

Cloud Transformation with NetApp

The digital economy is a constant driver of innovation, fueling evolving business models, products, and services. Together, CGI and NetApp deliver a hybrid and multi-cloud approach that empowers organizations to shift business models and adapt to disruptive change.

A few short years ago, public cloud was the strategy of choice, only for organizations to realize cost over runs, compliance risks and one-size-fits-all models did not work effectively. Together, we are helping organizations realize the full potential of the data fabric, meeting them wherever they are, accelerating each step of the way on their journey to the cloud. Our ability to design the right hybrid cloud architecture, while remaining agnostic towards a specific public cloud service provider, makes us a trusted advisor to accelerate the path to the hybrid cloud.

Holistic cloud transformation offerings

For clients who seek speed, stability, security, scalability, savings and effective change, CGI and NetApp deliver the following value:

- **Strategy and planning** – We partner with you to determine a modernization and cloud transformation strategy, and plan for the enterprise landscape.
- **Transformation** – We work to transform your volume of applications to an IT landscape characterized by reduced cost, increased agility, improved business alignment, and reduced risk.
- **Speed** – Solutions enable continuous improvement in your digital IT landscape with maximum flexibility and speed.

Proven delivery

We bring value to our clients throughout the entire digital journey with our professional services across:

Summary

Our cloud transformation approach empowers your organization to define the right cloud model for reducing IT complexity, mitigating risk, improving IT agility and performance, and enabling faster technology adoption. We help you deploy, integrate hybrid cloud platforms to move from traditional IT to an as-a-service model.

Our NetApp Partnership

Together, NetApp and CGI provide services to commercial and government clients with access to specialized digital services and scalable end-to-end capabilities. CGI will provide these capabilities through the new Center of Excellence specializing in NetApp services, and utilizing a combination of our existing value-driven metro market model and delivery centers.

- **Strategic advisory services** – Business strategy and impact analysis, transformation roadmap, application portfolio analysis, platform-readiness analysis, mission-focused execution, operational assessments and IT strategy adjustment and portfolio management.
- **Cloud-native development services** – Greenfield, refactor, and/or rebuild.
- **Modernization factory** – Implement an application rationalization factory to modernize your application landscape by retaining, retiring, replacing, replatforming, rehosting and/or rescaling. Plan for continuous improvement and modernization.
- **Run and improve services** – Includes platform setup, application operations (DevSecOps), platform operations, and platform maintenance.

How we can help

Together, we help our clients establish the right hybrid multi-cloud model by identifying which cloud delivery platforms best address their business needs. We enable business units to achieve goals by designing architecture and service levels to match unique business requirements. For clients looking to meet cloud data protection requirements, we determine data recovery, availability and data protection policies for the cloud. We help our clients move to an as-a-service model by formulating strategies to accelerate new technology adoption and deliver IT services faster. Our approach provides clients with predictable performance and outcomes, reducing the complexity of their IT operations.

CGI and NetApp: Better together

Our joint solutions deliver valuable benefits for our clients, including:

- **Holistic solutions** – We offer everything from strategic consulting to managed operations. Our presence in all three hyperscalers give you a choice of clouds.
- **Global presence** – CGI's 400 offices in 40 countries and NetApp's 150 offices worldwide offer global perspective, localized knowledge and industry presence
- **Domain expertise** – We have combined industry expertise across financial services, government, healthcare and life sciences, telecom, media, utilities, oil and gas, manufacturing, and retail.
- **Delivery strength** – CGI brings 43 years of delivery experience, 77,500 consultants, and 46 emerging technology practices. NetApp's 20-plus years of experience and expertise in IT transformation and cloud technologies.
- **Market footprint** – CGI partners with 5,000 clients who benefit from end-to-end services and offers 175 IP-based solutions that serve 30,000 clients. NetApp has shipped 4,176PB+ of flash storage and 43,600+ NetApp® AFF systems.

About NetApp

NetApp is a global cloud-led, data-centric software company that empowers organizations to lead with data in the age of accelerated digital transformation. The company provides systems, software and cloud services that enable them to run their applications optimally from data center to cloud, whether they are developing in the cloud, moving to the cloud, or creating their own cloudlike experiences on premises.

About CGI

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world.

We are insights-driven and outcomes-based to help accelerate returns on your investments. Across 21 industry sectors in 400 locations worldwide, our 76,000 professionals provide comprehensive, scalable and sustainable IT and business consulting services that are informed globally and delivered locally.
