IT Governance Assessment

BENEFITS

Public sector

- Streamlines agency-based, distributed IT functions that are increasingly expensive to manage
- Provides for movement toward multi-sourcing procurement strategies
- Eliminates costs to help alleviate pressures of record deficits

Private sector

- Aligns IT value and cost with the key business priorities necessary for survival
- Eliminates the unnecessary costs that have resulted from increased systems complexity and diversity from M&A and related activities

TRUST IN THE RESULTS

"Firms with superior IT governance have at least 20% higher profits...than firms with poor governance given the same strategic objectives."

—Louis Boyle, VP Gartner EXP

LOWER COSTS AND FOCUS ON HIGH-VALUE INITIATIVES

At CGI, we understand that proper IT governance is critical to the success of any IT initiative. After all, achieving desired outcomes is not just about technology, it's about good management. From our own experience – and as many studies demonstrate – when proper governance is in place, the right things get done, the right way...and the anticipated value is achieved.

Do these challenges sound familiar?

- Lack of standards and defined processes for decision making
- Misalignment of IT strategy with business priorities
- Lack of transparency regarding cost-to-value delivered
- Ineffective reporting with lots of data and little information
- Complexity in managing multiple service providers and IT infrastructure and application environments
- IT costs maintained at or below industry peers/competitors

CGI solves the IT governance challenge

A lack of transparency, accountability and standard procedures costs money and delays performance in IT organizations. With CGI's IT governance framework, clients have the strategic management process and rigorous management oversight that addresses their most urgent needs:

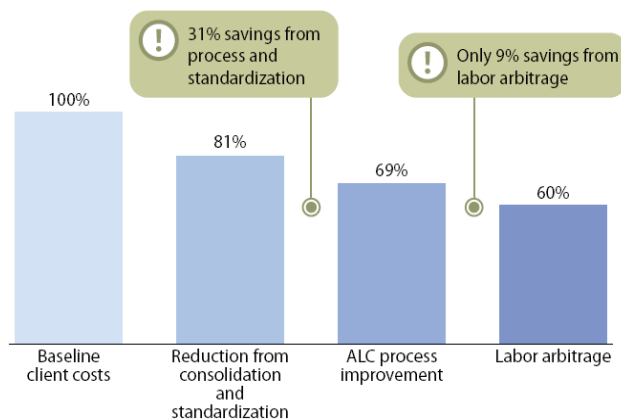

- Increase the value of IT to the business
- Comply with pressure to do more with less
- Reduce IT costs

During the IT governance assessment, CGI identifies a *targeted area* with a *high potential for savings* for your IT organization.

The result: clients **decrease wasteful spending** and **increase focus on value-added projects**.

Why CGI?

- 30+ years of experience and long-term managed services partnerships resulting in key IT governance levers that result in cost and value creation
- Integrated framework of methodologies and tools that effectively manage IT service delivery across multiple projects and geographies
- Proven client results for more consistent service, higher service levels, lower operating costs, increased flexibility and reduced risk

(Source: Forrester, From FTEs to Results, April 18, 2008)

"There has been more value destroyed through poor management of IT than can ever be saved through labor arbitrage."

—Michael E. Roach, President and CEO, CGI

How to get started

CGI's methodology assesses key input from the client organization to generate the current state analysis, savings estimates and improvement roadmap.

After an eight-week assessment, CGI delivers an individualized report that provides for cost reductions, measurable improvements in user satisfaction, reduced time for decisions and projects, standardized and consistent processes, and initiatives that transform IT into a business enabler.

Can you afford to wait? Reduce IT costs and increase the value of IT to your business. Contact us.

COMPANY PROFILE

At CGI, we're in the business of satisfying clients. For 30 years, we've operated upon the principles of sharing in our clients' challenges and delivering quality services to solve them. As a leading IT and business process services provider, CGI has approximately 25,000 professionals operating in 100+ offices worldwide, giving us the competitive advantage of close proximity to our clients.

Through these offices, CGI offers local partnerships and a balanced blend of global delivery options—including onshore, nearshore and offshore expertise—to ensure clients receive the combination of value and expertise they require.

CGI defines success by exceeding expectations and helping clients achieve results.
