

# Ratabase 9 Service Pack 1 (SP1)

Pricing and product innovation are key to success for insurance carriers in an increasingly disrupted marketplace. Carriers investing in CGI's Ratabase solution can be confident that Ratabase's track record of continuous investment and improvement point to a bright future.

## Exciting new features

Ratabase is the enterprise rating solution of choice for the insurance industry, with more than 100 active installations. As part of the Ratabase 9 Service Pack 1 (SP1), CGI continues to add new and exciting features to the product, including 5 of the top 10 features suggested through our Client Innovation Program.

### Product Builder

- The What-If feature received major performance enhancements and has been benchmarked at processing 1,000,000 transactions per hour on a laptop.
- New filtering options have been added to the Distribution utility, making it even easier to quickly package a rate change for production deployment.
- Arrays can now be larger, providing greater flexibility.
- The ability to load an array from a rate table enables new ways of creating reusable, sharable formula logic.
- New formula language enhancements have been added with array specific elements, syntax and functions.
- The Test Case Editor includes enhanced find and replace functionality, making it easier to adapt test cases to changing business needs

### Production

- The Table Service includes new features that provide enhanced diagnostic ability and configurability.

## Powerful, award-winning

- XCelent Award recipient for functionality, customer service and client base
- 30+ years serving the insurance industry
- Partners with 12 of the top 20 global insurers
- 100+ live implementations
- Sub-second response time per rating request (~1,000 transactions in less than 5 seconds)
- Processes 60% of Gross Written Premium (GWP) in U.S. alone
- Clients have experienced:
  - 75% improvement in days required to implement changes
  - 50% reduction in staffing needed to support rating

## Product Builder API

- A new Product Builder API enables scripting and automation outside of Product Builder and easier integration into your company's other systems.

## Output Designer

- Output Designer received a major refresh, providing up to 8x improved performance, a complete UI overhaul and new features that enable easier manipulation of field values, better control of Calculator options, and improved auditability and stability.

## Join carriers receiving real benefits

- **Experience significant growth.** Ratabase helps improve the accuracy of pricing and enables development of unique products in crowded markets.
- **Use the “best in the business” tools** at a reasonable cost.
- **Save 50% or more on rating maintenance costs** and see up to a 75% improvement in the time needed to implement changes.
- **Spur technical innovation** by moving rate and rule maintenance from IT to the business.
- **Increase the volume of their book of business and individual policies** thanks to Ratabase's scalability and performance.
- **Reduce staff attrition and improve employee morale** with Ratabase University.

Ratabase is a trademark or registered trademark of CGI Inc. or its related companies.

“It is rare for a vendor to win an XCelent award, and rarer still for a vendor to win more than one award. CGI's Ratabase product won an unprecedented three XCelent awards in this year's review of rating engines.”
