

CGI Unify360

Unify your IT Environment

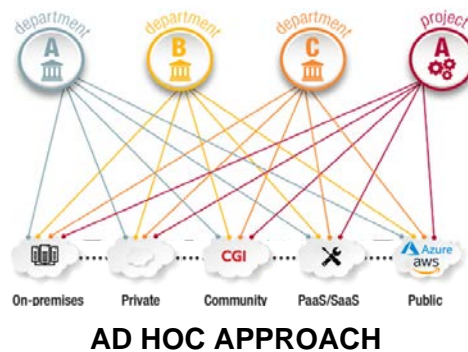

Enterprises adding cloud-based solutions to their traditional IT mix are finding that holistic control of these hybrid environments can be elusive, resulting in higher costs and risk.

CGI Unify360 is designed to help enterprises feel more confident in moving to the cloud, gain new approaches to optimize IT investments, speed time to market and increase competitiveness. CGI Unify360 provides the unified IT platform, consulting services, frameworks and practices needed to understand an organization's entire IT portfolio, create cohesive strategies that align IT to business objectives and—as a result—maximize IT investments.

MANAGING, SECURING AND OPERATING FUTURE STATE PORTFOLIOS

Common Priorities:

- Rationalize and modernize legacy IT systems in multi-cloud environments
- Control rogue acquisition and portfolio sprawl
- Secure data and systems across disparate IT infrastructure
- Enable rapid access to business aligned and relevant IT services

CGI UNIFY360 SOLUTION AND ENTERPRISE BENEFITS

CGI Unify360 delivers solutions for enterprise priorities:

- An Agile approach, tools and expertise to rapidly assess, transform and manage systems in a Hybrid model
- Lowered costs and risk by leveraging the optimal cloud service to meet goals
- Enhanced cybersecurity posture for hosting sensitive data in hybrid IT portfolios
- Innovation and governance to adapt and scale with the rapidly changing market

UNIFY360 FEATURES

- Open ecosystem adaptable to client specific requirements
- Integrated decision-support model
- Standards-based compliance applied across all applications and data
- Solid governance model
- Robust security capabilities, designed to support the highest-security levels, such as sensitive Department of Defense data and Personally Identifiable Information
- Consulting services and frameworks, including application portfolio management
- Partnerships with market-leading CSPs such as Amazon Web Services and Microsoft Azure
- Unified, transparent management of on-premises and cloud-based services
- Global coverage

“The solution supports provisioning, configuration, incidents, reporting, billing and workload management for both traditional IT and cloud-based solutions, while providing 100% visibility into the spend, service availability and security postures of all elements in the hybrid IT universe.”

ROBUST AND INTEGRATED FRAMEWORK DELIVERING RESULTS

Whether initiated by a government mandate or business need, those seeking IT modernization or digital transformation solutions should consider the CGI Unify360 Hybrid IT Transformation and Management Framework. The framework provides an adaptable multi-level approach to addressing hybrid IT requirements along with a powerful toolkit for true end-to-end transformation and management afterwards.

CGI Unify360 Portfolio Manager

Expert guidance with Unify360 Strategy and Transformation Consulting Services—from identifying current assets including “shadow IT,” to assessing cloud readiness and guiding application rationalization, refactoring, workload transitions and balancing, Unify360 offers expert advice and roadmaps to optimize hybrid IT architectures and migrations.

CGI Unify360 Code Analyzer

CGI Unify360 Transformation Engine

Migration of your portfolio leveraging the optimal infrastructure mix through CGI's Hybrid cloud offerings and our Transformation Engine services—giving enterprises the power to choose an ideal infrastructure mix for their unique workload portfolios and complex requirements—fundamental to enabling IT modernization to support transformation into agile customer-centric digital enterprises.

CGI Unify360 Platform

IT Environment Management with the Hybrid IT Management Platform—for brokering, acquiring, operating, securing and governing all elements of a hybrid IT environment. Enables a “single pane of glass” view into spend, service availability, performance, security and compliance postures; aggregated billing and chargeback across cloud and legacy IT assets; and greater asset utilization through automation and standardization.

CGI Unify360 Platform

Reliable service management through our Unified Hybrid IT Managed Services offering. Our global, 24x7 management and integration services include ITSM, service desk, managed security, brokerage and multi-vendor management. A holistic security approach allows organizations to deploy sensitive workloads with confidence, address emerging threats and comply with data privacy and sovereignty regulations.

ABOUT CGI

Founded in 1976, CGI is one of the world's largest IT and business consulting services firms. We help clients meet business and mission needs, including becoming customer-centric digital organizations, through end-to-end IT and business consulting, systems integration and outsourcing services combined with a client proximity model and global center of excellence network.

CGI provides the tooling and consulting expertise to deliver an end-to-end IT modernization solution to help achieve costs savings, enhanced cybersecurity posture plus innovation and governance that adapts to the rapidly changing market.
