the year ended September 30, 2011, and our report dated November 9, 2011 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON FINANCIAL STATEMENTS

To the Board of Directors and Shareholders of CGI Group Inc.

We have audited the accompanying consolidated financial statements of CGI Group Inc. (the "Company"), which comprise the consolidated balance sheets as at September 30, 2011 and 2010, and the consolidated statements of earnings, comprehensive income, retained earnings and cash flows for each of the years in the two-year period ended September 30, 2011, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Canadian generally accepted accounting principles, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as at September 30, 2011 and 2010, and the results of its operations and its cash flows for each of the years in the two-year period ended September 30, 2011 in accordance with Canadian generally accepted accounting principles.

Emphasis of matter

As explained in note 2(a) to the consolidated financial statements, the Company adopted the requirements of the Emerging Issues Committee Abstract No. 175, *Revenue Arrangements with Multiple Deliverables* effective October 1, 2010. As explained in note 29, the Company also adopted the Accounting Standards Update No. 2009-13, *Multiple-Deliverable Revenue Arrangements* issued by Financial Accounting Standards Board and ASU No. 2009-14, *Certain Revenue Arrangements that Include Software Elements*, effective October 1, 2010.

As explained in note 2(b) to the consolidated financial statements, in 2010 the Company adopted the requirements of the Canadian Institute of Chartered Accountants Handbook Section 1582, *Business Combinations*, Section 1601, *Consolidated Financial Statements*, Section 1602, *Non-Controlling Interests*, and amendments to Section 3862, *Financial Instruments—Disclosures*. As explained in note 29, in 2010 the Company adopted the requirements of the Financial Accounting Standards Board's ASC Topic 805, *Business Combinations*.

Other matter

The consolidated financial statements of the Company for the year ended September 30, 2009, were audited by other auditors whose report dated November 8, 2009, expressed an unqualified opinion on those statements, prior to the adjustments described in note 2(b), note 23, and note 29 to these financial statements that were applied to restate the 2009 financial statements.

We also audited the adjustments that were applied to restate the 2009 consolidated financial statements for the changes described in note 2(b), note 23, and note 29 to these financial statements. In our opinion such adjustments are appropriate and have been properly applied. We were not engaged to audit, review, or apply any procedures to the 2009 consolidated financial statements of the Company other than with respect to the adjustments and, accordingly, we do not express an opinion or any other form of assurance on the 2009 consolidated financial statements taken as a whole.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of September 30, 2011, based on the criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated November 9, 2011 expressed an unqualified opinion on the Company's internal control over financial reporting.

Notes to Consolidated Financial Statements

Years ended September 30, 2011, 2010 and 2009

(tabular amounts only are in thousands of Canadian dollars, except share data)

Note 1 Description of business

CGI Group Inc. (the “Company”), directly or through its subsidiaries, manages information technology services (“IT services”) as well as business process services (“BPS”) to help clients effectively realize their strategies and create added value. The Company’s services include management of IT and business processes (“outsourcing”), systems integration and consulting including sale of software licenses.

Note 2 Summary of significant accounting policies

The consolidated financial statements are prepared in accordance with Canadian generally accepted accounting principles (“Canadian GAAP”), which differ in certain material respects from United States generally accepted accounting principles (U.S. GAAP). A reconciliation between Canadian GAAP and U.S. GAAP can be found in Note 29. Certain comparative figures have been reclassified in order to conform to the presentation adopted in 2011.

CHANGES IN ACCOUNTING POLICIES

a) Revenue recognition

On October 1, 2010, the Company elected to early adopt the following accounting guidance:

- i) Emerging Issue Committee (“EIC”) Abstract No. 175 (“EIC-175”), “Revenue Arrangements with Multiple Deliverables” issued by the Canadian Institute of Chartered Accountants (“CICA”) in December 2009 which amends the EIC Abstract No. 142, “Revenue Arrangements with Multiple Deliverables”. EIC-175 is equivalent to the U.S. GAAP standard, Accounting Standards Update (“ASU”) No. 2009-13 (“ASU 2009-13”), “Multiple-Deliverable Revenue Arrangements” issued by Financial Accounting Standards Board (“FASB”) and applies to arrangements that include multiple-deliverables that are not accounted for pursuant to other specific guidance, such as Accounting Standards Codification (“ASC”) Topic 985-605 (“ASC 985-605”), “Software – Revenue Recognition”. The new guidance changes the requirements for establishing separate units of accounting in a multiple-deliverable arrangement and requires the allocation of total arrangement consideration to each separate unit of accounting based on their relative selling prices. Based on this method, the selling price of each separate unit of accounting is determined using vendor-specific objective evidence (“VSOE”) of selling price, if available; otherwise third-party evidence (“TPE”) of selling price or best estimate of selling price (“ESP”) if neither VSOE nor TPE of selling price is available. The residual method of allocating arrangement consideration is no longer permitted. EIC-175 also expands the disclosure required for multiple-deliverable arrangements.
- ii) ASU No. 2009-14 (“ASU 2009-14”), “Certain Revenue Arrangements that Include Software Elements”, the U.S. GAAP standard issued by the FASB which amends ASC 985-605. ASU 2009-14 modifies the scope of the software recognition guidance to exclude tangible products that contain both software and non-software deliverables that function together to deliver a product’s essential functionality. There is no specific software revenue recognition guidance under Canadian GAAP, therefore the Company follows U.S. guidance.

The adoption of the above accounting guidance, which was applied prospectively to new revenue arrangements with multiple-deliverables entered into or materially modified on or after October 1, 2010, did not have any material impact on the Company’s consolidated financial statements. There were no significant changes to the Company’s units of accounting within its multiple-deliverable arrangements, how the Company allocates the total arrangement consideration and the pattern or timing of revenue recognition as a result of the adoption of this accounting guidance.

b) Business combinations

On October 1, 2009, the Company elected to early adopt the following Handbook Sections issued by the CICA:

- i) Section 1582, "Business Combinations", which replaces Section 1581, "Business Combinations". The Section establishes standards for the accounting for a business combination. The new Section requires the acquiring entity in a business combination to recognize most of the assets acquired and liabilities assumed in the transaction at their acquisition-date fair values including non-controlling interest and contingent consideration. Subsequent changes in fair value of contingent consideration classified as a liability are recognized in earnings. Acquisition-related and integration costs are also to be expensed as incurred rather than considered as part of the purchase price allocation. In addition, changes in estimates associated with future income tax assets after the measurement period are recognized as income tax expense rather than as a reduction of goodwill, with prospective application to all business combinations regardless of the date of acquisition.
- ii) Section 1601, "Consolidated Financial Statements" and Section 1602, "Non-Controlling Interests", together replace Section 1600, "Consolidated Financial Statements". Section 1601 establishes standards for the preparation of consolidated financial statements. Section 1602 establishes standards for accounting for a non-controlling interest in a subsidiary in consolidated financial statements subsequent to a business combination. Section 1602 requires the Company to report non-controlling interests as a separate component of shareholders' equity rather than as a liability on the consolidated balance sheets. Transactions between an entity and non-controlling interests are considered as equity transactions. In addition, the attribution of net earnings and comprehensive income between the Company's shareholders and non-controlling interests is presented separately in the consolidated statements of earnings and comprehensive income rather than reflecting non-controlling interests as a deduction of net earnings and total comprehensive income.

In accordance with the transitional provisions, these sections have been applied prospectively (starting October 1, 2009), with the exception of the presentation requirements for non-controlling interest, which must be applied retrospectively and was reflected in the 2010 consolidated financial statements.

USE OF ESTIMATES

The preparation of the consolidated financial statements in conformity with Canadian GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and shareholders' equity and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting period. Because of the use of estimates inherent in the financial reporting process, actual results could differ from those estimates. Significant estimates include, but are not limited to, purchase price allocation of business combinations, income taxes, contingencies and other liabilities, revenue recognition, stock based compensation, investment tax credits and government programs, the impairment of long-lived assets and goodwill.

BASIS OF CONSOLIDATION

The consolidated financial statements include the accounts of the Company and its subsidiaries. All intercompany transactions and balances have been eliminated. The Company accounts for its jointly-controlled investment using the proportionate consolidation method.

Note 2 Summary of significant accounting policies (continued)

REVENUE RECOGNITION, WORK IN PROGRESS AND DEFERRED REVENUE

The Company generates revenue principally through the provision of IT services and BPS as described in Note 1.

The Company provides services and products under arrangements that contain various pricing mechanisms. The Company recognizes revenue when the following basic recognition criteria are met: persuasive evidence of an arrangement exists, services or products have been provided to the client, the fee is fixed or determinable, and collectability is reasonably assured.

Some of the Company's arrangements may include client acceptance clauses. Each clause is analyzed to determine whether the earnings process is complete when the service is performed. Formal client sign-off is not always necessary to recognize revenue, provided that the Company objectively demonstrates that the criteria specified in the acceptance provisions are satisfied. Some of the criteria reviewed include historical experience with similar types of arrangements, whether the acceptance provisions are specific to the client or are included in all arrangements, the length of the acceptance term and historical experience with the specific client.

Revenue from benefits-funded arrangements is recognized only to the extent it can be predicted, with reasonable certainty, that the benefit stream will generate amounts sufficient to fund the value on which revenue recognition is based.

Revenue from sales of third party vendor products, such as software licenses, or services is recorded gross when the Company is a principal to the transaction and is recorded net of costs when the Company is acting as an agent between the client and vendor. Factors generally considered to determine whether the Company is a principal or an agent are if the Company is the primary obligor to the client, if it adds meaningful value to the vendor's product or service or if it assumes delivery and credit risks.

Provisions for estimated contract losses, if any, are recognized in the period in which the loss is determined. Contract losses are measured at the amount by which the estimated total costs exceed the estimated total revenue from the contract.

Multiple-deliverable arrangements

The Company enters into multiple-deliverable arrangements, which may include a combination of IT services and BPS. The guidance below is applied to determine how to separate multiple-deliverable arrangements into separate units of accounting and to allocate the total arrangement consideration among those separate units of accounting.

a) Non-software deliverables

Arrangements entered into or materially modified on or after October 1, 2010 are subject to EIC-175 adopted by the Company at the beginning of fiscal year 2011 as described in "Changes in Accounting Policies". Under the new guidance, the total arrangement consideration is allocated to each separate unit of accounting if: 1) the delivered item has value to the client on a stand-alone basis; and 2) in an arrangement that includes a general right of return relative to the delivered item, the delivery or performance of the undelivered item is considered probable and substantially in the control of the Company. If these criteria are met, the total arrangement consideration is allocated among the separate units of accounting based on their relative selling prices. Based on this method, the selling price of each separate unit of accounting is determined using VSOE of selling price if available, otherwise TPE of selling price or ESP if neither VSOE nor TPE of selling price is available. VSOE of selling price is established using the price charged for a deliverable when sold separately by the Company. TPE of selling price is established using the vendor's or competitors' prices for similar deliverables. ESP is the price at which the Company would offer the service if the deliverable were sold regularly on a stand-alone basis. ESP is established by considering a number of internal and external factors including, but not limited to, geographies, the Company's pricing policies, internal costs and gross margins.

For arrangements that were in place as of, and were not materially modified after, September 30, 2010, the previous guidance remains effective. Under the previous guidance, if an arrangement involved the provision of multiple-deliverables, the total

arrangement value was allocated to each separate units of accounting when: 1) the delivered item had value to the client on a stand-alone basis; 2) there was objective and reliable evidence of the fair value of the undelivered item; and 3) in an arrangement that includes a general right of return relative to the delivered item, the delivery or performance of the undelivered item was considered probable and substantially in the control of the Company. If these criteria were met, then the total arrangement consideration was allocated among the separate units of accounting based on their relative fair values. Fair value was established based on VSOE or TPE of fair value as described above. In the absence of the fair value for the delivered item, the residual method was allowed to allocate the arrangement consideration. Under the residual method, the amount of revenue allocated to the delivered items was the total arrangement consideration less the aggregate VSOE or TPE of fair value of any undelivered items.

b) Software deliverables

The arrangements involving software deliverables may include more than one software deliverable, such as the sale of software licenses, the provision of systems integration and consulting services related to software licenses and the provision of post-contract customer support. The total arrangement consideration is allocated to each separate unit of accounting if: 1) the undelivered items are not essential to the functionality of a delivered item; and 2) there is objective and reliable evidence of the fair value of the undelivered items. If these criteria are met, the total arrangement consideration is allocated among the separate units of accounting based on their relative fair values or residual method if fair value for all undelivered items is available, but not for the delivered item. Fair value is established based on VSOE of fair value as described above.

c) Both software and non-software deliverables

In arrangements that include a combination of software and non-software deliverables, the Company first allocates the total arrangement consideration to the software group of deliverables as a whole and to each of the non-software deliverables based on their relative selling prices. The Company then further allocates consideration within the software group to the respective deliverables within that group following the guidance described in "b) Software deliverables".

Most of the deliverables within the Company's multiple-deliverable arrangements qualify as separate units of accounting. A deliverable that does not qualify as a separate unit of accounting is combined into one unit of accounting and the appropriate revenue recognition method is applied.

Once the Company has determined the separate units of accounting within an arrangement and the allocation of total arrangement consideration to each separate unit of accounting, revenue is recognized as described below.

Outsourcing

Revenue from outsourcing arrangements under time and materials and unit-priced arrangements are generally recognized as the services are provided at the contractually stated price. If the contractual per-unit prices within a unit-priced contract change during the term of the arrangement, the Company evaluates whether it is more appropriate to record revenue based on the average per-unit price during the term of the arrangement or based on the contractually stated price.

Revenue from outsourcing arrangements under fixed-fee arrangements is recognized on a straight-line basis over the term of the arrangement, regardless of the amounts billed, unless there is a better measure of performance or delivery.

Systems integration and consulting services

Revenue from systems integration and consulting services under time and material arrangements is recognized as the services are rendered, and revenue under cost-based arrangements is recognized as reimbursable costs are incurred.

Revenue from systems integration and consulting services under fixed-fee arrangements and arrangements involving software deliverables where the implementation services are essential to the functionality of the software or where the software requires significant customization are recognized using the percentage-of-completion method over the implementation period. The Company uses labour costs or labour hours to measure the progress towards completion. This method relies on

Note 2 Summary of significant accounting policies (continued)

Systems integration and consulting services (continued)

estimates of total expected labour costs or total expected labour hours to complete the service, which are compared to labour costs or labour hours incurred to date, to arrive at an estimate of the percentage of revenue earned to date. Management regularly reviews underlying estimates of total expected labour costs or hours. Revisions to estimates are reflected in the consolidated statement of earnings in the period in which the facts that gave rise to the revision become known.

Software licenses and post-contract customer support

Revenue from software licenses is recognized upon delivery when the software licenses qualify as a separate unit of accounting and the basic recognition criteria are met.

Revenue from post-contract customer support services for software licenses sold and implemented is recognized ratably over the term of the arrangement.

Work in progress and deferred revenue

Amounts recognized as revenue in excess of billings are classified as work in progress. Amounts received in advance of the delivery of products or performances of services are classified as deferred revenue.

REIMBURSEMENTS

Reimbursements, including those relating to travel and other out-of-pocket expenses, and other similar third party costs, such as the cost of hardware and software re-sales, are included in revenue, and the corresponding expense is included in costs of services when the Company has assessed that the costs meet the criteria for gross revenue recognition.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents consist of unrestricted cash and short-term investments having an initial maturity of three months or less.

SHORT-TERM INVESTMENTS

Short-term investments, comprised of term deposits, have remaining maturities over three months, but not more than one year, at the date of purchase.

FUNDS HELD FOR CLIENTS AND CLIENTS' FUNDS OBLIGATIONS

In connection with the Company's payroll, tax filing and claims services, the Company collects funds for payment of payroll, taxes and claims, temporarily holds such funds until payment is due, remits the funds to the clients' employees, appropriate tax authorities or claim holders, files federal and local tax returns, and handles related regulatory correspondence and amendments. The funds held for clients' includes short-term and long-term bonds, and cash. The Company presents the funds held for clients and related obligations separately. Funds held for clients are classified as current assets since, based upon management's intentions, these funds are held solely for the purpose of satisfying the clients' funds obligations, which will be repaid within one year of the balance sheet date.

CAPITAL ASSETS

Capital assets, including those under capital leases, are recorded at cost and are amortized over their estimated useful lives using the straight-line method.

Buildings	10 to 40 years
Leasehold improvements	Lesser of the useful life or lease term
Furniture, fixtures and equipment	3 to 20 years
Computer equipment	3 to 5 years

INTANGIBLE ASSETS

Contract costs

Contract costs are mainly incurred when acquiring or implementing long-term outsourcing contracts. Contract costs are classified as intangible assets. These assets are recorded at cost and amortized using the straight-line method over the term of the respective contracts. Contract costs are comprised primarily of incentives and transition costs.

Occasionally, incentives are granted to clients upon signing of outsourcing contracts. These incentives can be granted either in the form of cash payments, issuance of equity instruments or discounts awarded principally over a transition period, as negotiated in the contract. In the case of equity instruments, cost is measured at the estimated fair value at the time they are issued. For discounts, cost is measured at the value of the granted financial commitment. As services are provided to the client, the amount is amortized and recorded as a reduction of revenue.

Capital assets acquired from a client in connection with outsourcing contracts are capitalized as such and amortized consistent with the amortization policies described previously. The excess of the amount paid over the fair value of capital assets acquired in connection with outsourcing contracts is considered as an incentive granted to the client, and is recorded as described in the preceding paragraph.

Transition costs consist of expenses associated with the installation of systems and processes incurred after the award of outsourcing contracts, relocation of transitioned employees and exit from client facilities. Under BPS contracts, the costs consist primarily of expenses related to activities such as the conversion of the client's applications to the Company's platforms. These costs are comprised essentially of labour costs, including compensation and related fringe benefits, as well as subcontractor costs.

Pre-contract costs associated with acquiring or implementing outsourcing contracts are expensed as incurred except where it is virtually certain that the contracts will be awarded and the costs are directly related to the acquisition of the contract. Eligible pre-contract costs are recorded at cost and amortized using the straight-line method over the expected term of the respective contracts.

Other intangible assets

Other intangible assets consist mainly of internal-use software, business solutions, software licenses and client relationships.

Internal-use software, business solutions and software licenses are recorded at cost. Business solutions developed internally and marketed are capitalized when they meet specific capitalization criteria related to technical, market and financial feasibility. Business solutions, software licenses and client relationships acquired through business combinations are initially recorded at their fair value based on the present value of expected future cash flows.

The Company amortizes its other intangible assets using the straight-line method over the following estimated useful lives:

Internal-use software	2 to 7 years
Business solutions	2 to 10 years
Software licenses	3 to 8 years
Client relationships and other	2 to 10 years

IMPAIRMENT OF LONG-LIVED ASSETS

When events or changes in circumstances indicate that the carrying amount of long-lived assets, such as capital assets and intangible assets may not be recoverable, undiscounted estimated cash flows are projected over their remaining term and compared to the carrying amount. To the extent that such projections indicate that future undiscounted cash flows are not sufficient to recover the carrying amounts of related assets, a charge is recorded to reduce the carrying amount to the projected future discounted cash flows.

Note 2 Summary of significant accounting policies (continued)

OTHER LONG-TERM ASSETS

Other long-term assets consist mainly of deferred compensation plan assets, long-term investments, forward contracts, long-term maintenance agreements, investments in direct financing leases and deferred financing fees. Long-term investments, comprised of bonds, are classified as long-term based on management's intentions.

BUSINESS COMBINATIONS AND GOODWILL

The Company accounts for its business combinations using the acquisition method. Under this method the cost of an acquisition is measured as the aggregate of the consideration transferred and the amount of any non-controlling interest in the acquiree. Acquisition-related and integration costs associated with the business combination are expensed as incurred. The Company recognizes goodwill as of the acquisition date as the excess of the cost of the acquisition over the net identifiable assets acquired and liabilities assumed at their acquisition-date fair values. Subsequent changes in fair values are adjusted against the cost of acquisition when they qualify as measurement period adjustments. All other subsequent changes are recognized in net earnings.

For all business acquisitions, the Company records the results of operations of the acquired entities as of their respective effective acquisition dates.

Goodwill for each reporting unit is assessed for impairment at least annually or when an event or circumstance occurs that more likely than not reduces the fair value of a reporting unit below its carrying amount. The Company has designated September 30 as the date for the annual impairment test. An impairment charge is recorded when the carrying amount of the reporting unit exceeds its fair value and is determined as the difference between the goodwill's carrying amount and its implied fair value.

EARNINGS PER SHARE

Basic earnings per share are based on the weighted average number of shares outstanding during the period. Diluted earnings per share is determined using the treasury stock method to evaluate the dilutive effect of stock options and performance share units ("PSUs").

RESEARCH AND SOFTWARE DEVELOPMENT COSTS

Research costs are charged to earnings in the period in which they are incurred, net of related tax credits. Software development costs are charged to earnings in the year they are incurred, net of related tax credits, unless they meet specific capitalization criteria related to technical, market and financial feasibility.

TAX CREDITS

The Company follows the cost reduction method to account for tax credits. Under this method, tax credits related to operating expenditures are recognized in the period in which the related expenditures are charged to operations, provided there is reasonable assurance of realization. Tax credits related to capital expenditures are recorded as a reduction of the cost of the related asset, provided there is reasonable assurance of realization. The tax credits recorded are based on management's best estimates of amounts expected to be recovered and are subject to audit by the taxation authorities.

INCOME TAXES

Income taxes are accounted for using the asset and liability method of accounting for income taxes. Future income tax assets and liabilities are determined based on deductible or taxable temporary differences between the amounts reported for financial statement purposes and tax values of assets and liabilities using substantively enacted income tax rates expected to be in effect for the year in which the differences are expected to reverse. A valuation allowance is recorded for the portion of the future income tax assets when its realization is not considered more likely than not.

TRANSLATION OF FOREIGN CURRENCIES

Revenue and expenses denominated in foreign currencies are recorded at the rate of exchange prevailing at the transaction date. Monetary assets and liabilities denominated in foreign currencies are translated at exchange rates prevailing at the balance sheet date. Realized and unrealized translation gains and losses are reflected in net earnings.

Self-sustaining subsidiaries, with economic activities largely independent of the Company, are accounted for using the current rate method. Under this method, assets and liabilities of subsidiaries denominated in a foreign currency are translated into Canadian dollars at exchange rates in effect at the balance sheet date. Revenue and expenses are translated at average exchange rates prevailing during the period. Resulting unrealized gains or losses are reported as net unrealized gains (losses) on translating financial statements of self-sustaining foreign operations in the consolidated statement of comprehensive income.

The accounts of foreign subsidiaries, which are financially or operationally dependent on the Company, are accounted for using the temporal method. Under this method, monetary assets and liabilities are translated at the exchange rates in effect at the balance sheet date, and non-monetary assets and liabilities are translated at historical exchange rates. Revenue and expenses are translated at average rates for the period. Translation exchange gains or losses of such subsidiaries are reflected in net earnings.

STOCK-BASED COMPENSATION

The Company uses the fair value based method to account for stock options and PSUs awarded under their respective plans. The fair value of stock options and PSUs is recognized as compensation costs in earnings with a corresponding credit to contributed surplus on a straight line basis over the vesting period of the entire award. The number of stock options and PSUs expected to vest are estimated on the grant date and subsequently revised on a periodic basis. When stock options are exercised, any consideration paid by employees is credited to capital stock and the recorded fair value of the stock option is removed from contributed surplus and credited to capital stock. When PSUs are exercised, the recorded fair value of PSUs is removed from contributed surplus and credited to capital stock.

FINANCIAL INSTRUMENTS

All financial assets designated as held-to-maturity or loans and receivables, as well as financial liabilities designated as other liabilities, are initially measured at their fair values and subsequently at their amortized cost using the effective interest rate method. All financial assets and liabilities designated as held for trading are measured at their fair values and gains and losses related to periodic revaluations are recorded in the consolidated statement of earnings. All financial assets designated as available for sale are measured at their fair value and any unrealized gains and losses, net of applicable income taxes, are reported in other comprehensive income (loss) in the consolidated statement of comprehensive income. Interest income earned and realized gains and losses on the sale of available for sale assets are recorded in the consolidated statement of earnings.

Note 2 Summary of significant accounting policies (continued)

FINANCIAL INSTRUMENTS (CONTINUED)

Transaction costs are comprised primarily of legal, accounting and other costs directly attributable to the issuance of the respective financial assets and liabilities. Transaction costs are capitalized to the cost of financial assets and liabilities classified as other than held for trading.

The Company has categorized its financial instruments as follows:

Held for trading

Cash and cash equivalents, short-term investments (other than those included in funds held for clients), derivatives (unless they qualify for hedge accounting, refer to “Hedging Transactions”) and bank overdraft are classified as held for trading. Deferred compensation plan assets were designated as held for trading upon initial recognition as this reflects management’s intentions.

Loans and receivables

Trade accounts receivable, work in progress, and cash included in funds held for clients.

Available for sale

Short-term and long-term bonds included in funds held for clients and long-term investments.

Other liabilities

Accounts payable and accrued liabilities, accrued compensation, long-term debt, excluding obligations under capital leases, and clients’ funds obligations.

Fair value hierarchy

Fair value measurements recognized in the balance sheet are categorized in accordance with the following levels:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: inputs other than quoted prices included in Level 1 but that are observable for the asset or liability, either directly or indirectly; and

Level 3: inputs for the asset or liability that are not based on observable market data.

All financial assets and liabilities measured at fair value are categorized in Level 1, except for derivatives, investments included in funds held for clients, and long-term investments which are categorized in Level 2.

HEDGING TRANSACTIONS

The Company uses various financial instruments to manage its exposure to fluctuations in foreign currency exchange rates. The Company does not hold or use any derivative instruments for trading purposes.

At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which the Company wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the entity will assess the effectiveness of changes in the hedging instrument’s fair value in offsetting the exposure to changes in the hedged item’s fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Cash flow hedges on Senior U.S. unsecured notes

The Company has entered into forward contracts to hedge the contractual principal repayments of the Senior U.S. unsecured notes. The purpose of the hedging transactions is to hedge the risk of variability in functional currency equivalent cash flows associated with the foreign currency debt principal repayments.

The hedges were documented as cash flow hedges and no component of the derivative instruments' fair value is excluded from the assessment and measurement of hedge effectiveness. The hedges are considered to be highly effective as the terms of the forward contracts coincide with the intended repayment of the remaining tranche of the debt.

The forward contracts are derivative instruments and, therefore, are recorded at fair value in the consolidated balance sheet under other long-term assets and the effective portion of the change in fair value of the derivatives is recognized in other comprehensive income (loss). An amount that will offset the related translation gain or loss arising from the remeasurement of the portion of the debt that is designated is reclassified each period from other comprehensive income (loss) to earnings. The forward premiums or discounts on the forward contracts used to hedge foreign currency long-term debt are amortized as an adjustment to interest expense over the term of the forward contracts. Valuation models, such as discounted cash flow analysis using observable market inputs, are utilized to determine the fair values of the forward contracts. The cash flows of the hedging transactions are classified in the same manner as the cash flows of the position being hedged.

Hedge on net investments in self-sustaining foreign subsidiaries

The Company has designated certain long-term debt as a hedging instrument for a portion of the Company's net investment in self-sustaining U.S. and European subsidiaries. Foreign exchange translation gains or losses on the net investments and the effective portions of gains or losses on instruments hedging the net investments are recorded in other comprehensive income (loss).

Cash flow hedges on future revenue

The Company has also entered into various foreign currency forward contracts to hedge the variability in the foreign currency exchange rate between the U.S. dollar and the Indian rupee on future U.S. revenue, to hedge the variability in the foreign currency exchange rate between the U.S. dollar and the Canadian dollar on future U.S. revenue and to hedge the variability in foreign currency exchange rate between the Indian rupee and the Canadian dollar on the future Canadian revenue.

These hedges were documented as cash flow hedges and no component of the derivative instruments' fair value is excluded from the assessment and measurement of hedge effectiveness. The forward contracts are derivative instruments, and, therefore, are recorded at fair value in the consolidated balance sheet under other current assets, other long-term assets, accrued liabilities or other long-term liabilities. Valuation models, such as discounted cash flow analysis using observable market inputs, are utilized to determine the fair values of the forward contracts.

The effective portion of the change in fair value of the derivative instruments is recognized in other comprehensive income (loss) and the ineffective portion, if any, in the consolidated statement of earnings. The effective portion of the change in fair value of the derivatives is reclassified out of other comprehensive income (loss) into the consolidated statement of earnings as an adjustment to revenue when the hedged revenue is recognized. The assessment of effectiveness is based on forward rates utilizing the hypothetical derivative method. The cash flows of the hedging transactions are classified in the same manner as the cash flows of the position being hedged.

FUTURE CHANGES TO AUTHORITATIVE ACCOUNTING PRONOUNCEMENTS

In February 2008, the Canadian Accounting Standards Board confirmed that the use of the IFRS would be required for Canadian publicly accountable enterprises for fiscal years beginning on or after January 1, 2011. Accordingly, the Company's first quarter under the IFRS reporting standards will begin on October 1, 2011. For more details on the transition to IFRS, refer to the IFRS section of the MD&A for the year ended September 30, 2011.

Note 3 Cash and cash equivalents and bank overdraft

	2011	2010
	\$	\$
Cash	100,071	27,162
Cash equivalents	57,690	100,662
Cash and cash equivalents	157,761	127,824
Bank overdraft ¹	(75,538)	-
	82,223	127,824

¹ As at September 30, 2011, the Company has a bank overdraft that is an integral part of the Company's cash management activities. The overdraft bears interest at the banks' weighted average prime rate of 3.12%, and is unsecured and uncommitted.

Note 4 Accounts receivable

	2011	2010
	\$	\$
Trade	395,468	349,349
Other ¹	99,287	74,577
	494,755	423,926

¹ Other accounts receivable include refundable tax credits on salaries related to the Québec Development of E-Business program, Research and Development tax credits in North America and Europe, and other Job and Economic Growth Creation programs available. The tax credits represent approximately \$76,978,000 and \$55,758,000 of other accounts receivable in 2011 and 2010, respectively.

Effective April 1, 2008, the Company became eligible for the new Development of E-Business refundable tax credit, which replaces prior existing Québec tax credit programs. The fiscal measure enables corporations with an establishment in the province of Québec that carry out eligible activities in the technology sector to obtain a refundable tax credit equal to 30% of eligible salaries, up to a maximum of \$20,000 per year per eligible employee until December 31, 2015.

Prior to April 1, 2008, in order to be eligible for the E-Commerce Place, Cité du Multimédia de Montréal, New Economy Centres tax credits, the Company relocated some of its eligible employees to designated locations. Real estate costs for these designated locations are significantly higher than they were at the previous facilities. As at September 30, 2011, the balance outstanding for financial commitments for these real estate locations was \$310,076,000 ranging between 1 year and 11 years. The refundable tax credits for these programs were calculated at rates varying between 35% to 40% on salaries paid in Québec to a maximum range of \$12,500 to \$15,000 per year per eligible employee.

Note 5 Funds held for clients

	2011	2010
	\$	\$
Cash	67,140	248,695

	55,914	42,261

¹ During the fiscal year 2011, the Company entered into a leasing arrangement with a client accounted for as direct financing leases. As at September 30, 2011, an amount of \$2,977,000 representing the current portion is included in prepaid expenses and other current assets and the remaining \$4,610,000 is included in other long-term assets.

Note 9 Goodwill

Due to the change in operating segments effective October 1, 2010, the Company reallocated goodwill to the new reporting units using relative fair value and conducted a goodwill impairment test on October 1, 2010 using the revised reporting units, which are the same as the operating segments (Note 23). Based on the results of this test, no impairment charge was required. In addition, the Company completed the annual impairment test as at September 30, 2011 and did not identify any impairment.

The variations in goodwill are as follows:

	2011				
	GIS	Canada	U.S. & India	Europe & Asia Pacific	Total

Other ²	10,198	5,891
	125,662	119,899

¹ Deferred rent includes the long-term portion of lease provisions which consist of estimated costs associated with vacated premises.

The total costs associated with the vacated premises of \$16,471,000 recorded in costs of services, selling and administrative expenses is included in the GIS, Canada and US & India segments for an amount of \$2,605,000, \$11,468,000 and \$2,398,000 respectively, in 2011 (\$3,629,000 included in the Canada segment in 2010 and \$10,606,000 included in the Canada and Europe & Asia Pacific segments for an amount of \$9,825,000 and \$781,000 respectively, in 2009).

² Asset retirement obligations included in "Other" pertain to operating leases of office buildings where certain arrangements require premises to be returned to their original state at the end of the lease term. The asset retirement obligation liability of \$6,590,000 (\$3,060,000 in 2010) was based on the expected cash flows of \$8,790,000 (\$4,370,000 in 2010) and was discounted at an average interest rate of 5.64% (6.42% in 2010). The timing of the settlement of these obligations varies between one and 12 years.

Note 11 Long-term debt

Current portion	402,534	114,577
	603,147	1,039,299

¹ As at September 30, 2011, the private placement financing with U.S. institutional investors is comprised of one remaining tranche of Senior U.S. unsecured notes maturing in January 2014 for an amount of US\$20,000,000. On January 28, 2011, the Company repaid the second tranche in the amount of \$87,300,000 (US\$87,000,000), and settled the related forward contracts taken to manage the Company's exposure to fluctuation in the foreign exchange rate resulting in a cash outflow of \$1,275,000. The Senior U.S. unsecured notes contain covenants that require the Company to maintain certain financial ratios (Note 28). As at September 30, 2011, the Company is in compliance with these covenants.

² The Company has a five-year unsecured revolving credit facility available for an amount of \$1,500,000,000 that expires in August 2012 bearing interest at one month LIBOR plus a variable margin that is determined based on leverage ratios (Note 28). As at September 30, 2011, an amount of \$859,277,000 has been drawn upon this facility. Also an amount of \$18,317,000 has been committed against this facility to cover various letters of credit issued for clients and other parties. The revolving credit facility contains covenants that require the Company to maintain certain financial ratios (Note 28). As at September 30, 2011, the Company is in compliance with these covenants. The Company also has a proportionate share of a revolving demand credit facility related to the joint venture for an amount of \$2,500,000 bearing interest at the Canadian prime rate. As at September 30, 2011, no amount has been drawn upon this facility.

During the year, the Company entered into a US\$475,000,000 private placement financing with U.S. institutional investors that will be drawn down no later than December 15, 2011. The private placement will be comprised of three tranches of Senior U.S. unsecured notes, with a weighted average maturity of 8.2 years and a weighted average fixed coupon of 4.57%. As a result of this private placement, an amount of \$493,478,000 due under the existing unsecured revolving credit facility maturing within the next 12 months has been classified as long-term as of September 30, 2011 based on management's intention to reimburse part of the unsecured revolving term facility with the proceeds of the private placement.

Note 11 Long-term debt (continued)

Principal repayments on long-term debt over the forthcoming years are as follows:

	\$
2012	379,595
2013	14,574
2014	33,522
2015	9,425
2016	6,615
Thereafter	494,768
Total principal payments on long-term debt	938,499

Minimum capital lease payments are as follows:

	Principal	Interest	Payment
	\$	\$	\$

Balance, September 30, 2011	227,055,040	1,131,672	33,608,159	46,887	260,663,199	1,178,559

¹ On January 26, 2011, the Company's Board of Directors authorized the renewal of a Normal Course Issuer Bid ("NCIB") to purchase up to 10% of the public float of the Company's Class A subordinate shares during the next year. The Toronto Stock Exchange ("TSX") subsequently approved the Company's request for approval. The NCIB enables the Company to purchase up to 23,006,547 Class A subordinate shares (25,151,058 in 2010 and 26,970,437 in 2009) for cancellation on the open market through the TSX. The Class A subordinate shares were available for purchase under the NCIB commencing February 9, 2011, until no later than February 8, 2012, or on such earlier date when the Company completes its purchases or elects to terminate the bid. During fiscal year 2011, the Company repurchased, under the previous and current NCIB, 16,373,400 Class A subordinate shares (35,602,085 in 2010 and 9,525,892 in 2009) for cash consideration of \$305,028,000 (\$516,699,000 in 2010 and \$99,881,000 in 2009). The excess of the purchase price over the carrying value of Class A subordinate shares repurchased, in the amount of \$225,019,000 (\$347,940,000 in 2010 and \$55,609,000 in 2009), was charged to retained earnings.

² The carrying value of Class A subordinate shares includes \$14,341,000 (\$13,332,000 in 2010 and \$5,253,000 in 2009), which corresponds to a reduction in contributed surplus representing the value of accumulated compensation cost associated with the options exercised during the year.

³ During the year ended September 30, 2009, a shareholder converted 600,000 Class B shares into 600,000 Class A subordinate shares.

⁴ In connection with the PSU plan, the Company provided instructions to a trustee under the terms of a Trust Agreement to purchase 164,012 Class A subordinate shares of the Company in the open market for \$2,566,000 during the year ended September 30, 2011 (Note 13b).

Note 13 Stock-based compensation and contributed surplus

A) STOCK OPTIONS

Under the Company's stock option plan, the Board of Directors may grant, at its discretion, options to purchase Class A subordinate shares to certain employees, officers, directors and consultants of the Company and its subsidiaries. The exercise price is established by the Board of Directors and is equal to the closing price of the Class A subordinate shares on the TSX on the day preceding the date of the grant. Options generally vest one to four years from the date of grant conditionally upon the achievement of objectives and must be exercised within a ten-year period, except in the event of retirement, termination of employment or death. As at September 30, 2011, 46,258,529 Class A subordinate shares have been reserved for issuance under the stock option plan.

The following table presents information concerning all outstanding stock options granted by the Company for the years ended September 30:

	2011		2010		2009	
	Number of options	Weighted average exercise price per share	Number of options	Weighted average exercise price per share	Number of options	Weighted average exercise price per share
		\$		\$		\$
Outstanding, beginning of year	26,555,483	10.03	28,883,835	9.16	26,757,738	9.34

	24,163,317	6.67	11.42	13,108,369	9.39

The following table presents the weighted average assumptions used to determine the stock-based compensation cost recorded in costs of services, selling and administrative expenses using the Black-Scholes option pricing model for the years ended September 30:

	2011	2010	2009
Stock-based compensation cost (\$)	15,022	15,517	8,617
Dividend yield (%)	0.00	0.00	0.00
Expected volatility (%)	27.11	27.32	24.42
Risk-free interest rate (%)	1.99	2.48	3.05
Expected life (years)	5.00	5.00	5.00
Weighted average grant date fair value (\$)	4.31	3.63	2.59

B) PERFORMANCE SHARE UNITS

On September 28, 2010, the Company adopted a PSU plan for senior executives and other key employees ("participants"). Under that plan, the Board of Directors may grant PSUs to participants which entitles them to receive one Class A subordinate share for each PSU. The vesting and performance conditions are determined by the Board of Directors at the time of each grant. PSUs expire on December 31, of the third calendar year during which the award is made, except in the event of retirement, termination of employment or death. Granted PSUs vest annually over a period of four years from the date of grant conditionally upon achievement of objectives.

Class A subordinate shares purchased in connection with the PSU plan are held in trust for the benefits of the participants. The trust, considered as a variable interest entity, is consolidated in the Company's financial statements with the cost of the purchased shares recorded as a reduction of capital stock (Note 12).

During the year ended September 30, 2011, the Company granted 164,012 PSUs with a grant date fair value of \$15.51 per unit based on the closing price of the Class A subordinate shares on the TSX on that date. There was no grant under this plan in fiscal year 2010.

The stock-based compensation cost related to PSUs recorded in costs of services, selling and administrative expenses for the year ended September 30, 2011 was \$399,000 (nil for the year ended September 30, 2010).

C) CONTRIBUTED SURPLUS

The following table summarizes the contributed surplus activity since September 30, 2008:

	\$
Balance, September 30, 2008	77,373
Compensation cost associated with exercised options (Note 12)	(5,253)
Stock-based compensation cost	8,617
Balance, September 30, 2009	80,737
Compensation cost associated with exercised options (Note 12)	(13,332)
Stock-based compensation cost	15,517
Balance, September 30, 2010	82,922
Compensation cost associated with exercised options (Note 12)	(14,341)
Stock-based compensation cost	15,421
Balance, September 30, 2011	84,002

Note 14 Earnings per share

The following table sets forth the computation of basic and diluted earnings per share from continuing operations attributable to shareholders of the Company for the years ended September 30:

	2011			2010			2009		
	Earnings from continuing operations	Weighted average number of shares outstanding ¹	Earnings per share from continuing operations	Earnings from continuing operations	Weighted average number of shares outstanding ¹	Earnings per share from continuing operations	Earnings from continuing operations	Weighted average number of shares outstanding ¹	Earnings per share from continuing operations
	\$		\$	\$		\$	\$		\$
Basic	434,809	265,333,074	1.64	362,386	284,826,257	1.27	315,158	306,853,077	1.03
Dilutive options and PSUs ²		9,953,460			8,093,693			3,492,164	
	434,809	275,286,534	1.58	362,386	292,919,950	1.24	315,158	310,345,241	1.02

¹ The 16,373,400 Class A subordinate shares repurchased and the 164,012 Class A subordinate shares purchased and held in a trust during the fiscal year 2011 (35,602,085 and nil, respectively in 2010 and 9,525,892 and nil, respectively in 2009), were excluded from the calculation of weighted average number of shares outstanding as of the date of transaction.

² The calculation of the diluted earnings per share excluded 6,297,143, 8,029,590 and 13,384,651 options for the years ended September 30, 2011, 2010 and 2009, respectively, as they were anti-dilutive.

Note 15 Amortization

	2011	2010	2009
	\$	\$	\$
Amortization of capital assets ¹	78,627	72,067	61,412
Amortization of intangible assets			
Contract costs related to transition costs	23,100	30,396	22,377
Other intangible assets ²			
Internal-use software	10,834	11,121	13,770
Business solutions	35,371	26,322	40,929
Software licenses	19,226	18,726	16,674

	(321,424)	35,434	(285,990)

For the year ended September 30, 2011, \$7,476,000 of the net unrealized gains previously recognized in other comprehensive income (net of income taxes of \$3,314,000) were reclassified to net earnings for derivatives designated as cash flow hedges (\$8,359,000 net of income taxes of \$3,746,000 for the year ended September 30, 2010, and \$928,000 net of income taxes of \$478,000 for the year ended September 30, 2009).

Note 17 Income taxes

Future income taxes are classified as follows:

	2011	2010
	\$	\$
Current future income tax assets	3,522	16,509
Long-term future income tax assets	11,601	11,592
Current future income tax liabilities	(20,389)	(26,423)
Long-term future income tax liabilities	(146,889)	(170,683)
Future income taxes, net	(152,155)	(169,005)

The income tax expense is as follows:

	2011	2010	2009
	\$	\$	\$
Current	127,379	136,387	95,923
Future	(15,886)	(21,417)	29,300
	111,493	114,970	125,223

The Company's effective income tax rate on income from continuing operations differs from the combined Federal and Provincial Canadian statutory tax rate as follows:

	2011	2010	2009
	%	%	%
Company's statutory tax rate	28.8	30.2	30.9
Effect of foreign tax rate differences	(2.4)	0.3	-
Final determination from agreements with tax authorities and expirations of statutes of limitations	(6.8)	(7.9)	(3.9)
Non-deductible and tax exempt items	0.7	1.7	1.3
Impact on future tax assets and liabilities resulting from tax rate changes	0.1	(0.3)	-
Tax benefits on losses	-	0.1	0.1
Effective income tax rate	20.4	24.1	28.4

Future income tax assets and liabilities are as follows at September 30:

	2011	2010
	\$	\$
Future income tax assets:		
Accounts payable, accrued liabilities and other long-term liabilities	25,021	14,074
Tax benefits on losses carried forward	11,423	14,667
Capital assets and intangible assets	18,404	20,482
Accrued compensation	16,580	28,397
Unrealized losses on cash flow hedges	2,054	1,585
Allowance for doubtful accounts	3,255	1,793
Other	1,280	1,612
	78,017	82,610
Valuation allowance	(3,964)	(4,346)
	74,053	78,264
Future income tax liabilities:		
Capital assets, intangible assets and other long-term assets	141,369	161,988
Work in progress	28,090	25,165
Goodwill	33,490	27,774
Refundable tax credits on salaries	14,756	20,985
Unrealized gains on cash flow hedges	3,511	6,908
Other	4,992	4,449
	226,208	247,269
Future income taxes, net	(152,155)	(169,005)

At September 30, 2011, the Company had \$37,152,000 in non-capital losses carried forward, of which \$2,973,000 expire at various dates up to 2018 and \$34,179,000 have no expiry dates. The Company recognized a future tax asset of \$11,423,000 on the losses carried forward and recognized a valuation allowance of \$3,964,000. The decrease in the valuation allowance mainly results from the expiry of non capital losses. The resulting net future income tax asset of \$7,459,000 is the amount that is more likely than not to be realized.

Foreign earnings of certain of the Company's subsidiaries would be taxed only upon their repatriation to Canada. The Company has not recognized a future income tax liability for these retained earnings as management does not expect them to be repatriated. A future income tax liability will be recognized when the Company expects that it will recover those undistributed earnings in a taxable matter, such as the sale of the investment or through the receipt of dividends. On remittance, certain countries impose withholding taxes that, subject to certain limitations, are then available for use as tax credits against a federal or provincial income tax liability, if any.

Note 18 Costs of services, selling and administrative

Tax credits netted against costs of services, selling and administrative expenses are as follows:

	2011	2010	2009
	\$	\$	\$
Costs of services, selling and administrative	3,665,024	3,116,425	3,268,995
Tax credits	(111,832)	(90,602)	(98,589)
	3,553,192	3,025,823	3,170,406

Note 19 Investments in subsidiaries

2011 TRANSACTIONS

a) Acquisition

There were no significant acquisitions during fiscal 2011.

b) Disposal

On April 4, 2011, the Company concluded a transaction for a net consideration of \$10,500,000 whereby Conseiller en informatique d'affaires CIA inc. ("CIA") repurchased its shares held by the Company, which represented a 68% interest, excluding its Paris operations, and the Company simultaneously purchased 32% of the operations carried out in CIA's Paris office not previously owned. The Company received \$5,917,000 during the year ended September 30, 2011, with the remaining balance of \$4,583,000 due in quarterly instalments up to March 2014 bearing interest at 10%. The sale did not have a material impact on the Company's net earnings or financial position. The increase in the investment in CIA's Paris office resulted in a decrease in retained earnings of \$811,000. As a result there is no longer a non-controlling interest in the Company's consolidated financial statements.

c) Modifications to purchase price allocation

During the year ended September 30, 2011, the Company finalized the purchase price allocation and made adjustments relating to the acquisition of Stanley, Inc. ("Stanley"). The resulting impact for the year ended September 30, 2011 was a decrease in intangible assets of \$1,743,000, future income tax assets of \$299,000 and future income tax liabilities of \$682,000 and an increase of accrued compensation of \$1,491,000, accounts payable and accrued liabilities of \$50,000 and income taxes payable of \$1,475,000, whereas goodwill increased by \$4,376,000. The prior period figures have not been adjusted given that the effect of restatement was not significant.

d) Acquisition-related and integration costs

In connection with the acquisition of Stanley in fiscal year 2010, the Company expensed \$3,675,000 during the year ended September 30, 2011. The expenses included costs to integrate the operations and to realize synergies.

2010 transactions

a) Acquisition

The Company made the following acquisition:

Stanley – On August 17, 2010, the Company acquired all outstanding shares of Stanley, a provider of information technology services and solutions to U.S. defence, intelligence and federal civilian government agencies, for a total cash consideration of \$923,150,000. The acquisition was financed through a withdrawal from the Company's existing unsecured revolving credit facility and cash on hand of \$832,160,000 and \$90,990,000, respectively. Stanley's operations will increase the scale and capabilities of the Company to serve the U.S. Federal Government expanding the offering into the defence and intelligence space.

The acquisition was accounted for using the acquisition method. The purchase price allocation shown below was preliminary and based on the Company's management's best estimates. The final purchase price allocations were expected to be completed as soon as Company's management had gathered all of the significant information available and considered necessary in order to finalize this allocation.

	Stanley
	\$
Current assets ¹	163,648
Capital assets	9,005
Intangible assets	123,897
Goodwill ²	886,403
Other long-term assets	3,167
Future income taxes	3,564
Current liabilities	(176,110)
Debt, classified as current	(102,262)
Other long-term liabilities	(11,748)
	899,564
Cash acquired	23,586
Net assets acquired	923,150
Cash consideration	923,150

¹ The current assets included accounts receivable with a fair value of \$97,967,000 which approximates the gross amount due under the contracts.

² The goodwill arising from the acquisition mainly represented the future economic value associated to acquired work force and synergies with the Company's operations. All of the goodwill was included in the U.S. and India segment and \$26,323,000 was deductible for tax purposes.

In connection with the acquisition of Stanley, the Company expensed \$20,883,000 during the year ended September 30, 2010. Included in that amount are acquisition-related costs of \$11,573,000 and integration costs of \$9,310,000. The acquisition-related costs consisted mainly of professional fees incurred for the acquisition. The integration costs mainly included provisions related to leases for premises occupied by the acquired business, which the Company vacated, as well as costs related to the termination of certain employees of the acquired business performing functions already available through its existing structure. The acquisition-related and integration costs were separately disclosed in the Company's consolidated statement of earnings.

Note 19 Investments in subsidiaries (continued)

b) Business combination adjustments

Certain unrecorded future income tax assets acquired from past acquisitions were recognized during the year ended September 30, 2010, resulting in a corresponding decrease in income tax expense of \$7,378,000. The transitional rules of the new Section 1582 require that a change in recognized acquired future income tax assets arising from past business combinations be recorded through the income tax expense. Prior to the adoption of Section 1582, the corresponding decrease would have been applied to the goodwill.

2009 TRANSACTIONS

a) Acquisition

There were no significant acquisitions during fiscal 2009.

b) Disposal

On February 20, 2009, the Company disposed of its actuarial services business for purchase consideration of \$3,780,000 less an estimated working capital adjustment. The Company received \$3,565,000 on February 27, 2009. The business was previously included in the Canada segment. As a result of the final agreement, net assets disposed of included goodwill of \$1,499,000. The transaction resulted in a gain of \$1,494,000.

c) Modifications to purchase price allocations

During the year ended September 30, 2009, the Company modified the purchase price allocation and made adjustments relating to certain business acquisitions, resulting in a net decrease of accounts payable and accrued liabilities of \$969,000 and a net increase of future income tax liabilities of \$338,000, whereas goodwill decreased by \$631,000.

Additionally, certain unrecorded future income tax assets acquired from past acquisitions were recognized during the year ended September 30, 2009, resulting in a corresponding decrease in goodwill of \$19,708,000.

d) Consideration of purchase price

During fiscal 2009, the Company paid a balance of purchase price of \$997,000 relating to a business acquisition.

Note 20 Discontinued operations

In fiscal 2008, the Company classified its Canadian claims adjusting and risk management services and actuarial services businesses as discontinued operations. The Canadian claims adjusting and risk management services business was divested in July 2008 and the actuarial services business was divested in February 2009 (Note 19b of 2009 Transactions).

The following table presents summarized financial information related to discontinued operations:

	2011	2010	2009
	\$	\$	\$
Revenue	-	-	2,511
Operating expenses ¹	-	-	1,046
Amortization	-	-	14
Earnings before income taxes	-	-	1,451
Income tax expense ²	-	-	143
Earnings from discontinued operations	-	-	1,308

¹ For the year ended September 30, 2009, operating expenses from discontinued operations include a gain on disposition of \$1,494,000.

² Income tax expense does not bear a normal relation to earnings before income taxes since the sale includes goodwill of \$1,499,000 for the year ended September 30, 2009, which has no tax basis.

The related cash flow information of discontinued operations is as follows:

	2011	2010	2009
	\$	\$	\$
Cash provided by operating activities	-	-	164
Cash used in investing activities	-	-	(3)
Total cash provided by discontinued operations	-	-	161

Note 21 Joint Venture: supplementary information

	\$	\$	\$
Interest paid	17,807	13,254	16,558
Income taxes paid	135,433	104,724	63,125

Note 23 Segmented information

In prior years, management regularly reviewed the Company's operating results based on a geographic delivery view, in addition to Corporate services. As a result of changes to the management reporting structure on October 1, 2010, the Company is now managed through four operating segments.

The GIS segment incorporates all services provided to clients for their technology infrastructure management. This segment incorporates results from these services world-wide.

The other segments incorporate all other services provided to clients based on a geographical delivery model: Canada, U.S. & India and Europe & Asia Pacific. In addition to system integration and consulting, services may include the outsourcing of projects and applications, application maintenance and support, as well as BPS.

The following presents information on the Company's operations based on its management structure. The Company has retrospectively revised the segmented information for earlier periods to conform to the new segmented information structure.

	2011				
	GIS	Canada	U.S. & India	Europe & Asia Pacific	Total
	\$	\$	\$	\$	\$
Segment revenue	824,847	1,858,686	2,079,098	269,402	5,032,033

MAJOR CLIENT INFORMATION

Contracts with the U.S. federal government and its various agencies accounted for \$1,233,784,000 of revenues included within the U.S. & India segment for the year ended September 30, 2011 (\$510,786,000 and \$394,436,000 for the years ending September 30, 2010 and 2009, respectively).

Note 24 Related party transactions

In the normal course of business, the Company is party to contracts with Innovapost, a joint venture, pursuant to which the Company is its preferred IT supplier. The Company exercises joint control over Innovapost's operating, financing and investing activities through its 49% ownership interest.

Transactions and resulting balances, which were measured at commercial rates (exchange amount), are presented below.

Revenue was \$80,075,000, \$81,760,000 and \$108,139,000 for the years ended September 30, 2011, 2010 and 2009, respectively.

	2011	2010
	\$	\$
Accounts receivable	4,570	681
Work in progress	1,158	1,076
Contract costs	3,713	6,210
Deferred revenue	2,985	1,012

Note 25 Employee future benefits

Generally, the Company does not offer pension plan or post-retirement benefits to its employees with the exception of the following:

- The Company has defined contribution pension plans mainly covering certain European employees. For the years ended September 30, 2011, 2010 and 2009, the plan expense was \$4,154,000, \$5,343,000 and \$5,053,000, respectively.
- The Company maintains a 401(k) defined contribution plan covering substantially all U.S. employees. The Company matches employees' contributions to a maximum of US\$2,500 per year. For the years ended September 30, 2011, 2010 and 2009, the amounts of the Company's contributions were \$10,469,000, \$8,212,000 and \$7,557,000, respectively.
- The Company maintains two non-qualified deferred compensation plans covering some of its U.S. management. One of these plans is an unfunded plan and the non-qualified deferred compensation liability totaled \$1,775,000 as at September 30, 2011 (\$2,376,000 at September 30, 2010). The other plan is a funded plan for which a trust was established so that the plan assets could be segregated; however, the assets are subject to the Company's general creditors in the case of bankruptcy. The assets, included in other long-term assets, composed of investments, vary with employees' contributions and changes in the value of the investments. The change in liability associated with the plan is equal to the change of the assets. The assets in the trust and the associated liabilities totalled \$16,452,000 as at September 30, 2011 (\$16,318,000 as at September 30, 2010).
- The Company maintains a post-employment benefits plan to cover certain former retired employees associated with the divested Canadian claims adjusting and risk management services business. The post-employment benefits liability totalled \$6,966,000 as at September 30, 2011 (\$7,008,000 at September 30, 2010). The Company measures its benefits liability as at September 30 of each year. An actuarial valuation was performed at September 30, 2011, and the next actuarial valuation will be as at September 30, 2014.
- The Company's joint venture maintains a defined benefit pension plan and a supplementary retirement arrangement plan to cover its active employees. The post-employment benefit assets totalled \$2,781,000 as at September 30, 2011, (\$1,044,000 as at September 30, 2010). The assets for both plans are based on the most recent actuarial valuations as at September 30. Actuarial valuations were performed as at December 31, 2010 and January 1, 2011, respectively, and the next actuarial valuations will be as at December 31, 2013 and January 1, 2013, respectively.

Note 26 Commitments, contingencies and guarantees

A) COMMITMENTS

At September 30, 2011, the Company is committed under the terms of operating leases with various expiration dates up to 2027, primarily for the rental of premises and computer equipment used in outsourcing contracts, in the aggregate amount of approximately \$815,771,000. Minimum lease payments due in the next five years and thereafter are as follows:

	\$
2012	129,387
2013	114,934
2014	96,946
2015	90,434
2016	76,606
Thereafter	307,464

The Company entered into long-term service and other agreements representing a total commitment of \$98,391,000. Minimum payments under these agreements due in each of the next five years are as follows:

	\$
2012	48,547
2013	34,805
2014	9,839
2015	4,420
2016	780

B) CONTINGENCIES

From time to time, the Company is involved in legal proceedings, audits, claims and litigation arising in the ordinary course of its business. Certain of these matters seek damages in significant amounts. Although the outcome of such matters is not predictable with assurance, the Company has no reason to believe that the disposition of any such current matter could reasonably be expected to have a materially adverse impact on the Company's financial position, results of operations or the ability to carry on any of its business activities.

In addition, the Company is engaged to provide services under contracts with the U.S. Government. The contracts are subject to extensive legal and regulatory requirements and, from time to time, agencies of the U.S. Government investigate whether the Company's operations are being conducted in accordance with these requirements. Generally, the Government has the right to change the scope of, or terminate, these projects at its convenience. The termination or reduction in the scope, of a major government project could have a materially adverse effect on the results of operations and financial condition of the Company.

C) GUARANTEES

Sale of assets and business divestitures

In connection with the sale of assets and business divestitures, the Company may be required to pay counterparties for costs and losses incurred as the result of breaches in representations and warranties, intellectual property right infringement and litigation against counterparties. While some of the agreements specify a maximum potential exposure of approximately \$3,733,000 in total, others do not specify a maximum amount or limited period. It is not possible to reasonably estimate the maximum amount that may have to be paid under such guarantees. The amounts are dependent upon the outcome of future contingent events, the nature and likelihood of which cannot be determined at this time. No amount has been accrued in the consolidated balance sheets relating to this type of indemnification as at September 30, 2011. The Company does not expect to incur any potential payment in connection with these guarantees that could have a materially adverse effect on its consolidated financial statements.

Note 26 Commitments, contingencies and guarantees (continued)

Other transactions

In the normal course of business, the Company may provide certain clients, principally governmental entities, with bid and performance bonds. In general, the Company would only be liable for the amount of the bid bonds if the Company refuses to perform the project once the bid is awarded. The Company would also be liable for the performance bonds in the event of default in the performance of its obligations. As at September 30, 2011, the Company provided for a total of \$43,230,000 of these bonds. To the best of its knowledge, the Company is in compliance with its performance obligations under all service contracts for which there is a performance or bid bond, and the ultimate liability, if any, incurred in connection with these guarantees would not have a materially adverse effect on the Company's consolidated results of operations or financial condition.

In addition, the Company provides a guarantee of \$5,900,000 of the residual value of a leased property accounted for as an operating lease at the expiration of the lease term.

Note 27 Financial instruments

FAIR VALUE

At September 30, 2011 and 2010, the estimated fair values of trade accounts receivable, work in progress, cash included in funds held for clients, accounts payable and accrued liabilities, accrued compensation, long-term debt obligation and clients' funds obligations approximate their respective carrying values.

The fair values of Senior U.S. unsecured notes and the unsecured committed revolving term facility, estimated by discounting expected cash flows at rates currently offered to the Company for debts of the same remaining maturities and conditions, are \$22,236,000 and \$855,307,000 as at September 30, 2011, respectively (\$112,937,000 and \$941,396,000 as at September 30, 2010, respectively), as compared to their carrying value of \$20,647,000 and \$859,277,000, respectively (as compared to \$109,899,000 and \$964,223,000 as at September 30, 2010, respectively) (Note 11).

The following table summarizes the fair value of outstanding hedging instruments:

		2011	2010
	Recorded as	\$	\$
Hedge on net investments in self-sustaining foreign subsidiaries			
US\$815,000 debt designated as the hedging instrument to the Company's net investment in U.S. subsidiaries (US\$920,000 as at September 30, 2010)	Long term debt	846,703	947,416
€9,000 debt designated as the hedging instrument to the Company's net investment in European subsidiaries (€12,000 as at September 30, 2010)	Long term debt	12,574	16,807
Cash flow hedges on future revenue			
US\$76,740 foreign currency forward contracts to hedge the variability in the expected foreign currency exchange rate between the U.S. dollar and the Canadian dollar (US\$130,380 as at September 30, 2010)	Other current assets	6,497	8,918
	Other long-term assets	5,613	11,433
US\$45,000 foreign currency forward contracts to hedge the variability in the expected foreign currency exchange rate between the U.S. dollar and the Indian rupee (US\$44,820 as at September 30, 2010)	Other current assets	156	2,378
	Other long-term assets	1	1,121
	Other long-term liabilities	536	-
\$62,220 foreign currency forward contracts to hedge the variability in the expected foreign currency exchange rate between the Canadian dollar and the Indian rupee (\$89,040 as at September 30, 2010)	Accrued liabilities	2,560	1,570
	Other long-term liabilities	2,554	3,396
Cash flow hedges on Senior U.S. unsecured notes			
US\$20,000 foreign currency forward contracts (US\$107,000 as at September 30, 2010)	Other current asset	-	1,277
	Other long-term assets	565	763

The Company expects that approximately \$4,093,000 of the accumulated net unrealized gains on all derivative financial instruments designated as cash flow hedges at September 30, 2011 will be reclassified in net income in the next 12 months.

During fiscal 2011, the Company's hedging relationships were effective.

MARKET RISK (INTEREST RATE RISK AND CURRENCY RISK)

Market risk incorporates a range of risks. Movements in risk factors, such as interest rate risk and currency risk, affect the fair values of financial assets and liabilities.

Interest rate risk

The Company is exposed to interest rate risk on a portion of its long-term debt (Note 11) and does not currently hold any financial instruments that mitigate this risk. The Company analyzes its interest rate risk exposure on an ongoing basis using various scenarios to simulate refinancing or the renewal of existing positions. Based on these scenarios, a change in the interest rate of 1% would not have had a significant impact on net earnings and comprehensive income.

Currency risk

The Company operates internationally and is exposed to risk from changes in foreign currency rates. The Company mitigates this risk principally through foreign debt and forward contracts. The Company enters into foreign exchange forward contracts to hedge forecasted cash flows or contractual cash flows in currencies other than the functional currency of its subsidiaries (Note 2). The Company also hedges a portion of the translation of self-sustaining operations' net assets into Canadian dollar with foreign currency denominated borrowings (Note 2). Hedging relationships are designated and documented at inception and quarterly effectiveness assessments are performed during the year.

Note 27 Financial instruments (continued)

Currency risk (continued)

The Company is mainly exposed to fluctuations in the U.S. dollar and the euro. The following table details the Company's sensitivity to a 10% strengthening of the U.S. dollar and the euro foreign currency rates on net earnings and comprehensive income against the Canadian dollar. The sensitivity analysis presents the impact of foreign currency denominated financial instruments and adjusts their translation at period end for a 10% strengthening in foreign currency rates.

	2011		2010	
	U.S. dollar impact	Euro impact	U.S. dollar impact	Euro impact
Increase in net earnings	565	191	381	318
(Decrease) increase in other comprehensive income	(62,887)	2,383	(91,165)	1,690

LIQUIDITY RISK

Liquidity risk is the risk that the Company is not able to meet its financial obligations as they fall due or can do so only at excessive cost. The Company's activities are financed through a combination of the cash flows from operations, borrowing under existing credit facilities, the issuance of debt and the issuance of equity. One of management's primary goals is to maintain an optimal level of liquidity through the active management of the assets and liabilities as well as the cash flows.

The following table summarizes the carrying amount and the contractual maturities of both the interest and principal portion of significant financial liabilities. All amounts contractually denominated in foreign currency are presented in Canadian dollar equivalent amounts using the period-end spot rate.

As at September 30, 2011	Carrying amount	Contractual cash flows	Less than one year	Between one and two years	Between two and five years	Beyond five years
	\$	\$	\$	\$	\$	\$
Non-derivative financial liabilities						
Bank overdraft	75,538	75,538	75,538	-	-	-
Accounts payable and accrued liabilities	321,745	321,745	321,745	-	-	-
Accrued compensation	189,969	189,969	189,969	-	-	-
Senior U.S. unsecured notes	20,647	23,895	1,247	1,247	21,401	-
Unsecured committed revolving term facility	859,277	866,560	866,560	-	-	-
Obligations repayable in blended monthly instalments	58,575	62,987	15,553	15,898	30,242	1,294
Clients' funds obligations	244,660	244,660	244,660	-	-	-
Derivative financial liabilities						
Cash flow hedge on future revenue						
Outflow	5,650	6,237	2,675	2,423	1,139	-
(Inflow)	(12,267)	(12,535)	(6,772)	(4,972)	(791)	-
	1,763,794	1,779,056	1,711,175	14,596	51,991	1,294

As at September 30, 2010	Carrying amount	Contractual cash flows	Less than one year	Between one and two years	Between two and five years	Beyond 5 years
	\$	\$	\$	\$	\$	\$
Non-derivative financial liabilities						
Accounts payable and accrued liabilities	304,376	304,376	304,376	-	-	-
Accrued compensation	191,486	191,486	191,486	-	-	-
Senior U.S. unsecured notes	109,899	116,799	93,113	1,236	22,450	-
Unsecured committed revolving term facility	964,223	977,861	9,092	968,769	-	-
Obligations repayable in blended monthly instalments	22,049	23,961	6,292	5,052	11,211	1,406
Clients' funds obligations	248,695	248,695	248,695	-	-	-
Derivative financial liabilities						
Cash flow hedge on future revenue						
Outflow	4,966	5,562	1,637	1,740	2,185	-
(Inflow)	(23,850)	(24,658)	(11,447)	(7,323)	(5,888)	-
	1,821,844	1,844,082	843,244	969,474	29,958	1,406

As at September 30, 2011, the Company holds cash and cash equivalents and short-term and long-term investments of \$183,236,000 (\$141,020,000 as at September 30, 2010). The Company also has available \$622,406,000 in unsecured revolving credit facilities (Note 11) (\$519,931,000 as at September 30, 2010), as well as \$493,478,000 in private placement financing (Note 11). The funds held for clients of \$247,622,000 (\$248,695,000 as at September 30, 2010) fully cover the clients' funds obligations. Given the Company's available liquid resources as compared to the timing of the payments of liabilities, management assesses the Company's liquidity risk to be low.

Note 27 Financial instruments (continued)

CREDIT RISK

The Company takes on exposure to credit risk, which is the risk that a client will be unable to pay amounts in full when due. Financial instruments that potentially subject the Company to concentrations of credit risk consist of cash and cash equivalents, short-term investments, work in progress, accounts receivable and long-term investments.

Cash equivalents consist mainly of highly liquid investments, such as money market funds and term deposits, as well as bankers' acceptances and bearer deposit notes issued by major banks (Note 3). None of the cash equivalents are in asset backed commercial paper products. The Company has deposited the cash equivalents with reputable financial institutions, from which management believes the risk of loss to be remote.

The Company is exposed to credit risk in connection with short-term and long-term investments through the possible inability of borrowers to meet the terms of their bonds. The Company mitigates this risk by investing primarily in high credit quality corporate and government bonds with a credit rating of A or higher.

The Company has accounts receivable and work in progress derived from clients engaged in various industries including governmental agencies, finance, telecommunications, manufacturing and utilities that are not concentrated in any specific geographic area. These specific industries may be affected by economic factors that may impact accounts receivable. However, management does not believe that the Company is subject to any significant credit risk in view of the Company's large and diversified client base.

The following table sets forth details of the age of accounts receivable that are past due:

	2011	2010
	\$	\$
Not past due	309,307	301,106
Past due 1-30 days	43,360	28,864
Past due 31-60 days	26,116	5,738
Past due 61-90 days	7,504	5,018
Past due more than 90 days	14,378	20,147
	400,665	360,873
Allowance for doubtful accounts	(5,197)	(11,524)
	395,468	349,349

The carrying amount of accounts receivable is reduced by an allowance account and the amount of the loss is recognized in the consolidated statement of earnings within costs of services, selling and administrative. When a receivable balance is considered uncollectible, it is written off against the allowance for doubtful accounts. Subsequent recoveries of amounts previously written off are credited against costs of services, selling and administrative in the consolidated statement of earnings. Overall, management does not believe that any single industry or geographic region represents a significant credit risk to the Company.

Note 28 Capital risk management

The Company is exposed to risks of varying degrees of significance which could affect its ability to achieve its strategic objectives for growth. The main objectives of the Company's risk management process are to ensure that risks are properly identified and that the capital base is adequate in relation to these risks.

The Company manages its capital to ensure that there are adequate capital resources while maximizing the return to shareholders through the optimization of the debt and equity balance. At September 30, 2011, total managed capital was \$3,459,735,000 (\$3,447,527,000 at September 30, 2010). Managed capital consists of long-term debt, including the current portion (Note 11), cash and cash equivalents net of bank overdraft (Note 3), short-term investments, long-term investments and shareholders' equity. The basis for the Company's capital structure is dependent on the Company's expected business growth and changes in the business environment. When capital needs have been specified, the Company's management proposes capital transactions for the approval of the Company's Audit and Risk Management Committee and Board of Directors. The capital risk policy remains unchanged from prior periods.

The Company monitors its capital by reviewing various financial metrics, including the following:

- Debt/Capitalization
- Net Debt/Capitalization
- Debt/EBITDA

Debt represents long-term debt, including the current portion. Net debt, capitalization and EBITDA are non-GAAP measures. Net debt represents debt (including the impact of the fair value of forward contracts) less cash and cash equivalents net of bank overdraft, short-term investments and long-term investments. Capitalization is shareholders' equity plus debt. EBITDA is calculated as earnings from continuing operations before income taxes, interest expense on long-term debt and depreciation and amortization. The Company believes that the results of the current internal ratios are consistent with its capital management objectives.

The Company is subject to external covenants on its credit facilities and its Senior U.S. unsecured notes. On the credit facilities and the committed US\$475,000,000 Senior U.S. unsecured notes, the ratios are as follows:

- A leverage ratio, which is the ratio of total debt to EBITDA for the four most recent quarters.
- An interest and rent coverage ratio, which is the ratio of the EBITDAR for the four most recent quarters to the total interest expense and the operating rentals in the same periods. EBITDAR, a non-GAAP measure, is calculated as EBITDA before rent expense.
- A minimum net worth requirement, whereby shareholders' equity, excluding foreign exchange translation adjustments included in accumulated other comprehensive loss, cannot be less than a specified threshold.

The ratios for the credit facilities are calculated on a consolidated basis, excluding Innovapost, which is a joint venture.

On the US\$20,000,000 Senior U.S. unsecured notes, the ratios are as follows:

- A leverage ratio, which is the ratio of total debt adjusted for operating rent to EBITDAR for the four most recent quarters.
- A fixed charges coverage ratio, which is the ratio of the EBITDAR to the sum of interest expense plus operating rentals for the period for the four most recent quarters.
- A minimum net worth requirement, whereby shareholders' equity, excluding foreign exchange translation adjustments included in accumulated other comprehensive loss, cannot be less than a specified threshold.

The ratios for the Senior U.S. unsecured notes are calculated based on specific subsidiaries of the Company that represent a significant portion of the Company's consolidated operations.

Note 28 Capital risk management (continued)

The Company is in compliance with these covenants and monitors them on an ongoing basis. The ratios are also reviewed quarterly by the Company's Audit and Risk Management Committee. The Company is not subject to any other externally imposed capital requirements.

Note 29 Reconciliation of results reported in accordance with Canadian GAAP to U.S. GAAP

The material differences between Canadian GAAP and U.S. GAAP affecting the Company's consolidated financial statements are detailed as follows:

	2011	2010	2009
	\$	\$	\$
Reconciliation of net earnings:			
Net earnings – Canadian GAAP	435,065	362,766	317,205
Adjustments for:			
Stock-based compensation (i)	(1,224)	(213)	(3,759)
Warrants (ii)	-	863	1,404
Reversal of income tax provision (iii)	-	-	(517)
Other (iv)	1,284	(140)	594
Net earnings – U.S. GAAP	435,125	363,276	314,927
Attributable to:			
Shareholders of CGI Group Inc.	434,869	362,896	314,188
Non-controlling interest	256	380	739
Basic earnings per share attributable to shareholders of CGI Group Inc. – U.S. GAAP	1.64	1.27	1.02
Diluted earnings per share attributable to shareholders of CGI Group Inc. – U.S. GAAP	1.58	1.24	1.01
Net earnings – U.S. GAAP	435,125	363,276	314,927
Other comprehensive income (loss)	176	(35,756)	35,434
Comprehensive income – U.S. GAAP	435,301	327,520	350,361
Attributable to:			
Shareholders of CGI Group Inc.	435,045	327,140	349,622
Non-controlling interest	256	380	739
Reconciliation of shareholders' equity:			
Equity attributable to shareholders of CGI Group Inc. – Canadian GAAP	2,346,356	2,152,631	2,275,254
Adjustments for:			
Stock-based compensation (ix)	58,411	58,411	58,411
Warrants (ii)	(7,125)	(7,125)	(7,988)
Reversal of income tax provision (iii)	(7,969)	(7,969)	(7,969)
Unearned compensation (v)	(3,694)	(3,694)	(3,694)
Integration costs (vi)	(6,606)	(6,606)	(6,606)
Goodwill (vii)	28,078	28,078	28,078
Income taxes and adjustment for change in accounting policy (viii)	9,715	9,715	9,715
Other (iv)	(2,121)	(3,405)	(3,265)
Equity attributable to shareholders of CGI Group Inc. – U.S. GAAP	2,415,045	2,220,036	2,341,936
Equity attributable to non-controlling interest – Canadian GAAP and U.S. GAAP	-	6,452	6,342

(i) Stock-based compensation

The Company issued stock options and PSUs with a graded vesting period more than one year and performance criteria. Under Canadian GAAP, the compensation cost has been accounted for on a straight-line basis because the awards of graded vesting options and PSUs have a similar expected life. Under U.S. GAAP, the graded vesting method must be used. The adjustment represents the compensation cost difference between using the straight-line and graded vesting method. This adjustment does not have an impact on shareholders' equity.

(ii) Warrants

Under Canadian GAAP, the fair value of warrants issued in connection with long-term outsourcing contracts is recorded as contract costs and amortized on a straight-line basis over the initial contract term. Under U.S. GAAP, the fair value of equity instruments issued was subtracted from the initial proceeds received in determining revenue. The 2010, and 2009 adjustments reflect the reversal of contract cost amortization, net of income taxes, which is included as a reduction to Canadian GAAP consolidated net earnings.

(iii) Reversal of income tax provision

During the fiscal year 2009, the Company reversed one-time income tax provisions pertaining to the determination of prior year tax liabilities after final agreement with tax authorities and the expirations of statutes of limitations relating to business acquisitions. The reversal of the provisions was included as an increase to Canadian GAAP consolidated earnings. Under U.S. GAAP, the adjustment was applied to the goodwill attributable to the acquisition prior to the adoption of ASC Topic 805, "Business Combination" on October 1, 2009.

(iv) Capitalization of intangible assets

Effective October 1, 2008, the Company adopted Section 3064, "Goodwill and Intangible Assets". As a result of the standard, there is new guidance relating to eligible capitalizable costs in the development of intangibles. Under U.S. GAAP, there were no changes to capitalization standards. This adjustment is one of the items included in "Other" and represents the net effect of costs that were expensed or capitalized under Canadian GAAP for which the accounting treatment is different under U.S. GAAP. For the years ended September 30, 2011, 2010 and 2009, the adjustment to U.S. GAAP net earnings is a decrease of \$1,060,000, \$959,000 and \$198,000, respectively. As at September 30, 2011, 2010 and 2009, the adjustment to U.S. GAAP shareholders' equity is an increase of \$126,000, \$1,186,000 and \$2,145,000, respectively.

(v) Unearned compensation

Under Canadian GAAP, prior to July 1, 2001, unvested stock options granted as a result of a business combination were not recorded. The adjustment reflects the intrinsic value of unvested stock options (see (vii) below) that would have been recorded as a separate component of shareholders' equity for U.S. GAAP purposes. This unearned compensation was amortized over approximately three years, being the estimated remaining future vesting service period.

(vi) Integration costs

Under Canadian GAAP, prior to January 1, 2001, certain restructuring costs relating to the purchaser may be recognized in the purchase price allocation when accounting for business combinations, subject to certain conditions. Under U.S. GAAP, only costs relating directly to the acquired business may be considered in the purchase price allocation. This adjustment represents the charge to consolidated net earnings, net of goodwill amortization in 2001, recorded for Canadian GAAP purposes and net of income taxes.

Note 29 Reconciliation of results reported in accordance with Canadian GAAP to U.S. GAAP (continued)

(vii) Goodwill

The goodwill adjustment to shareholders' equity results principally from the difference in the value assigned to stock options issued to IMRglobal Corp. employees. Under Canadian GAAP, the fair value of the outstanding vested stock options is recorded as part of the purchase price allocation whereas under U.S. GAAP, the fair value of both vested and unvested outstanding stock options granted as a result of the business acquisition is recorded. See (v) above for a further discussion relating to this item.

(viii) Income taxes and adjustment for change in accounting policy

On October 1, 1999, the Company adopted the recommendations of CICA Handbook Section 3465, "Income taxes". The recommendations of Section 3465 are similar to the provisions of ASC Topic 740, "Income Taxes", issued by the FASB. Upon the implementation of Section 3465, the Company recorded an adjustment to reflect the difference between the assigned value and the tax basis of assets acquired in a business combination, which resulted in future income tax liabilities. The Company recorded this amount through a reduction of retained earnings as part of the cumulative adjustment. Under U.S. GAAP, this amount would have been reflected as additional goodwill.

(ix) Stock-based compensation

Under Canadian GAAP, stock-based compensation cost was accounted for using the fair value based method beginning October 1, 2004. Under U.S. GAAP, ASC Topic 718, "Compensation – Stock Compensation", did not require adoption of this standard until fiscal years beginning on or after June 15, 2005. The 2005 adjustments represent the charge to consolidated net earnings recorded for Canadian GAAP purposes as no such expense was recorded or required under U.S. GAAP. Beginning October 1, 2005, there is no difference between Canadian GAAP and U.S. GAAP in connection to stock-based compensation cost.

(x) Changes in accounting policies

Revenue recognition

In October 2009, the FASB issued ASU 2009-13, "Multiple-Deliverable Revenue Arrangements", which became effective for the Company via prospective application to new arrangements entered into or materially modified on or after October 1, 2010. This standard is equivalent to the corresponding provisions of CICA EIC-175, "Revenue Arrangements with Multiple Deliverables" (Note 2a).

Concurrently to issuing ASU 2009-13, the FASB also issued ASU 2009-14, "Certain Revenue Arrangements that Include Software Elements", which became effective for the Company via prospective application at the same date. There is no equivalent under Canadian GAAP, therefore, the Company follows the U.S. guidance (Note 2a).

The adoption of these updates did not have any material impact on the Company's consolidated financial statements.

Business combinations

In December 2007, FASB issued ASC Topic 805, "Business Combinations," which became effective for the Company as of October 1, 2009 via prospective application to business combinations. This standard is similar to the corresponding provisions of CICA Section 1582, "Business Combinations" (Note 2b). Consequently, there is no GAAP difference since the beginning of fiscal year 2010.

In December 2007, FASB issued ASC Topic 810, "Consolidation", which became effective for the Company as of October 1, 2009 via retrospective application. This standard is similar to the corresponding provisions of CICA Section 1601 "Consolidated Financial Statements" and Section 1602, "Non-Controlling Interests" (Note 2b).

High:	24.30	25.63
Low:	15.27	14.88

The certifications by CGI's Chief Executive Officer and Chief Financial Officer concerning the quality of the Company's public disclosure pursuant to Canadian regulatory requirements are filed in Canada on SEDAR (www.sedar.com). Similar certifications pursuant to Rule 13a-14 of the U.S. Securities Exchange Act of 1934 and Section 302 of the Sarbanes-Oxley Act of 2002 are exhibits to our Form 40-F filed on EDGAR (www.sev.gov). The Company has also filed with the New York Stock Exchange the certification required by Section 303A.12 of the exchange's Listed Company Manual.

CGI's corporate governance practices do not differ in any significant way from those required of domestic companies under New York Stock Exchange listing standards and they are set out in the CGI Management Proxy Circular, which is filed with Canadian and U.S. securities authorities and is therefore available on SEDAR (www.sedar.com) and EDGAR (www.sec.gov), respectively, as well as on CGI's Web site (www.cgi.com).
