

Ratabase EMMA

Ratabase EMMA provides coordination, validation, and synchronization between Ratabase Product Builder and Ratabase Production.

The Ratabase Environment Management & Monitoring App (EMMA) is a software package that bridges Ratabase Product Builder and Ratabase Production databases on supported platforms. Through both an API and a Windows interface, EMMA enables Ratabase users to:

- **Distribute and load:** Develop distribution packages from Product Builder to load to one or more target environments with a single click,

simplifying the entire process. Enable your Ratabase business team to make changes quickly and easily without burdening IT.

- Use templates from Product Builder to distribute packages.
- Use a load queue to check on the status of load activities.
- **Transfer:** EMMA enables transfer filings from one production environment to another production environment.
- **Inventory and compare:** Provide inventory comparisons between Ratabase Product Builder and Ratabase Production and be 100% confident your approved rates are in production.
 - List all filings for an environment and version.
 - Perform a quick comparison between two environments.
 - Perform a full comparison between environments, comparing additional details of tables and formulas.

RATABASE: POWERFUL AND AWARD-WINNING

- XCelent Award recipient for functionality, customer service and client base
- 30+ years serving the insurance industry
- Partner with 12 of the top 20 global insurers
- 100+ live implementations
- Sub-second response time per rating request (~1,000 transactions in less than 5 seconds)
- Processes 60% of GWP in U.S. alone
- Clients have experienced:
 - 75% improvement in days required to implement changes
 - 50% reduction in staffing needed to support rating

“It is rare for a vendor to win an XCelent award, and rarer still for a vendor to win more than one award. CGI’s Ratabase product won an unprecedented three XCelent awards in this year’s review of rating engines.”

- Karlyn Carnahan, Celent Property and Casualty Research Director

- **Synchronize:** EMMA enables users to synchronize Product Builder and Production databases, as well as synchronize production-to-production environments.
- **Monitor:** Using the dashboard configuration, users can monitor the performance of rating transactions using several metrics such as transaction failure rate, transaction speed and transaction activity.

EMMA is available for Windows, mainframe, Linux and AIX and is compatible with Ratabase 9 and later versions.

ABOUT CGI

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world. Operating in hundreds of locations across the globe, CGI delivers end-to-end services and solutions, including strategic IT and business consulting, systems integration, intellectual property, and managed IT and business process services.
