# Simplifying Hybrid IT Management

with the CGI Unify360™ Platform

As a key enabler of digital transformation, cloud adoption continues to accelerate, leading to hybrid environments that combine cloud and traditional IT delivery models. These complex environments require a holistic management strategy and solid governance to minimize cost, risk and sprawl, while maximizing security, agility, efficiency and innovation to drive value and speed-to-market. Regardless of where your organization is in its digital transformation, you can benefit from CGI Unify360's comprehensive approach to hybrid IT adoption.
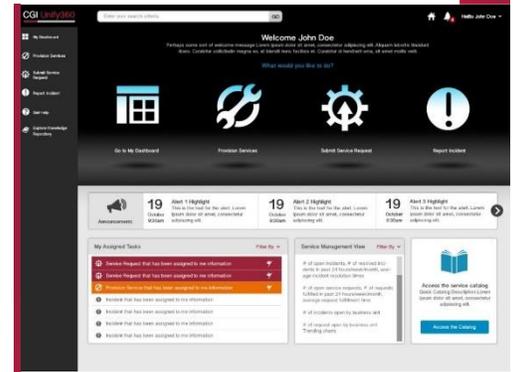

THE SOLUTION TO BETTER MANAGE IT ENVIRONMENTS

CGI has helped both government and commercial sectors gain greater control of their hybrid IT environments. Our Unify360 Platform delivers a proven methodology plus a powerful toolkit for on-premises environments, cloud-based environments or both.

The Unify360 Platform delivers tangible results including:

- Future state IT portfolio planning and management

- Governance and compliance of technical and business processes in commercial cloud environments

- Transition into steady state operational models

- Visibility into security posture, cost savings and benefits of the modernized IT portfolio through self-service operational and financial dashboards

- Optimization and continuous improvement of the operational environment

- Identification of new innovations and services to be implemented for future digital transformation activities

CGI UNIFY360™ PLATFORM KEY BENEFITS

- Single platform for acquiring, operating, securing and governing all elements of the IT universe

- Greater control over IT operational spend

- Enforced governance through client-defined approval workflows

- Improved oversight of hybrid IT operations via real-time data on portfolio performance, billing and security compliance

- Consolidated view into spend, service availability and security posture

- Automation and autonomic processes to deliver at business speed

- Open ecosystem adaptable to client-specific requirements or existing investments

> **"Regardless of where your organization is in its digital transformation, your agency can benefit from CGI Unify360's comprehensive approach to hybrid IT adoption."**

KEY COMPONENTS OF THE CGI UNIFY360 PLATFORM

Key components of our state-of-the-art technology include:

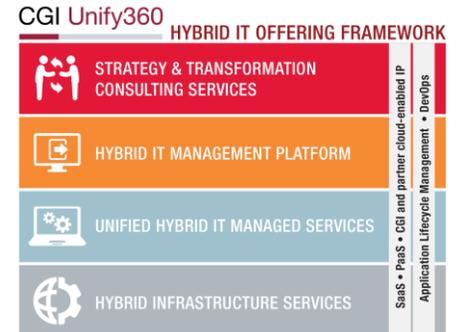

UNIFIED HYBRID IT MANAGED SERVICES

Our state-of-the-art technology incorporates CGI's mature and proven managed security services for a turnkey hybrid IT management solution. At CGI, we take the business of managed services seriously and offer a "best-fit" approach. We provide end-to-end services that monitor all aspects of your infrastructure with a single system—the CGI Unify360 Hybrid IT platform—to proactively identify areas for enhanced efficiency and deliver expected results. Whether your organization needs a Help/Service Desk, Managed Security Services (NOC/SOC), Multi-source Services integration (MSI) or Hybrid Infrastructure services, CGI offers flexible managed services for both on-premises and cloud-based infrastructure services.

SECURE, COMPREHENSIVE, PROVEN METHODOLOGY AND TOOLS

The CGI Unify360 Platform and applications were built to align with DoD Cloud Computing Security Requirements (800-53 Rev 4, PCI-DSS, HIPAA, ISO 270001, etc.) and secured according to the NIST/FISMA Baseline. Certified for the highest-security workloads with the ability to support systems with Impact Level 4/5 workloads in commercial cloud environments. All processes are based on the Project Management Institute's Project Management Body of Knowledge (PMBOK) as well as industry best practices, including ITIL®, SEI-CMMI, COBIT and ISO 9001. When combined with CGI's Strategy and Transformation Consulting Services, Unified Hybrid IT Managed Services and Hybrid Infrastructure Services, we offer a complete end-to-end solution for Hybrid IT environments.

UNIFY YOUR IT UNIVERSE

The CGI Unify360 Hybrid IT Management Framework provides a full portfolio of cloud enablement and digital transformation solutions including consulting, transformation, managed and infrastructure services, as well as a single management platform for operations, brokerage, governance and security. The framework also helps facilitate DevOps and other transformational practices.

ABOUT CGI

Founded in 1976, CGI is the fifth largest independent IT and business process services firm in the world. With 73,000 professionals across the globe, CGI delivers an end-to-end portfolio of capabilities, from IT and business consulting to systems integration, outsourcing services and intellectual property solutions. CGI works with clients through a local relationship model complemented by a global delivery network that helps clients digitally transform their organizations and accelerate results.
