CGI Ratabase 9

Pricing and product innovation are keys to success for insurance carriers in an increasingly disrupted marketplace. For carriers investing in a core system like Ratabase, it's important to know that the product has a solid future and an active user community.

EXCITING NEW FEATURES

Ratabase is the enterprise rating solution of choice for the insurance industry, with more than 100 active installations. As part of Ratabase 9, CGI made a major investment to add new and exciting features to the product, including 4 out of 5 top features suggested through our Client Innovation Program.

KEY ADDITIONS

In Ratabase 9, we have added a number of new features that make the product even easier to use.

- A user interface "refresh" for Product Builder to adapt it to standards that will be familiar to users of Microsoft Office 2016.

- New formula management features allow users to more easily check formulas in and out, add advanced versioning features and provide enhanced tools for determining how formula steps are related.

- Report creation has been consolidated into a single dialog box, making it even easier to create reports.

- A new Central Field Repository makes it faster and easier to locate a field and reuse or update it across multiple lines of business in your enterprise rating solution.

- A Recycle Bin feature allows users to quickly undo a delete action and restore the formula or table to active use.

- Expanded data integration features allow even easier integration with Oracle databases and Microsoft Excel.

- Integration with Ratabase EMMA, the Environment Management and Maintenance App, is now available to help carriers quickly sync environments and rapidly deploy changes between environments.

- The new Reports App provides a reports designer that allows users to easily produce professional-quality reports.
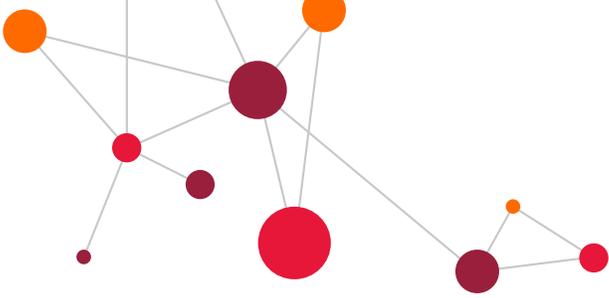

POWERFUL, AWARD-WINNING

Ratabase is the number one solution for rating in insurance worldwide. It helps you to:
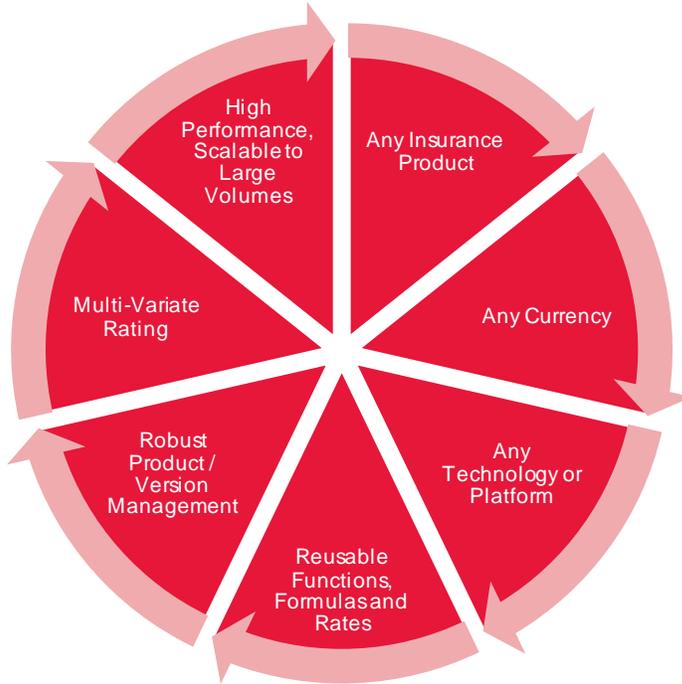

- **Save**: Reduce the effort and cost to maintain rating and rules.
- **Sprint**: Move your business from a walk to a run by speeding time to market and quickly pivot to meet changing conditions.
- **Simplify**: Build once, deploy to any environment (PC, cloud or mainframe).
- **Spark**: Innovate with a rating engine that can handle any pricing scenario, no matter how complex.

RATABASE HAS THE FEATURES YOU NEED TO INNOVATE

High Performance, Scalable to Large Volumes

Any Insurance Product

Any Currency

Any Technology or Platform

Reusable Functions, Formulas and Rates

Robust Product / Version Management

Multi-Variate Rating

JOIN CARRIERS RECEIVING REAL BENEFITS

With Ratabase, carriers receive significant measurable benefits right out of the gate, including growth in their books of business, reduced cost of rating maintenance and faster speed to market. Affordable license models allow all carriers (large or small) to use the "best in the business" tools at a reasonable cost. Some carriers even avoid the high cost of replacing their policy administration systems by using Ratabase to innovate rules and rating.
