CGI Trade360
Payables
Solutions for meeting emerging buyer-centric supply chain finance needs
When your customer says, “I want my bank to help me simplify the management of my increasingly complex payables,” ...

With CGI Trade360, you can significantly streamline your customers’ complex payables processing by:

• Giving the buyer a single delivery method for all payables data
• Providing supply chain finance processing and matching services
• Managing approved payables finance programs with suppliers
• Facilitating buyer-discounted early payments
• Aggregating payments across all programs

Benefits

**Customer (buyer)**

• Access proven open account and supply chain finance products
• Reduce working capital requirements
• Achieve more financial stability in the supply chain
• Strengthen relationships with suppliers
• Improve visibility across the financial supply chain

**Bank**

• Obtain supply chain finance technology without a large initial investment
• Manage open account products on an integrated platform with traditional trade and cash management
• Obtain a high degree of straight-through processing
• Leapfrog the competition with rich functionality
• Gain flexibility in operations and customer service
• Provide a truly global service
• Realize significant operational efficiencies
• Build stronger customer relationships
• Increase bottom line by supporting customers’ entire supply chain
When the bank needs to offer new solutions to meet emerging buyer needs ...

With CGI Trade360, the bank can move beyond traditional products to support a range of buyer-centric solutions using bank-assisted open account, approved payables finance, integrated payables, and buyer finance.

The financial supply chain continues to receive the close attention of corporate treasurers looking for ways to reduce costs through processing efficiency, improving days payables outstanding (DPO), financially strengthening suppliers and taking advantage of discounts to optimize the use of cash.

Banks now have a significant opportunity to move beyond simple payment processing by becoming more deeply involved in the customers’ financial supply chain. As a result of the shift to open accounts, complexities have significantly increased for the buyer. Where traditional trade had previously been used, the associated bank services are no longer provided. Plus, adoption of supplier finance programs requires bank involvement to keep buyers at an arm’s length in order to protect their balance sheets. Buyers also are able to take advantage of dynamic and other forms of discounting; however, those processes need to be managed.

The CGI Trade360 SaaS platform enables banks to take the complexity out of payables processing for their customers with streamlined and straight-through processing, a range of payables solutions, and a variety of financing capabilities.
Integrated Payables

Optimizes working capital, improves cash flow and helps strengthen the buyers’ entire supply chain with a range of financing options.

**Consolidate**
- Payables data
  - Single input format
- Payments across programs by:
  - Channels
  - Supplier

**Automate**
- STP processing
  - Incoming payables
  - Determine finance eligibility
  - Auto/on demand financing
  - Consolidated payments
  - Buyer financing

**Optimize**
- Working capital (DSO)
- Minimized manual effort
- Use of funds
- Liquidity—financing options
- Consolidated reporting
- Analytics

**Integrated Payables**
- Receives payables data electronically
- Schedules payments
- Determines purchase eligibility
- Purchases on-demand or automatically
- Aggregates payments
- Optionally finances buyer
Key Functionality

- Portfolio based straight-through processing
- Processes all approved payables
  - Domestic or cross-border payments
  - Approved payables finance, straight invoice payment, buyer-discounted payment programs
- Buyer API-driven integration
  - Host-to-host payables—one data format for all programs and payment channels
  - Portal upload of payables—in buyer’s format with workflow and approval managed by Portal
- Buyer-discounted payment program
  - Captures discount from invoice discount terms
  - Executes dynamic discounting agreements
- Approved payables finance program
  - All invoices scheduled for payment and checked for purchase eligibility
  - All eligible invoices auto-purchased or sent to supplier portal for on-demand purchase (supplier instructions)
  - When due—debts buyer for all due invoices, pays supplier for unpurchased invoices, and pays bank for purchased invoices
  - Automatic liquidation of financing (purchased invoice asset)
- Invoice payment program
  - Invoices paid on their due date

- Common functions
  - Aggregated payments: Each day, for all programs, one aggregated multi-beneficiary payment is created per payment channel and processed straight through
  - Extended Buyer Finance: Any buyer obligation under any program can be automatically financed

Payables products supported by CGI Trade360

The CGI Trade360 SaaS platform enables banks to take the complexity out of their customers’ payables processing, provide financing programs for their suppliers, and optimize the use of funds through discounting opportunities.

<table>
<thead>
<tr>
<th>Offering</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bank-Assisted Open Account (ATP)</td>
<td>Provides letter of credit-like processing services to the buyer (issue, exam, payment); however, without a bank guarantee to the supplier, thus leaving the final payment decision with the buyer</td>
</tr>
<tr>
<td></td>
<td>• Receives purchase orders (issue and amend) and invoice data (exam)</td>
</tr>
<tr>
<td></td>
<td>• Key data matching is available in the exam activity</td>
</tr>
<tr>
<td></td>
<td>• Once invoices are approved for payment, the invoices may be eligible for approved payables finance (reverse factoring) if a program has been established for that supplier</td>
</tr>
<tr>
<td></td>
<td>• Supplier has an on-demand option for approved payables finance requests through the supplier portal</td>
</tr>
<tr>
<td></td>
<td>• Bank settles the invoices with the buyer on due date</td>
</tr>
<tr>
<td>Approved Payables Financing</td>
<td>Purchase approved invoices from the seller under an approved payables program</td>
</tr>
<tr>
<td></td>
<td>• Can be used to create standalone approved invoice financing in support of a customer’s collaboration platform or other arrangements</td>
</tr>
<tr>
<td></td>
<td>• Integrated into ATP and integrated payable offerings to provide approved payables</td>
</tr>
<tr>
<td>Buyer Financing</td>
<td>Provides the buyer with funds to meet its bank obligations</td>
</tr>
<tr>
<td></td>
<td>• When the buyer has a payment obligation under an approval to pay, open account payment or integrated payables, it can request financing to fund that payment</td>
</tr>
<tr>
<td>Integrated Payables Management</td>
<td>This solution receives approved invoices from the buyer to support a variety of value-added payables programs on a portfolio basis:</td>
</tr>
<tr>
<td>(see previous page for more details)</td>
<td>• Buyer Discounted Payments—Used to support the capture of the discount offered in the invoices’ discount terms or terms subsequently agreed to by the parties (dynamic discounting)</td>
</tr>
<tr>
<td></td>
<td>• Approved payables finance—Supports established approved payables finance programs between the buyer, seller and the bank; determines the eligibility of the invoices under the program’s rules and either automatically finances them or offers them through the supplier portal where the supplier can accept the offers on demand; all invoices are settled with the buyer on their due date</td>
</tr>
<tr>
<td></td>
<td>• Invoice Payment—Approved invoices are paid on their payment date</td>
</tr>
<tr>
<td></td>
<td>• Extended buyer finance—Can be combined with any of the above programs to provide additional financing to the buyer to fund its settlement obligations to the bank</td>
</tr>
</tbody>
