

## STEM – WHO AM I?

### How to play STEM Who Am I?

Print out the jobs below and cut them out so that they are individual words (these can be written on post-it notes if you do not have access to a printer). Then put all the individual pieces of paper into a container.

Player 1 picks a job out of the container, shows each of the other players and then puts it back in the container without looking at it.

Player 1 can then ask up to 20 questions to try and guess the job. The questions can only have yes or no answers, clues are not permitted.

The other players answer the questions that Player 1 asks, with just yes or no answers. If Player 1 has not guessed the answer before question 20, they may receive 1 clue from the other players, they must then guess the answer.

Then repeat the cycle so that everyone has a few turns!

Doctor	Air Traffic Controller	Electrical Engineer	Astronaut
Plumber	Programmer	Dentist	Builder
Web Developer	Mechanical Engineer	Chemist	Mechanic
Biologist	Project manager	Teacher	Software Developer
Accountant	Surgeon	Therapist	Games Developer
Architect	Physicist	App designer	Nurse
