Secure enterprise dynamic case management for SharePoint –
On-Premise, Private Cloud and Office 365

CGI eGov360

Next Generation

The CGI eGov360 platform has been completely redeveloped using the latest technologies to provide a hosting-agnostic solution that can be deployed in highly secure on-premise infrastructure or private cloud and Office 365.

CGI eGov360 provides a highly scalable and modular enterprise dynamic case and secure document management platform specifically designed to address highly secure and demanding operations.

CGI eGov360 provides significantly enhanced functionality to organize, create, handle, archive and publish information and documents.

Designed to Scale

CGI eGov360 is designed to manage hundreds of thousands of users with millions of records and documents while maximising performance and operational efficiency.

A partnership with CGI allows you to meet the requirements of complex civil service activities in a cost-effective manner. We operate according to a strict set of values and furthermore guarantee our mutual success based on the following attributes:

Guaranteed reliability

- Owner-operated company with over 40 years of experience and a strong focus on effective and long-term partnerships
- Investments are secure because we are one of the world's five largest independent IT companies with a strong financial position

High quality

- A strict focus on quality with on-site support for over 4,500 customers worldwide
- High recommendation rate of 9.4 out of a possible 10.0 points

Comprehensive supply capability

- In-depth industry expertise and knowledge of the field with over 100 leading products such as CGI eGov360 (customizable e-government platform), NATO DHS (information and document management for over 40,000 users worldwide) and Burgernet (citizen network for 1.5 million Dutch citizens used to assist the police)
- Global supply capability thanks to 77,500 CGI employees worldwide, including more than 4,000 in Germany

Modular and Customisable Digital Case and Document Management

CGI eGov360 leverages and significantly extends Microsoft SharePoint and Office tools to provide a modern digital workplace that is tailorable to the exact customer requirements and processes.

Improved operational Efficiency and Security

CGI eGov360 provides a full Microsoft Office based toolset that is highly intuitive, flexible and for users, but allows security focused industries to retain control of their crucial information.

Office 365, Private Cloud and On-Premise Hosting

CGI eGov360 next generation can be deployed both on-premise as well as in a private or in a public cloud architecture and supports Microsoft Office 365 and SharePoint Online.

Scalability and Performance

Maximises the performance and scalability of SharePoint. CGI eGov360 automatically distributes and balances the document and permission sets across a SharePoint farm.

Military grade Security

CGI eGov360 extends SharePoint permissions with public and private metadata concepts allowing need-to-know and need-to-share models.

Integration Platform

CGI eGov360 is designed to integrate with 3rd party systems from secure scanning and document classification through to geospatial information systems and encryption gateways.

About CGI

CGI is a global service provider for IT and business processes. We were founded in 1976 and have a total of 77,500 employees at 400 locations in 40 countries. We are on-site for our customers - with strategic IT and business consulting, systems integration, managed IT, business process services and intellectual property at a top level. We support our clients in making better use of ongoing investments, while at the same time leveraging new digital technologies and business strategies that enable clients to achieve the best solutions across the entire value chain. Regarding time and budget, we are regularly awarded due to our strict delivery discipline. To this end, we have consistently achieved more than nine out of ten potential points in customer satisfaction surveys over the past ten years.
