

# Federal Financial Management

Increasingly, federal agencies are faced with challenges of implementing streamlined financial business processes, standardized reporting practices and improved data transparency.

## The Transformation Challenge

The most recent Association of Government Accountants (AGA), Chief Financial Officers Survey has reaffirmed that federal financial management executives and managers continue to face many challenges with financial systems technology, human capital management and budget uncertainty. The President's Management Agenda (PMA) will continue to drive these challenges as it seeks to continue modernizing information technology, increase access to data to provide transparency and to evolve the civil service workforce to meet the changing federal environment. Many of these challenges are interconnected and are best solved using an enterprise strategic approach with clear objectives that are aligned with practical and achievable tactical plans and goals. Federal financial management executives are in a unique position to make lasting changes by leveraging existing and new technology and tapping into the available enterprise data to solve these problems.

## At a Glance: CGI Federal Financial Management

CGI has a rich history in delivering world-class services to senior financial executives and managers to maximize performance and efficiency in the U.S. defense, civilian and intelligence agencies. Having supported hundreds of federal organizations across all 3 branches of government, we are one of the federal market leaders in financial management with deep domain expertise in financial practices, policies, processes, systems and operations. This, combined with our application of industry best practices from our 5,000+ global financial management clients serve to eliminate unnecessary experimentation when trying to solve complex problems.

## Momentum®

### The Ideal Solution for Federal Agencies

- **Built for the Federal Government:** CGI's Momentum solution is a COTS product specifically designed around the nuances of federal regulations, unlike many other commercial ERP solutions.
- **Agency-Driven Innovation:** Through the use of agency-run Momentum User Groups, User Forums and online documentation, CGI tailors Momentum based on input from its users and stakeholders.
- **Component Functionality for Incremental Implementation:** Add modules to rapidly expand capabilities, rather than waiting for extensive system upgrades and their unavoidable downtime.
- **Shared and Flexible Models:** Momentum offers a variety of ways to serve various constituencies within or even across agencies. Upgrades, patches and service releases can be delivered to all environments quickly.
