

Momentum® at a Glance

Increasingly, federal agencies are seeking a highly-secure and cost-effective software platform to enable administrative functions—a solution which is user-friendly, capable of mitigating error and risk, and flexible enough to support agency tailoring and evolving federal requirements.

This desire is now supported by the President's Management Agenda, which defines IT modernization as the "platform for change." The PMA specifies that modernization initiatives must have a primary goal of delivering better services to the public. The PMA calls on the federal government to share purchases, services and expertise through the Shared Quality Services Cross-Agency Priority goal.

Designed specifically for federal business operations CGI's Momentum® Enterprise Solution helps federal IT leaders fulfill federal mandates, in an agile and cost-effective way.

BUILT SPECIFICALLY FOR FEDERAL NEEDS

CGI's Momentum is a market-leading, full-featured, flexible web-based system built to support the full federal financial, budget, asset and procurement management lifecycles.

Unlike other solutions in the market, Momentum is exclusively developed to support the needs of federal organizations, rather than layering federal functionality on top of commercial sector software. Momentum has no non-government functionality that must be turned off or maintained throughout its life.

In addition to this design and development approach, we also offer our Rapid Momentum Implementation (RMI) methodology for the out-of-the-box application with DOD and Civilian configurations, reducing risk, increasing user acceptance and decreasing implementation and life-cycle costs.

CGI's Momentum is:

- **Adaptable** to help you meet future legislative requirements, regulations and evolving business practices
- **Flexible** to give you a choice of delivery model, such as a shared service and/or a subscription pricing model
- **Reliable** to maintain your process controls and preserve data integrity
- **Accurate** to enable better operational and programmatic decision making
- **Secure** to meet the strictest federal requirements
- **Accountable** to stand the test of rigorous federal operations and audits
- **Agile** to provide quick access to real-time financial results

MOMENTUM—THE IDEAL SOLUTION FOR FEDERAL AGENCIES

Built for the Federal Government:

CGI's Momentum solution is specifically designed around the nuances of federal regulations, unlike many other commercial ERP solutions.

Agency-Driven Innovation: Through the use of agency-run Momentum User Groups, User Forums and sprint demonstrations, CGI tailors Momentum based on input from its users and stakeholders.

Component Functionality for Incremental Implementation: Add modules to rapidly expand capabilities as your business needs evolve.

Shared and Flexible Models: Momentum offers a variety of deployment models including shared service implementation, license and maintenance models and software-as-a-service hosted delivery.

- **Efficient** to enhance accounting control, process control, and collaboration

KEEPING UP IN A DYNAMIC ENVIRONMENT

The federal market experiences unlimited updates to requirements and compliance needs. We understand that these changes need to occur as quickly as possible to stay compliant with federal mandates. To address these concerns, Momentum is easily configured for future requirements with quarterly releases designed for quick deployment, because we know you can't afford service disruptions and data issues.

A TRUSTED PARTNER WITH A PROVEN SYSTEM

More than 190 federal organizations, agencies and federally funded non-profits trust CGI's Momentum to help manage their end-to-end financial, acquisition and budget formulation processes. Our solution is proven across all three branches of government.

Our experience includes:

- 100+ federal financial management customers since 1984
- 100% track record of implementation success
- Patented federal-specific approaches to purchase card reconciliation and payment offsets
- Unqualified audit opinions sustained by customer agencies across three branches of government
- CONUS and OCONUS deployments
- Successful conversion of millions of historical financial transactions from federal agencies' legacy systems and competitor products
- Successful shared service implementations across three branches of government, with proven Authority to Operate (ATO) in multiple public cloud environments

OPTIONS TO SUPPORT YOUR BUSINESS NEEDS

While Momentum supports the requisite federal business processes, it allows you the flexibility to deploy as many or as few as you need. Additionally, our platform enables you to leverage existing and future infrastructure investments. This effectively positions you for future business and system streamlining, and helps drive down the cost of meeting your mission goals.

ABOUT CGI

Founded in 1976, CGI is one of the largest IT and business consulting services firms in the world. Operating in hundreds of locations across the globe, CGI professionals help clients to achieve their goals, including becoming customer-centric digital organizations. We deliver an end-to-end portfolio of capabilities, from high-end IT and business consulting to systems integration, outsourcing services and intellectual property solutions that help accelerate clients' results. CGI works with clients around the world through a unique client proximity model complemented by a global delivery center of excellence network to help clients accelerate results, transform their organizations and drive competitive advantage.
