

# License Desk Software Ordering and Provisioning

**W**orldwide companies spend a big portion of their annual budget on purchasing software. The License Desk service of CGI helps your company to save money in various ways.

## THE CHALLENGE

Many companies that do not have a license desk, face challenges that lead to unnecessarily paying too much for software.

Employees don't know how to purchase software and where to buy it at the best price, a good administration of all software bought lacks, software owned by the company is not being used while others within the company are purchasing new licenses, ordering software can take a long time.

## THE SOLUTION

CGI caters end-to-end procurement service which can help your employees in purchasing their software needs without having to go through all the hassle.

Our dedicated License Desk manages the requests from Ordering to getting quotation to getting the software provisioned. This means from Start to Finish!

Our License Desk does the negotiation with different resellers/vendors to get the best price quote where you can get savings from your purchases. Likewise, maintaining records of purchased software is kept track in a license database, which may help your company in future orders especially during renewal period.

This license database will also allow your company to initiate other Software Asset Management processes for which we also offer our services.

Having such a license database is crucial to re-install software when your employees need other or new hardware.

In addition CGI can also maintain a software catalogue that lists all the standard software for which your company has contracts. We keep it updated with the changing prices, also for subscription products.

## WITH LICENSE DESK BY CGI, YOU CAN ACHIEVE THE FOLLOWING:

- Experience End to End Procurement service which will allow you to get your needed software and achieve savings on purchased licenses.
- Get access to Software Catalogue
- Maintain an up-to-date license database of software assets
- Ensure license compliance of your enterprise.
