

The U.S. Department of Energy (DOE) defines its mission as ensuring America's security and prosperity by addressing its energy, environmental and nuclear challenges through transformative science and technology solutions.

To support the mission, the agency and its associated laboratories, facilities and support contractors must manage government properties valued in \$US billions. Sunflower asset management solutions enable DOE property managers to maintain control of sensitive assets, generate accurate and timely reports to support financial accountability planning and decision making, and comply with federal and DOE regulations.

## GOVERNMENT PROPERTY MANAGEMENT

Sunflower solutions provide managers of DOE property with the tools to confidently manage government property, comply with contractual and regulatory requirements and maintain government approved management systems. Sunflower solutions provide ease of use for end users, a world class technology infrastructure and the flexibility to meet changing needs and evolving requirements. The Sunflower solutions are designed to support standard government property management processes for:

- Lifecycle management of personal property
- Financial accountability of capital equipment and real property
- Physical control of sensitive property
- Federal Real Property Profile Management System (FRPP MS) reporting
- GSA federal motor vehicle fleet reporting using the Federal Automotive Statistical Tool (FAST)
- Report requirements of contractor-held property
- Physical inventory and financial audit support
- Excess asset screening and disposal

## FEATURES AND BENEFITS

- Personal property, real property and sensitive asset management
- Compliance with Federal Acquisition Regulation (FAR), Department of Energy Acquisition Regulation (DEAR) and other agency or contractual property regulations
- Automated reporting improves accountability
- Streamlined inventories and reporting with mobile and data visualization solutions

**“Sunflower is trusted by the Department of Energy, national laboratories and contractors for government property management”**

## LIFECYCLE ASSET MANAGEMENT

Whether the property is managed by the agency, an associated laboratory, facility or contractors, Sunflower solutions support program and mission success through cost effective lifecycle asset management. All required data elements for government property items are at your fingertips.

Capture purchasing, leasing, grant and other funding information for assets upon receipt

- Maintain support documentation for property lifecycle events
- Record and manage maintenance and calibration activities
- Conduct inventories through barcode scanners, online entry or lifecycle transactions
- Manage excess screening and disposal through SF120/122 reports, GSAXcess and agency screening tools
- Receive and issue material assets
- Check-in/check-out of sensitive equipment and materials
- Lifecycle transaction history resulting in positive audit outcomes

## ASSET MANAGEMENT WITH THE SUNFLOWER SUITE OF SOLUTIONS

- Manage physical and financial accountability in **Sunflower Assets®**—a single web-based system that makes property activity easy to record, simple to retrieve, accessible from anywhere and completely auditable.
- Use **Sunflower mobile solutions** for asset receiving, physical inventory and excess management simplify enterprise asset management processes by bringing your asset data to a handheld device.
- Provide insight into key performance metrics for self-assessment and operational decision making **with Sunflower reporting**.
- Utilize **Sunflower RFID solutions** to track assets in real-time and automate location and status updates without user intervention. Asset mapping and floor plans let you record the location of assets within a structure.
- Operate confidently when managing **additional asset lifecycle processes**, including maintenance, shipping, kitting, configuration and more.

## ABOUT CGI

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world. Operating in hundreds of locations across the globe, CGI delivers an end-to-end portfolio of capabilities, from strategic IT and business consulting to systems integration, managed IT and business process services and intellectual property solutions. CGI works with clients through a local relationship model complemented by a global delivery network to help clients achieve their goals, including becoming customer-centric digital enterprises.

In the asset management market, CGI provides a broad portfolio of software features that manage the asset lifecycle to help clients achieve total asset visibility, improve decision-making, accountability and regulatory compliance.
