ARCHITECTURE

- Client/server application
- Browser based user interface (EBS supports the following browsers: IE 5.0 and up, Netscape 6.0 and up, Mozilla 1.0 and up)

FEATURES

- EBS is a feature-rich, modular, customizable banking and lending application designed to meet the needs of small to medium-sized financial institutions.
- The loan processing and administration module provides all the functionality required to create and administer a full suite of lending products, including adjustable rate mortgages, home equity line of credit, consumer and investment loans, pre-approved and deferred payment loans.
- The deposit module supports a full range of deposit products and the teller functionality required to administer them, including GIC's, RSP's, STD's, high yield accounts and annuities.
- A comprehensive suite of electronic file interfaces for loan and certificate applications, payments, returned items, representations, and remittances.
- Comprehensive and highly customizable mortgage investor functionality, including the ability to customize investor remittances for shared mortgages at different rates and payment frequencies.
- A full range of management, regulatory and government agency reporting. Custom correspondence tailored to meet individual user requirements.
- Provides the functionality to manage an active dealer/agent network.
