

Exploration and production companies are focusing their IT priorities to become more agile and reduce the cost of “run” to invest in “change.” Embracing delivery models such as business process outsourcing (BPO) and IT outsourcing (ITO) are key enablers for aligning costs with revenues.

To help address these priorities, CGI helps clients design, build and deliver integrated business solutions across the entire exploration to revenue value chain. We can manage your back office so you can focus on your core business and strategic initiatives, such as operational efficiency and M&A activities.

Whether you are looking to respond to pricing pressures, optimize use of available funds, or gain a business advantage through innovation, our agile energy solutions support your business goals.

CGI AgileEnergy360 strategically integrates BPO and ITO services to improve business processes through the effective use of technology, including scalable, customized solutions to fit your specific needs. We deliver industry-specific capabilities focused on true mission advantage, while reducing costs, managing risks and improving service to end users.

In this model, CGI takes responsibility for non-core functions such as transaction services (e.g., accounting, land administration, human resources, regulatory and contracts) as well as key supporting IT functions (e.g., service and vendor management, application services, devices/desktops, servers and IT facilities).

We also implement the leading financial and operational systems needed to run an exploration and production company. Systems can be from CGI (such as our X2R Business Suite for the upstream back office), our partners or our clients.

Key benefits

- Increase efficiencies from operations to procurement, driving down costs
- Extend and create new functionality to grow solutions with the business
- Increase transparency to execute faster and make smarter decisions
- Reduce delivery risks with rapid deployment in a secure environment
- Realize more predictable costs, better service and increased flexibility
- Build better and more accurate production planning
- Convert CapEx IT costs to OpEx and spread costs over multi-year agreement

Clients benefit from industry-specific capabilities focused on true mission advantage and the governance to realize process improvements. Turning operations over to a proven and trusted partner allows you to rethink how to manage the convergence of production, engineering and financials across the business, from the C-suite to the field. This includes opportunities to extend and create new functionality to grow solutions with the business.

CGI AgileEnergy360 also includes:

- Best practices in onboarding to help ensure acquisitions align with existing business processes and systems to minimize disruption.
- Industry standard applications to make it easier to integrate with partners and other applications.
- Secure, cloud-based delivery to make it easier to scale up or down as needs change.
- Dashboards providing a holistic view into your BPO and ITO services, enabling you to better manage your back-office costs and performance.

Expert BPO

CGI provides a full range of accounting and minerals management business process services—including applications support and management as well as service desk—that have been proven to reduce client staffing costs by 15%. CGI also provides professional services for the administration of the production accounting processes. Our professionals have an average of 17 years of industry experience.

Robust ITO

CGI's IT outsourcing services allow business executives to retain control over IT strategies while benefiting from reduced operating costs and risks without compromising service delivery to end users and their clients. Our key ITO services for oil and gas clients include service and vendor management, applications or cloud-based services, devices/desktops or virtual desktop infrastructure (VDI), servers or cloud servers and IT facilities, such as data centers.

CGI and CGI AgileEnergy360 are trademarks or registered trademarks of CGI Inc. or its related companies.
