

GSN

German Secure Network

CGI

Experience the commitment®

German Secure Network is the answer to the ever-increasing security requirements placed on your company network, whether these are imposed through regulatory specifications such as IT Grundschutz, ISO 27001, compliance directives or requirements regarding the security of classified information.

THE CHALLENGE

Increasing security requirements demand the centralized administration of clients, email transport services, mobile devices, data management and much more based on uniform standards across the board. This is a growing challenge for IT managers in global companies, from administrators to CIOs or CISOs.

OUR SOLUTION

Only by using a completely separate IT domain can the highest security standards be met. The **German Secure Network (GSN)** is a service-oriented architecture which provides all options to cover customer-specific requirements in all security areas and is both modular and scalable.

- Customer-specific architecture: scalable service landscape
- Outsourcing solution including field service
- On-premise solution for complete control and self-management by the customer
- As a managed service (in Germany) from a customer data center
- Provision of individual service applications (e.g. backup, SharePoint) with access through customer devices
- Service documentation conforming to ITIL

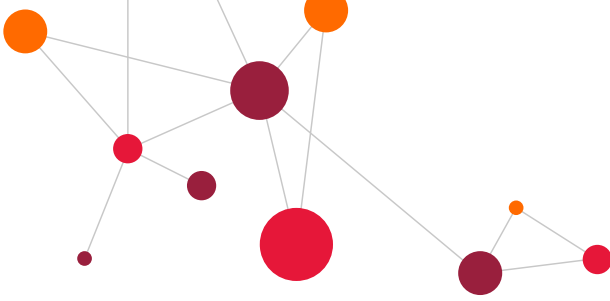

ADVANTAGES AT A GLANCE

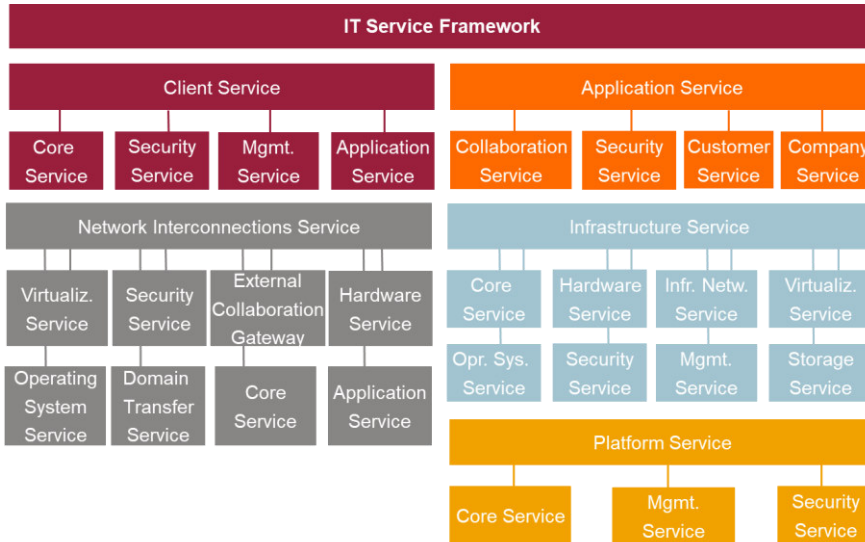

- Compliant with IT-Grundschutz 200 series
- Compliant with BSI ISi-LANA
- Compliant with the BMWi Confidentiality Manual (GHB)
- Managed services seen by German eyes only
- VS-NfD / NATO RESTRICTED / EU RESTRICTED
- Remote access worldwide
- VS-NfD-compliant WIN10 clients
- Managed mobile devices

GSN Service Framework

CGI is an independent service provider. We cooperate with selected partners which provide the perfect technological solutions for the respective scenario.

When it comes to **GSN**, CGI relies only on appliances from partners which are approved and certified by the Federal Office for Information Security (BSI), such as:

BLACKBERRY
SUBSIDIARY

GSN – our solution for your secure working environment.

ABOUT CGI

CGI is a global service provider for IT and business processes. We were founded in 1976 and have a total of 77,500 employees at 400 locations in 40 countries.

We are on-site for our customers – with strategic IT and business consulting, systems integration, managed IT, business process services, and intellectual property at a top level.

We support our customers in making better use of ongoing investments, while at the same time leveraging new digital technologies and business strategies that enable customers to achieve the best solutions across the entire value chain.

Regarding time and budget, we are regularly awarded due to our strict delivery discipline. To this end, we have consistently achieved more than nine out of ten potential points in customer satisfaction surveys over the past ten years.
