

ProductWriter Services

The ability to implement changes to rating calculations, terms and conditions is a business critical function.

CGI understands that it is necessary to turn around rate and terms changes quickly and accurately, and if underwriters are changing multiple products at once, it can place your internal teams under immense pressure. We can offer your team the comfort of a pre-agreed service contract to act as a buffer when those load peaks arrive, or provide a fully managed service to Service Level Agreements that your organisation can depend on.

Through our dedicated Rating Services Team, CGI is able to provide a fully managed service for maintaining Insurance Products, either as an extension to your in-house team or as a totally managed service.

Our Rating Services Team is experienced in every class of business and has engineered hundreds of products on multiple rating technologies. With such a wealth of experience, you can be assured that our Rating Services Team provides an efficient and cost effective service for the maintenance and development of insurance products.

POLARIS AND PRODUCTWRITER

CGI is recognised as a Polaris Solutions Provider with more than 20 years experience in the development and maintenance of Polaris Schemes on behalf of insurers on all Polaris Dictionaries. We can also advise on the integration of the Polaris Run Time Engine into various platforms, including Cloud.

MANAGED SERVICES

Our Rating Services Team can take complete responsibility of your Polaris/ProductWriter insurance rating applications, including:

- Development of new products
- Product testing
- Change tracking
- Problem resolution
- Maintenance activities

SERVICE COMPONENTS

- Design, development and implementation of rating
- Support and maintenance of existing products
- A fully Managed Service or extension to an in house team
- Fixed Priced, Workstack or T&M service contracts available.
- Application integration and capacity management

STAFF AUGMENTATION

Our Rating Services team can act as an extension to an existing in-house team by providing:

- In-depth rating expertise and technical skills in ProductWriter
- Extra resources for peak demands, either on or off site
- Additional support through skills training
