

CGI Application Services Optimization Program

Experience the commitment®

The CGI Application Services Optimization Program (CGI ASOP) is a forward-looking, team-driven approach for transforming application management into actionable insights that help clients drive results and value.

CGI ASOP¹ enables clients to achieve the following:

- Modernize, consolidate and coordinate operations
- Innovate to better meet evolving needs and accelerate business outcomes
- Drive transformation towards agile development methodologies
- Deliver new applications more quickly and with higher quality
- Leverage real-time performance visualization to improve business outcomes
- Manage costs and eliminate unproductive effort

ACCELERATE BUSINESS AGILITY

CGI ASOP enables organizations to accelerate business agility through the following functional model:

Managed teams: Optimize and automate processes in a culture of **working collaboration**

Managed services: Drive predictability with agile and DevOps **processes and touchpoints**

Managed performance: Enable KPI- and metric-driven transformation by linking execution to strategy for **continuous improvement**

Key enablers: Technology and metrics: Benefit from agile, flexible and scalable **technologies** and **toolsets** to respond to rapid changes in business needs

CGI ASOP's functional model encompasses a comprehensive set of application service processes based on best practices, tools, methodologies, metrics and dashboards.

CGI ASOP is an integral part of CGI's end-to-end application services.

¹ Formerly known as ProAction Application Services

CGI ASOP enhances the entire program life cycle, enabling continuous improvement and innovation to deliver significant benefits.

CGI ASOP BENEFITS

- **Innovation visibility:** Visibility in improving operations and increasing efficiency to drive transformation and value
- **Cost/schedule optimization:** Reduced “run” costs by introducing automation, innovation and lean concepts
- **Knowledge preservation:** Operational-level collaboration mechanisms to ensure the organization “acts as one”
- **Built-in quality and security:** Use of “shift-left” concepts to build in quality and security practices
- **Enterprise agility:** Agility with a modernization focus to drive long-term value and benefits

ABOUT CGI

Leading organizations are transforming AS management from an overhead cost to a strategic driver. This type of transformation requires a new approach to AS management—one that focuses less on resources and more on results. CGI ASOP is driving strategic transformation and outcomes for organizations worldwide.

Contact us at ASOP@cgi.com to learn more about the features and benefits of CGI ASOP, including how CGI can help your organization get the most out of its IT investment in the area of AS management.
