

Application Services Optimisation Programme

Experience the commitment®

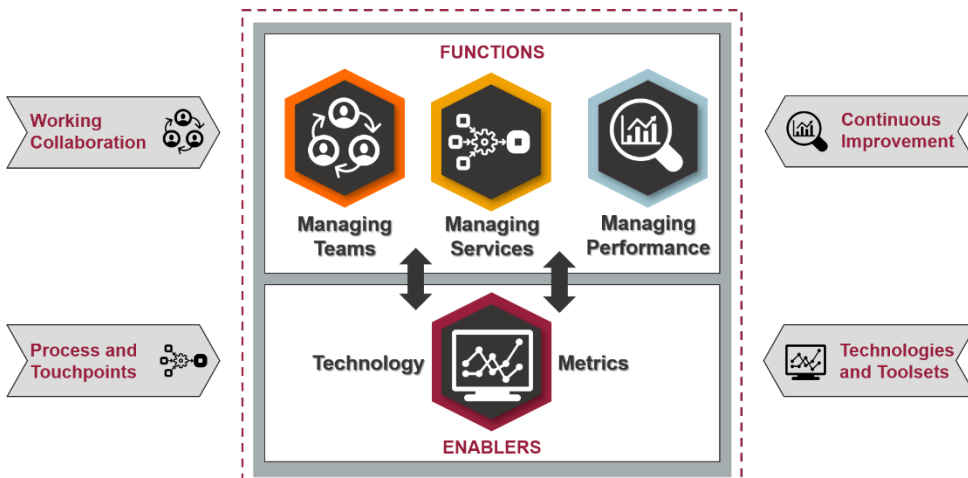

Introducing Application Services Optimisation Programme (ASOP): CGI's forward-looking, team-driven approach to application services management.

CGI's Application Services Optimisation Programme¹ transforms application services by providing actionable insights that enable engagements to:

- Modernise, consolidate and coordinate operations
- Innovate to better serve evolving business needs and accelerate business outcomes
- Speed transformation towards agile development methodologies
- Deliver new applications more quickly and with higher quality
- Leverage real-time visualisation of performance to improve business outcomes
- Manage costs and eliminate waste

ACCELERATED BUSINESS AGILITY

CGI's Application Services Optimisation Programme's functional model encompasses a comprehensive set of application service processes, which is built upon best practices, tools, methodologies, metrics and dashboards.

Application Services Optimisation Programme is an integral component of CGI's Application Services.

¹ Application Services Optimisation Programme, formerly known as ProAction-AS

Application Services Optimisation Programme Main Features

Managing Teams: Optimise and automate processes in a culture of **working collaboration**

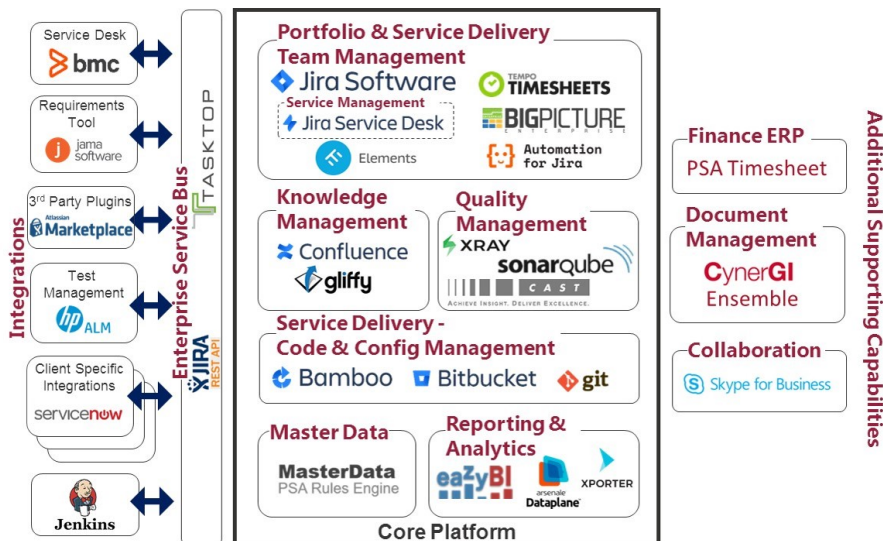

Managing Services: Drive predictability with Agile & DevOps **process and touchpoints**

Managing Performance: Enable KPI / Metric led transformation by linking execution to strategy for **continuous improvement**

Technology & Metric Enablers: Agile, flexible, scalable **technologies** and **toolsets** to respond to rapid changes in business needs

CGI's Application Services Optimisation Programme enhances the entire programme life cycle, enabling continuous improvement and innovation to deliver significant benefits.

Application Services Optimisation Programme Benefits:

- **Innovation Visibility** delivering business value through transformative processes and insights, improving operations and increasing efficiency
- **Cost/Schedule Optimisation** through reducing "run" costs by introducing automation, innovation and lean concepts
- **Knowledge Preserved** by implementing operational level collaboration mechanisms – enabling teams to act as one
- **Built in Quality and Security** applying "Shift-left" concepts to quality and security practices
- **Enterprise Agility** using best practice principles and industry-leading toolset.

ABOUT CGI

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world.
