

# CGI and Adaptik team up for the new Insurance Fusion360 offering

## a powerful P&C solution

### THE CORE OF THE INSURANCE FUSION360 SUITE

CGI and Adaptik have teamed up as part of the Insurance Fusion360 offering to provide a highly scalable and functionally-rich policy administration, underwriting and rating solution. The solution is designed to empower personal, commercial, worker's compensation and specialty lines carriers to quickly adapt and respond to market changes. The Insurance Fusion360 solution redefines the term 'configurable' in the insurance industry.

The CGI and Adaptik solution is comprised of two powerful "best in class" rules based solutions: PolicyWriter, Adaptik's adaptive policy administration suite; and Ratabase®, CGI's robust industry-leading rating engine. With the advanced patented technology of PolicyWriter, in conjunction with the strength and scalability of Ratabase, carriers will have a powerful solution to address the complex needs of today's market as well as those of the future.

These adaptable and fully integrated applications were architected with a focus on the needs and objectives of carriers who are looking for deep functionality and a predictable implementation approach. Insurance Fusion360 allows carriers to significantly increase speed to market, reduce total cost of ownership, mitigate risk, and provide scalability and extensibility—now and in the future.

### Redefining configurable

Configurable means you have the flexibility and extensibility necessary to adapt and respond quickly to the challenges of a policy administration environment. Authorized users can make changes to the system's contents, behavior and appearance with user-friendly screens and dialogues—all without programming.

### BENEFITS

- Lower total cost of ownership by reducing product development & IT maintenance costs.
- Reduce time to production with pre-built integration between PolicyWriter and Ratabase delivered out of the box with support for ISO rules, rates and forms.
- Significantly enhance productivity with Automated Straight-Through Processing.
- Trim down support and maintenance costs by supporting all lines of business on a single system.
- PolicyWriter and Ratabase are offered as hosted/managed service offering as well as supported from client-site environments. Each option allows rapid start up to meet immediate business needs with options to transition to other delivery model as your business grows.
- Achieve high performance and scalability to support high user activity and high volume carriers.

With the CGI and Adaptik configurable solution, carriers can configure over 90% of the system functionality without reliance on the vendors to provide key functions and features necessary to run the business.

- Have users, rather than programmers, make changes to the system's look and behavior
- Easily introduce and maintain different insurance products with unique structures
- Dynamically decide to collect different information based on context
- Easily manage large numbers of rules that vary by multiple factors
- Configure a repackaged product only once and add variations when needed
- Keep multiple rule versions over time and use each when appropriate
- Automatically adjust a policy to conform to product rules
- Process all types of out-of-sequence transactions without any limitations

With CGI's introduction of the Insurance Fusion360 offering, customers can rest easy knowing that the best in class software is backed by CGI's proven delivery track record and commitment to quality and client success. Beyond the software, CGI provides a set of principles and methods for continuously improving the service that we give our clients. All managers and members play a key role in delivering quality, because the distinctive way we work with our clients emphasizes partnership and teamwork. To that end, CGI's consistent approach to quality and satisfaction delivers value time and time again.

#### **ABOUT CGI**

At CGI, we're in the business of satisfying clients by helping them succeed. Since 1976, we've operated upon the principles of sharing in clients' challenges and delivering quality services to address them. A leading IT and BPS provider, CGI has approximately 31,000 professionals operating in 125 offices worldwide.

#### **ABOUT ADAPTİK POLICYWRITER**

PolicyWriter by Adaptik is an adaptive policy administration suite purpose built to handle the unique business needs of P&C insurance carriers. PolicyWriter dramatically increases speed-to-market for new and existing products and fundamentally improves the economics of policy administration by reducing costs and driving agility into your operations.
