

Experience the commitment®

Electronic Counting

Delivering transparent, secure and accurate election vote counting

Challenges

Increasing number of elections, combined elections and different voting systems

Requirement for each stage to be conducted transparently and with integrity

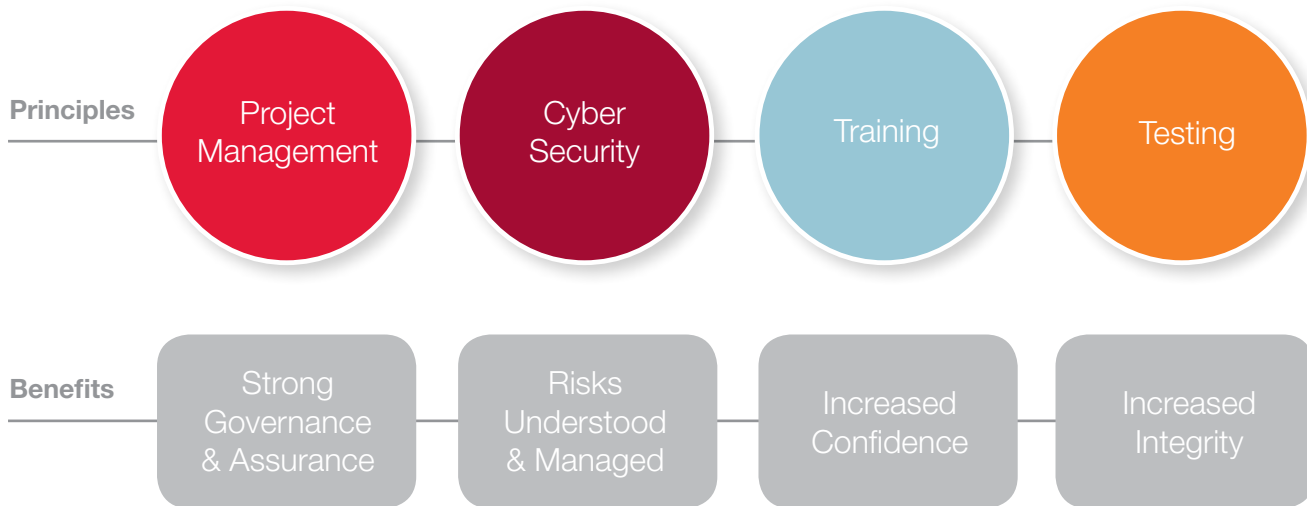

Increasing security requirements

Reduced workforces and availability of election staff to resource long counts

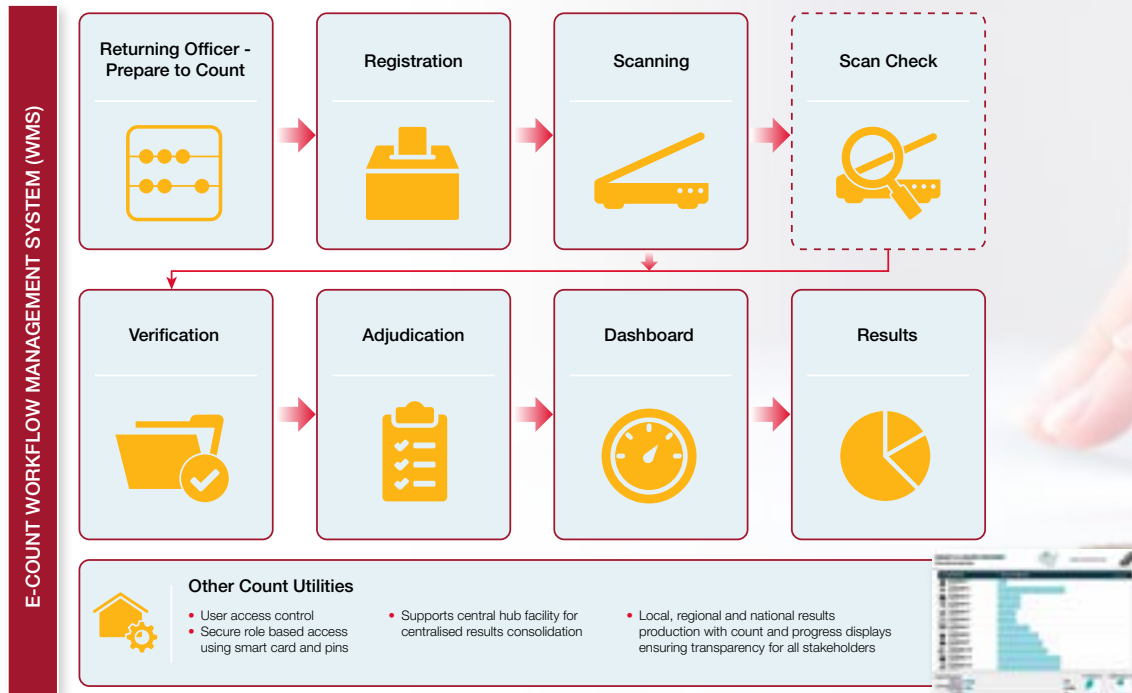

Demand for fast results from election stakeholders

Error prone manual counts with limited auditability of the count process

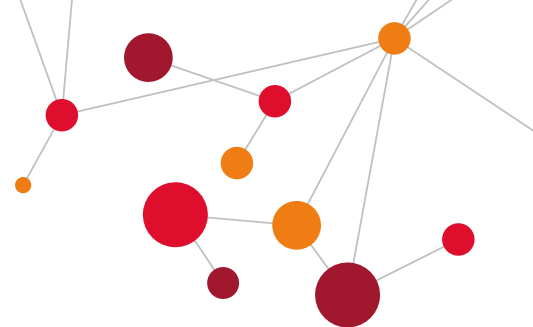

End-to-end project delivery

e-Count workflow management system

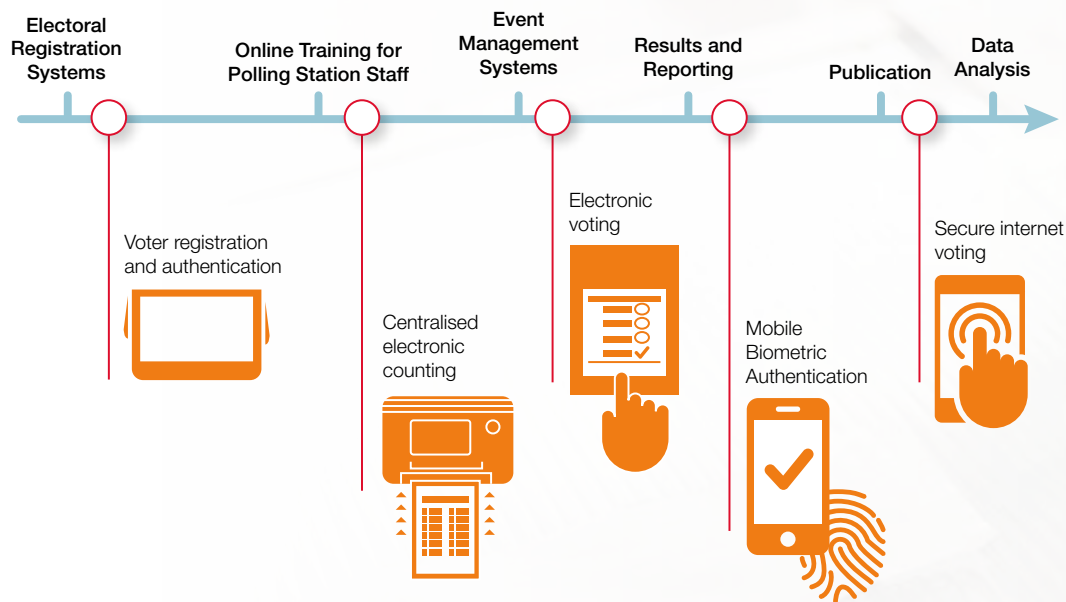

Benefits

Election technology roadmap

Increasing the accuracy, speed, integrity and accessibility of all stages of the election lifecycle

“I would like to congratulate CGI on their success in being selected to deliver electronic counting for the next Mayoral and Assembly elections in 2020. Having worked closely with Transport for London and representatives from the London Boroughs to ensure a robust and transparent selection process, the GLA team is looking forward to working with CGI, Smartmatic and partners to deliver an effective and accurate e-count.”

Mary Harpley
GREATER LONDON RETURNING OFFICER
GREATER LONDON AUTHORITY

CGI is a world class IT provider with local delivery specialisms with successful delivery of nationwide elections in Scotland in 2012 and 2017. Our experience of delivering complex, mission critical systems ensures the projects we develop and implement are realistic, achievable, and bring value to the organisation.

Smartmatic, the world's leading elections and voting technology company, offers a comprehensive portfolio of unique technologies and services to improve every stage of the electoral process. Its technology has processed over 3.7 billion votes in election projects on five continents. Headquartered in London, working from 16 offices around the world.
