

# John Pientka

**Vice-President, U.S. Federal Cloud Services**

**Fairfax, VA**

John Pientka currently leads CGI Federal's cloud computing program. John successfully led the company's capture effort on the GSA Infrastructure as a Service (IaaS) BPA which was awarded to CGI in 2010. As part of that capture, he was a key contributor to working with CGI's internal global infrastructure, GSA, and Business Engineering teams to develop a CGI cloud solution that was designed to meet federal requirements.

Prior to joining the Federal business, John was Vice-President of the U.S. Business Engineering Group for CGI, leading efforts to expand the company's U.S. outsourcing practice. There, he led a team of senior professionals who were integral to CGI's success in very large, strategic opportunities.

Throughout his career, John's broad business background has enabled him to create significant value for clients and investors. In addition to successful outsourcing and systems integration solutions, he helped expand into new business areas, revitalize stagnant operations, and turn around struggling operations.

Prior to joining CGI, John served as COO at Viasource Communications Inc., a \$240 million nationwide broadband services firm, with greater than 3,800 staff members. He was instrumental in the company's initial public offering and a significant contributor to its growth. He later founded and served as CEO of GigEpath, an innovative provider of communication solutions to major corporations.

Earlier, John was President of British Telecom's outsourcing arm – Syncordia, Vice-President and General Manager of a division of Motorola, and Senior Vice-President and General Manager of a subsidiary of Tandem Computers.

John holds an MBA from Harvard University; a BS in accounting from the State University of New York in Buffalo, and a CPA.

## About CGI

At CGI, we are in the business of satisfying clients. For 35 years, we have operated upon the principles of sharing in clients' challenges and delivering quality services to address them.

CGI is committed to partnering with U.S. defense, civilian and intelligence agencies to support their mission-essential needs at every stage of program, product and business lifecycle.

A leading IT and business process services provider, CGI operates in 125 offices worldwide, giving us the competitive advantage of close proximity to our clients. Through these offices, we offer local partnerships and a balanced blend of flexible delivery options to ensure clients receive the combination of value and expertise they require.

CGI defines success by exceeding clients' expectations and helping them achieve superior performance.
